Reflective Social Work
Practice demonstrates how social workers can creatively and consciously combine 'thinking, doing and being'

when working with individuals, families, groups, communities and organisations, and when undertaking research. It discusses conceptual and theoretical aspects of reflective practice and presents a new, cohesive reflective social work practice model. It explores the themes of thinking (theory), doing (practice) and being (virtues). By defining 'being' in terms of virtues, the authors provide new perspectives for improved learning and practice in

social work. Each chapter features reflective exercises, examples, review questions and activities to engage and challenge readers. Extended case studies throughout illustrate how a holistic approach to social work can enhance practice and enrich the quality of services delivered to people and communities. Written by authors with extensive professional experience in social work, Reflective Social Work Practice is an invaluable resource for social work, human services and

welfare students, educators and practitioners alike.

Charles Barton gives a clear and insightful analysis of current restorative justice philosophy and theory. He uses a unifying and overarching principle of empowerment to provide a distinct conceptual framework for restorative justice theory and practice. He puts forward a step-by-step implementation process, which includes restorative meeting facilitation, complete with seating

plans and scripted prompts for mediators, keepers, and facilitators. There will also be two sample role plays in the book and additionally there will be four complete role plays available on our website, closer to publication. Conflict Resolution for the Helping Professions John Wiley & Sons

Have you been searching for a way to resolve conflict that doesn't involve a series of ten or more steps? Do you think that perhaps a key to conflict resolution must come from within? How can teachers and

pre-service teachers help their students learn and use strategies for conflict resolution? Tools for Conflict Resolution is a practical method for teaching conflict resolution skills to students in grades K-12. Conflict is a part of everyone's life. It is the authors' belief that if each student is given tools for handling conflict, and these tools are used each time conflict arises that soon students become proficient conflict managers. This book begins with a chapter, which introduces Peter Senge's five disciplines: Personal Mastery, Mental Models, Shared Vision,

Team Building, and Systems Thinking. After reading this chapter, the reader is able to embrace the five disciplines and begin practicing the adult level. As teachers, we teach from who we are. The rest of the book is filled with actual lesson plans, which are directly tied to the Multiple Intelligences Theory and are developmentally appropriate for students. Case studies, role-plays, skits, literature, songs, and co-operative learning activities are the primary instructional methods used to teach students conflict resolution skills. An annotated

bibliography is included to assist teachers in extending lessons. These lessons may be taught during Social Studies as a unit on character education or could be used during a guidance class.
