The U.S. Border
Patrol operates
checkpoints on U.S.
roads, mainly in the

southwest border states where most illegal entries occur. As part of a three-tiered strategy to maximize detection and apprehension of illegal aliens, Border Patrol agents at checkpoints screen vehicles for illegal aliens and contraband. This report assesses: (1) checkpoint performance and factors affecting performance; (2) checkpoint performance measures; (3) community impacts considered in checkpoint placement and design; and (4) the impact of checkpoint operations on nearby communities. Research included a review of Border Patrol data and

guidance, and visits to checkpoints and communities in five Border Patrol sectors across four southwest border states. Illus.

Users Guide to Ecohydraulic Modelling and Experimentation has been compiled by the interdisciplinary team of expert ecologists, geomorphologists, sedimentologists, hydraulicists and engineers involved in HYDRALAB IV, the European Integrated Infrastructure Initiative on hydraulic

experimentation which forms part of the European Community 's Seventh Framework Programme. Hand-books for Travellers in Europe and the East, Being a Guide Through Great Britain and Ireland, France, Belgium, Holland, Germany, Austria, Italy, Egypt, Syria, Turkey, Greece, Switzerland, Tyrol, Denmark, Norway, Sweden, Russia, Spain, and Portugal Menasha Ridge Press
This book is the most comprehensive and up-to-date source of

information about ways in which consumer activism has reshaped the economic and political well-being of citizens in the United States and around the world. This all-encompassing collection of information about consumer activism and the consumer movement will provide students, public officials, business groups, and other activists with a one-stop source of facts and insights. The contributors explore hundreds of major consumer protections that have significantly

enhanced the quality of life and safety for all Americans, showing how these protections were won through the skillful and determined work of leading activists and activist organizations. Many of the stories told here are related by the activists themselves, often for the first time. More than 140 entries offer a comprehensive treatment of the consumer activism of specific organizations, their leaders, and strategies. The book also includes more than 40 entries about consumer movements in Europe, Asia, Africa, and Latin America. A timeline of key events and a listing of the most important books on the subject of consumer activism help provide context for the individual entries as do two introductory essays. Cross references in each entry establish linkages among topics. • Provides the single most comprehensive source available of information about consumer activism and advocacy • Shows how activism has influenced laws and regulations affecting more than 40 consumer issues • Shares personal accounts from activists about their work on these issues • Details information on U.S. national consumer organizations and many state and local consumer groups, including their goals, strategies, leaders, finances, and impact • Offers insights into the ways consumer activist groups have interacted

with other nonprofits, policymakers, regulators, and business groups

Sportsman's Connection's Eastern New York All-Outdoors Atlas & Field Guide contains maps created at twice the scale of other road atlases, which means double the detail. And while the maps are sure to be

the finest quality you have ever used, the thing that makes this book unique is all the additional information. Your favorite outdoor activities including fishing lakes and streams, hunting, camping, hiking and biking, snowmobiling and off-roading, paddeling, skiing, golfing and wildlife viewing are covered in great depth with helpful editorial and extensive tables, which are all cross-referenced and indexed to the map pages in a

way that's fun and easy to use.

ABC-CLIO
Colorectal cancer is the third most commonly diagnosed condition in oncology, affecting around 1.23 million individuals per year, according to recent statistics. Of these patients,

about 50% will develop liver metastases and approximately 20% will present a stage IV disease at diagnosis. These statistics make colorectal liver metastases (CLM) an issue of major importance in current oncology. The area of CLM is subject to great and continuous

advances, as its pathophysiologic mechanisms are better understood and more therapeutic and surgical options are developed. Consequently, all professionals involved with the diagnosis, treatment and follow up of CLM should be kept up to date with the latest advances on the field, to provide high

their role in battles and campaigns against other Native Americans and Europeans/Americans, while also including key European/American leaders and soldiers as well as treaties between Native Americans and Europeans/Americans. The introduction provides a broad overview of the Indian Wars and also considers whether the Indian Wars should be considered genocide. The bibliography focuses on the most important works published

on the Indian Wars. Each entry also includes a list of references for readers to consult. The book also includes a collection of primary source documents that span the entire time period. *Complete fishing and floating information for Franklin County Kansas* DIANE Publishing The rich tapestry of Alaska is threaded together by 365,000 miles of waterways, from cascading mountain streams to meandering

valley rivers, from the meltwaters of glaciers to broad rivers that empty into the sea. This guide profiles a wide variety of rivers from all over Alaska, concentrating on trips for intermediate boaters, and including a few major expeditions for the experienced river-runner. A section on gear outlines what to take into the backcountry. "Neo-Modernism" in the Works of the Post-Soviet Russian
