Practicing Narrative Mediation provides mediation practitioners with practical narrative approaches that can be applied to a wide variety of conflict resolution situations. Written by John Winslade and Gerald Monk—leaders in the narrative therapy

movement—the book contains suggestions and illustrative examples for applying the proven narrative technique when working with restorative conferencing and mediation in organizations, schools, health care, divorce cases, employer and employee problems, and civil and international conflicts. Practicing Narrative Mediation also explores the most recent research available on discursive positioning and exposes the influence of the moment-to-moment factors that are playing out in conflict situations. The authors include new concepts derived from narrative family

work such as "absent but implicit," "double listening," and "outsider-witness practices."

Dr. Ladd has written a reference book on couples counseling that explores six contemporary relationships and discusses how couples may change from one to another according to their life

experiences. In addition, six common styles of conflict resolution are addressed that may make relationship changes less painful and difficult are also addressed. When we realize that one of the most common methods for transforming the union between two people is through divorce, then the possibility of changing a relationship, instead of changing a partner, may become a more attractive alternative. *Communication and*
