CONSTRUCTION LAW. LexisNexis

In Problems in Contract Law: Cases and Materials, Ninth Edition, by Charles L. Knapp, Nathan M. Crystal, and Harry G. Prince, a balance of traditional and contemporary cases reflect the development and complexity of contract law. Explanatory notes and text place classic and contemporary cases in their larger legal context, while questions and problem exercises bridge theory and practice. Adaptable for instructors with different teaching techniques, this successful book includes various perspectives and contractual settings, and offers a highly intelligent, contemporary treatment of contract law. It can easily be used in teaching by traditional case analysis, through problem-based instruction, or using theoretical inquiry. New to the Ninth Edition: Seven new cases that reflect advances in or improved statements of contract law Two restored cases (Kirksey v. Kirksey and Hill v. Jones) that provide valuable perspectives on fundamental areas of contract law Eight new problems (including seven net additions and one replacement) to provide more review options for teachers and students and to add contemporary fact patterns A new, two-color design featuring interesting photographs illustrating people and places discussed in some of the cases Editing of note and text material to reduce length without affecting coverage Reorganization of text and comment material to focus comments primarily on historical developments, allowing professors flexibility in assigning or deleting comments Student accessibility to deleted cases from prior editions through Connected Casebook, allowing professors the further flexibility of continuing to easily assign cases for which they have a particular preference Professors and students will benefit from: Flexible application for professors with various teaching methodologies: traditional, problem, theoretical, and practical A mixture of classic and contemporary cases The authors ' emphasis on accessibility of the material—rejecting a hide-the-ball approach Review questions at the end of each chapter that are primarily designed for students to perform self-assessments of their grasp of the material. Answers with explanations are included in an appendix within the book.

A048660, Appellant's Opening John Wiley & Sons

The primary focus of this text is to provide a bridge for students between the academic world and the real world. This bridge is built through an understanding of what is law, how law is created, how law affects almost every activity of human conduct, and how legal institutions operate. Intended mainly for architectural and engineering students, but increasingly for those in business schools and law schools, this text features a clear, concise, and jargon-free presentation. It probes beneath the surface of legal rules and uncovers why these rules developed as they did, outlines arguments for and against these rules, and examines how they work in practice. Updated with the most recent developments in the legal aspects of architectural, engineering, and the construction processes, this text is also a valuable reference for practitioners and has been cited in over twenty-five court decisions. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Keating on Construction Contracts Cpwr - The Center for Construction Research and Training

The application of Shariah compliance in business transactions continues to increase. The Asian financial crisis of 1997, global financial crisis of 2007-2008, Enron scandal and other reported ills besieging conventional business transactions have led to advocates of Shariah-compliant business transactions promoting the latter as a credible alternative. However, unlike the banking, commerce and financial sectors, the uptake by the construction sector was sluggish due to limited understanding of Shariah among the practitioners and policymakers compounded by the lack of research and publications on its application for the construction sector. This book is intended for students, researchers, practitioners and policymakers of the construction industry as well as the related upstream and downstream activities. It offers basic theories, challenges current practices, and proposes innovative ideas on Shariah compliance and its application for the construction industry. Related Link(s)

White by Law Pearson Prentice Hall

The book collects the latest research on both contractual and conceptual collaborative practices in construction. It identifies common problems faced by the industry and draws out practical implications. Construction projects are increasingly run in ways that undermine the traditional boundary of the firm and sometimes also the definition of the project coalition. This poses challenges for construction firms whose clients demand ever increasing performance improvements as well as those firms who want to improve their strategies for greater collaboration to give themselves competitive advantage. The editors identify three main themes: collaborative relationships, operating both in frameworks and within networks of contacts, e.g. relational contracting in partnering, supply chain management and other procurement-driven initiatives. The second theme is frameworks, both contractual frameworks binding parties together over a series of contracts, and conceptual frameworks used to develop future performance improvement arising from the proactive strategies of firms. The third theme is the network of relationships that supports individuals and firms within the project coalition in delivering services and adding value to improve performance. These networks define the investment and incentives supporting the inter-firm and intra-firm relationships, as well as the formal contractual conditions through which such incentives flow. Networks of information exchange define the structure of the activity and help predict organisational configurations for successful project outcomes.

The Legal Construction of Race John Wiley & Sons

Now in its second edition, Construction Law is the standard work of reference for busy construction law practitioners, and it will support lawyers in their contentious and non-contentious practices

worldwide. Published in three volumes, it is the most comprehensive text on this subject, and provides a unique and invaluable comparative, multi-jurisdictional approach. This book has been described by Lord Justice Jackson as a "tour de force", and by His Honour Humphrey Lloyd QC as "seminal" and "definitive". This new edition builds on that strong foundation and has been fully updated to include extensive references to very latest case law, as well as changes to statutes and regulations. The laws of Hong Kong and Singapore are also now covered in detail, in addition to those of England and Australia. Practitioners, as well as interested academics and post-graduate students, will all find this book to be an invaluable guide to the many facets of construction law.
