Patricia Engel ' s
collection of stories,
Vida, quickly
established her as one

of our country ' s best young writers, winning praise from Junot Díaz, Uzodinma Iweala, Francisco Goldman, and others. Her first novel is a vibrant and wistful narrative about an American girl abroad in Paris, who navigates the intoxicating and treacherous complexities of independence, friendship, and romance. Lita del Cielo, the daughter of two

Colombian orphans who arrived in America with nothing and made a fortune with their Latin food empire, has been granted one year to pursue her studies in Paris before returning to work in the family business. She moves into a gently crumbling Left Bank mansion known as " The House of Stars, " where a spirited but bedridden Countess Séraphine rents out rooms to young women visiting

Paris to work, study, and, unofficially, to find love. Cautious and guarded, Lita keeps a cool distance from the other girls, who seem at once boldly adult and impulsively naïve, who both intimidate and fascinate her. Then Lita meets Cato, and the contours of her world shift. Charming, enigmatic, and weak with illness, Cato is the son of a notorious right-wing politician. As Cato and Lita retreat to their

own world, they soon find it difficult to keep the outside world from closing in on theirs. Ultimately Lita must decide whether to stay in France with Cato or return home to fulfill her immigrant family's dreams for her future. **It's Not Love, It's Just Paris** is a spellbinding love story, a portrait of a Paris caught between old world grandeur and the international greenblood elite, and an exploration of one

woman's journey to distinguish honesty from artifice and lay claim to her own life. **It's Not Love, It's Just Paris** Here Be Sexist Vampires To hell and back . . . Though he has vampire, demon, and Viking blood rushing through his veins, Ivar Kjeidsen's soul-crushing trip to hell broke him in ways he can barely fathom. One vow keeps the deadly immortal standing: To rescue

the vampire brother who had sacrificed freedom for him. To do that, Ivar needs the help of a brilliant physicist with wary brown eyes, fierce brilliance, and skin that's way too soft. Dr. Promise Williams understands the underpinnings of the universe but has never figured out the human beings inhabiting it. Her function is to think—and not feel—until she's

touched by a vampire who's nowhere near human. The primal hunger in his eyes awakens feelings in her that defy calculation. As she shows him the way to step between worlds, he brands her with a pleasure that could last more than a lifetime . . . Although he

walked away from her a year ago after a short fling, she doesn't judge him for his difficulties with relationships. But now he's in her space, declaring that he wants her back and regrets his earlier mistakes. While Imani's past is trying to interfere with the present and the threat of a war is looming, she has to decide whether to give him what he's demanding: all she has to give. Butch has always struggled to connect with people, but something about the sensual and independent Imani pulls at him until she's become an

obsession that he simply can't shake. But she was with another male, and watching them together was agonizing. When that relationship ends, Butch makes his move. Now he has to convince her to take a second chance on him, and he won't leave her alone until she does. As far as he's concerned, Imani's his and has always been his. He just needs to make her see that.

The third edition of this successful textbook will supply advanced undergraduate and graduate students with the tools they need to understand

modern glaciological research. Practicing glacial geologists and glaciologists will also find the volume useful as a reference book. Since the second edition, three-quarters of the chapters have been updated, and two new chapters have been added. Included in this edition are noteworthy new contributions to our understanding of important concepts, with over 170 references to papers published since the second edition went to press. The book develops concepts from the bottom up: a working knowledge of calculus is assumed, but beyond that, the important physical concepts are developed from

elementary principles. Emphasis is placed on connections between modern research in glaciology and the origin of features of glacial landscapes. Student exercises are included.

"Caffeine in Food and Dietary Supplements" is the summary of a workshop convened by the Institute of Medicine in August 2013 to review the available science on safe levels of caffeine consumption in foods, beverages, and dietary supplements and to identify

data gaps. Scientists with expertise in food safety, nutrition, pharmacology, psychology, toxicology, and related disciplines; medical professionals with pediatric and adult patient experience in cardiology, neurology, and psychiatry; public health professionals; food industry representatives; regulatory experts; and consumer advocates discussed the safety of caffeine in food and dietary supplements, including, but not limited to, caffeinated beverage products, and identified data

gaps. Caffeine, a central nervous stimulant, is arguably the most frequently ingested pharmacologically active substance in the world. Occurring naturally in more than 60 plants, including coffee beans, tea leaves, cola nuts and cocoa pods, caffeine has been part of innumerable cultures for centuries. But the caffeine-in-food landscape is changing. There are an array of new caffeine-containing energy products, from waffles to sunflower seeds, jelly beans to syrup, even bottled water, entering the marketplace.

Years of scientific research have shown that moderate consumption by healthy adults of products containing naturally-occurring caffeine is not associated with adverse health effects. The changing caffeine landscape raises concerns about safety and whether any of these new products might be targeting populations not normally associated with caffeine consumption, namely children and adolescents, and whether caffeine poses a greater health risk to those populations than it does for

healthy adults. This report delineates vulnerable populations who may be at risk from caffeine exposure; describes caffeine exposure and risk of cardiovascular and other health effects on vulnerable populations, including additive effects with other ingredients and effects related to pre-existing conditions; explores safe caffeine exposure levels for general and vulnerable populations; and identifies data gaps on caffeine stimulant effects.

Times bestselling author of Jonathan Strange & Mr Norrell, an intoxicating, hypnotic new novel set in a dreamlike alternative reality. Piranesi's house is no ordinary building: its rooms are infinite, its corridors endless, its walls are lined with thousands upon thousands of statues, each one different from all the others. Within the labyrinth of halls an ocean is imprisoned; waves thunder up staircases, rooms are flooded in an instant. But Piranesi is not afraid; he understands the tides as he understands the pattern of the labyrinth itself. He lives to explore the house. There is one other person in the house—a man called The Other, who visits Piranesi twice a week and asks for

help with research into A Great and Secret Knowledge. But as Piranesi explores, evidence emerges of another person, and a terrible truth begins to unravel, revealing a world beyond the one Piranesi has always known. For readers of Neil Gaiman's The Ocean at the End of the Lane and fans of Madeline Miller's Circe, Piranesi introduces an astonishing new world, an infinite labyrinth, full of startling images and surreal beauty, haunted by the tides and the clouds.

Sophrosyne, the provocative new novel by acclaimed author Marianne Apostolides, is about desire and restraint in a digital

age. The story delves deeply into the human condition via the intense and disturbing relationship between a mother and her son, as recollected by the main character, Aleksandros. Alex doesn't know the specifics of his mother's past. And because he doesn't know, neither does the reader. Instead, the reader is drawn into an amorphous, indefinable undercurrent of love and violation that marks their relationship. This dark tone is created by the rhythm and movement of Alex's thoughts, by his frustrations, recognitions, and struggles with self-control and sexuality. Consistent throughout is an idiosyncratic mind whose language curves and leaps, as befitting the unspeakable ideas

Alex is attempting to convey. This fifth book by Apostolides speaks to the authors attempt to usher in a new movement in literature, posthumanism, which moves toward a new way of conceiving of the human animal through language. Infused with the same liquid medium as Anne Carsons Autobiography of Red and Denis Johnsons Fiskadoro, Sophrosyne is both sensual and intellectual, decidedly dark yet highly erotic; its ideas are balanced only by the sexiness of the writing. Rhythmic and unpredictable, the novel asks readers to surrender themselves to its logic, language, and intoxication.

Cat shifter Bree Dwyer doesn't fear much. Ironically, what she fears most is the person who was put on the Earth just for her. Your true mate wasn't supposed to be cruel and twisted; wasn't supposed to be someone who'd never love or want to claim you. The rumors that her true mate is dead bring her only relief. Bree's intent on moving forward with her life and building a future with someone else. Sadly, the male she wants most is one she can never have--a hot-as-sin wolverine shifter who

happens to be her boss ... and the cousin of her predestined mate. Aleksandr "Alex" Devereaux detests being bullshitted, but he's been lying to himself for years--pretending he thinks of Bree as extended family; that he doesn't want her so bad he aches with it; that he can't feel himself weakening against her pull. The night they spend together changes everything. He's done fighting himself on what he wants. Someone isn't happy about that. Possibly the same 'someone' who's playing

mind games with Bree, trying to scare her. They're succeeding, because too many leads point to the possibility that the culprit could be the one person that she's determined to believe is dead.
