Blocking (in American English) is the use of short pieces (blocks) of dimensional lumber in wood framed construction. Uses include filling, spacing, joining, or reinforcing members. Blocking is typically made from short off-cuts or defective, warped pieces of lumber. Names for similar materials in other forms of English include dwang, nog, noggin, and noggling.

Construction: Principles, Materials & Methods (Building ...

There are two things that go into sustainable construction: the materials that are used and the methods that are utilized. Materials. One of the best ways to practice sustainability in construction is through the materials that are used. A new generation of stronger, lighter and more sustainable building materials can help solve many problems in the industry as well as push current practices to be more sustainable.
