"Among the crucial problems that confront mankind today are those associated with a degraded environment. This book examines the extent to which warfare and other military activities contribute to such degradation. The military capability to damage the environment and to cause ecological disruption has escalated, and there is no sign that the level of conflict in the world is decreasing. The military use and abuse of each of the several major global habitats -- temperate, tropical, desert, arctic, insular, and oceanic -- are evalusated separately in the light of the civil use and abuse of that habitat"--Dust jacket.

Having crossed more than three hundred years of life, Valentin Wyndham, is a prince among vampires. Memories of betrayal still haunt him and love isn't something

Sarah J. Maas's sexy, richly imagined series continues with the journey of Feyre's fiery sister, Nesta. Nesta Archeron has always been prickly-proud, swift to anger, and slow to forgive. And ever since being forced into the Cauldron and becoming High Fae against her will, she's struggled to find a place for herself within the strange, deadly world she inhabits. Worse, she can't seem to move past the horrors of the war with Hybern and all she lost in it. The one person who ignites her temper more than any other is Cassian, the battle-scarred warrior whose position in Rhysand and Feyre's Night Court keeps him constantly in Nesta's orbit. But her temper isn't the only thing Cassian ignites. The fire between them is undeniable, and only

burns hotter as they are forced into close quarters with each other. Meanwhile, the treacherous human queens who returned to the Continent during the last war have forged a dangerous new alliance, threatening the fragile peace that has settled over the realms. And the key to halting them might very well rely on Cassian and Nesta facing their haunting pasts. Against the sweeping backdrop of a world seared by war and plagued with uncertainty, Nesta and Cassian battle monsters from within and without as they search for acceptance-and healing-in each other's arms.

"The Hebrew Bible is only part of ancient Israel's writings. Another collection of Jewish works has survived from late- and post-biblical times, a great library that bears witness to the rich spiritual life of Jews in that period. This library consists of the most varied sorts of texts: apocalyptic visions and prophecies, folktales and legends, collections of wise sayings, laws and rules of conduct, commentaries on Scripture, ancient prayers, and much, much more. While specialists have studied individualtexts or subsections of this library, Outside the Bible seeks for the first time to bring together all of its major components into a single collection, gathering portions of the Dead Sea Scrolls, the Septuagint, the biblical apocrypha, and pseudepigrapha, and the writings of Philo of Alexandria and Josephus. The editors have brought together these diverse works in order to highlight what has often been neglected; their common Jewish background. For this reason the commentaries that accompany the texts devote special attention to their references to Hebrew Scripture and to issues of halakhah (Jewish law), their allusions to motifs and themes known from later Rabbinic writings in Talmud and Midrash, their

evocation of recent or distant events in Jewish history, and their references to other texts in this collection. The work of more than seventy-one contributing experts in a range of fields, Outside the Bible offers new insights into the development of Judaism and early Christianity. This three-volume set of translations, introductions, and detailed commentaries is a must for scholars, students, and anyone interested in this great body of ancient Jewish writings. The collection includes a general introduction and opening essays, new and revised translations, and detailed introductions, commentaries, and notes that place each text in its historical and cultural context. A timeline, tables, and a general index complete the set. "--

This fascinating book is the first volume in a projected cultural history of the United States, from the earliest English settlements to our own time. It is a history of American folkways as they have changed through time, and it argues a thesis about the importance for the United States of having been British in its cultural origins. While most people in the United States today have no British ancestors, they have assimilated regional cultures which were created by British colonists, even while preserving ethnic identities at the same time. In this sense, nearly all Americans are "Albion's Seed," no matter what their ethnicity may be. The concluding section of this remarkable book explores the ways that regional cultures have continued to dominate national politics from 1789 to 1988, and still help to shape attitudes toward education, government, gender, and violence, on which differences between American regions are greater than between European nations.

Five specialists examine the historical relationship of culture and conflict in various regional societies. The authors use Adda B. Bozeman's theories on conflict and culture as the basis for their analyses of the causes, nature, and conduct of war and conflict in the Soviet Union, the Middle East, Sinic Asia (China, Japan, and Vietnam), Latin America, and Africa. Drs. Blank, Lawrence Grinter, Karl P. Magyar, Lewis B. Ware, and Bynum E. Weathers conclude that non-Western cultures and societies do not reject war but look at

violence and conflict as a normal and legitimate aspect of sociopolitical behavior.

Lambert provided valuable descriptions of the general history of the area and various towns, detailed specific events, and discussed numerous facets of early American life: religious, political and social. There is a poem, entitled "Old Milford," taken from the Connecticut Gazette, Vol. I, No. 4, 1835, as well as a "History of Milford, Connecticut," written by Lambert in June, 1836 for Historical Collections of Connecticut by John W. Barber. Neither the poem nor the sketch of Milford appears in the printed version.

The water corridor that defines southeast Michigan sits at the heart of the world's largest freshwater ecosystem, the Great Lakes. Over forty-three trillion gallons of water a year flow through the Detroit River, providing a natural conduit for everything from fish migration to the movement of cargo-bearing one thousand-foot freighters, and a defining sense of place. But in both government policies and individual practices, the freshwater at the heart of the lakes was long neglected and sometimes abused. Today southeast Michigan enjoys an opportunity to learn from that history and put freshwater at the center of a prosperous and sustainable future. Joining this journey downriver in place and time, from Port Huron to Monroe, from the 1600s to the present, provides insight and hope for the region's water-based renaissance.

The Mandate of Heaven was originally given to King Wen in the 11th century BC. King Wen is credited with founding the Zhou dynasty after he received the Mandate from Heaven to attack and overthrow the Shang dynasty. King Wen is also credited with creating the ancient oracle known as the Yijing or Book of Changes. This book validates King Wen's association with the Changes. It uncovers in the Changes a record of a total solar eclipse that was witnessed at King Wen's capital of Feng by his son King Wu, shortly after King Wen had died (before he had a chance to launch the full invasion). The sense of this eclipse as an actual event has been overlooked for three millennia. It provides an account of the events surrounding the conquest of the Shang and founding of the Zhou dynasty that has never been told. It shows how the earliest layer of the Book of Changes (the Zhouyi) has preserved a hidden history of the Conquest.

The history of eastern European is dominated by the story of the rise of the Russian empire, yet Russia only emerged as a major power after 1700. For 300 years the greatest power in Eastern Europe was the union between the kingdom of Poland and the grand duchy of Lithuania, one of the longest-lasting political unions in European history. Yet because it ended in the late-eighteenth century in what are misleadingly termed the Partitions of Poland, it barely features in standard accounts of European history. The Making of the Polish-Lithuanian Union 1385-1569 tells the story of the formation of a consensual, decentralised, multinational, and religiously plural state built from below as much as above, that was founded by peaceful negotiation, not war and conquest. From its inception in 1385-6, a vision of political union was developed that proved attractive to Poles, Lithuanians, Ruthenians, and Germans, a union which was extended to include Prussia in the 1450s and Livonia in the 1560s. Despite the often bitter disagreements over the nature of the union, these were nevertheless overcome by a republican vision of a union of peoples in one political community of citizens under an elected monarch. Robert Frost challenges interpretations of the union informed by the idea that the emergence of the sovereign nation state represents the essence of political modernity, and presents the Polish-Lithuanian union as a case study of a composite state. The modern history of Poland, Lithuania, Ukraine, and Belarus cannot be

understood without an understanding of the legacy of the Polish-Lithuanian union. This volume is the first detailed study of the making of that union ever published in English.

International relations theory has been the site of intense debate in recent years. A decade ago it was still possible to divide the field between three main perspectives – Realism, Liberalism, and Marxism. Not only have these approaches evolved in new directions, they have been joined by a number of new ‘isms’ vying for attention, including feminism and constructivism. International Relations Theory for the Twenty-First Century is the first comprehensive textbook to provide an overview of all the most important theories within international relations. Written by an international team of experts in the field, the book covers both traditional approaches, such as realism and liberal internationalism, as well as new developments such as constructivism, poststructuralism and postcolonialism. The book’s comprehensive coverage of IR theory makes it the ideal textbook for teachers and students who want an up-to-date survey of the rich variety of theoretical work and for readers with no prior exposure to the subject.
