**Consumers Guide on Automobile Insurance** Scarborough House

Cloning researchers claim to have cloned an embryo that is mostly human, but also part animal. Biotech companies brag about manufacturing human embryos as "products" for use in medical treatments. Echoing long discredited master-race thinking, James Watson, who won a Nobel Prize for co-discovering the DNA double helix, claims that genetically enhanced people will someday "dominate the world." Events are moving so fast--and biotechnology seems so complicated--that many of us worry that we can't have an informed opinion about these issues that are remaking the human future before our very eyes. But now Wesley J. Smith provides us with a guide to the brave new world that is no longer a figment of our imagination but right around the corner of our lives. Smith starts with the basic questions. What are stem cells? What is the difference between

embryonic stem cells and adult stem cells and which is most promising for medical therapy? What does embryonic stem cell research involve and why is it so controversial? What is its relationship to human cloning? But in addition to explaining the science of stem cells, this highly readable and carefully researched book reports on the gargantuan "Big Biotech" industry and its supporters in the universities and in the science and bioethics establishments. Smith shows how this lobby works and how the lure of huge riches, mixed with the ideology of "scientism," threatens to impose a "new eugenics" on society that would dismantle ethical norms and call into question the uniqueness and importance of all human life. "A Consumer's Guide to Brave New World" presents a clear-eyed vision of two potential futures. In one we will use biotechnology as a powerful tool to treat disease and improve the quality of our lives. But in another, darker scenario, we will be steered onto the anti-human path Aldous Huxley and other prophetic writers first warned against fifty years ago when science fiction had not yet become science fact.

**Departments of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriations for 1995** Gale / Cengage Learning

Abandoned lots and litter-strewn pathways, or rows of green beans and pockets of wildflowers? Graffiti-marked walls and desolate bus stops, or shady refuges and comfortable seating? What transforms a dingy, inhospitable area into a dynamic gathering place? How do individuals take back their neighborhood? Neighborhoods decline when the people who live there lose their connection and no longer feel part of their community. Recapturing that sense of belonging and pride of place can be as simple as planting a civic garden or placing some benches in a park. The Great Neighborhood Book explains how most struggling communities can be revived, not by vast infusions of cash, not by government, but by the people

---

who live there. The author addresses such challenges as traffic control, crime, comfort and safety, and developing economic vitality. Using a technique called “placemaking”—the process of transforming public space—this exciting guide offers inspiring real-life examples that show the magic that happens when individuals take small steps and motivate others to make change. This book will motivate not only neighborhood activists and concerned citizens but also urban planners, developers, and policymakers. Jay Walljasper is a senior fellow of Project for Public Spaces (PPS), whose mission is to create and sustain enriching public places that build communities. He is a former editor of *The Utne Reader* and currently executive editor of *Ode* magazine. Inspired by European cities, *The Great Neighborhood Book* highlights practical solutions for the revitalization of North American cities.

### Harmony

Provides advice on what to look for in choosing a service professional in such fields as accounting, architecture, plumbing, and real estate.

Gale Group  
Consumers Union, the publisher of *Consumer Reports*, has been an influential and defining force in American society since 1936. The organization's mission has remained essentially unchanged: to work for a fair, just, and safe marketplace for all consumers. The Consumers Union National Testing and Research Center in Yonkers, New York, is the largest nonprofit educational and consumer product testing center in the world. In addition to its testing facility in Yonkers and a state-of-the-art auto test center in Connecticut, the organization maintains advocacy offices in San Francisco, Austin, and Washington, D.C., where staff members work on national campaigns to inform and protect consumers. In addition to its flagship publication, *Consumer Reports*, Consumers Union also maintains several Web sites, including [www.ConsumerReports.org](http://www.ConsumerReports.org) and [www.ConsumersUnion.org](http://www.ConsumersUnion.org), and publishes two newsletters--*Consumer Reports on Health* and *Consumer Reports Money Adviser*--as well as many special publications.

### European Consumer Guide to the Single Market

Arcadia Publishing  
It's amazing how many people do not balance their checkbooks or don't participate in their companies 401(k) or 403(b) plans. Or they are so far in debt they fear they will never see daylight. In many cases, these are not uneducated people; this just happens to be an area of their lives where they have received little to no guidance. So they do the best they can with what they do know. *Financial Fundamentals* not only shares practical information such as how to balance a checking account and how to set up a budget, but also asks many questions designed to help the reader think through why their current financial situation is in the shape it is. While there are many books that go into a lot more depth than *Financial Fundamentals*, this book was written for anyone who may be just getting started, may be starting over, needs to get a better handle on the basics, or just needs to know that there is a way to a better life.

### Hearings Before a Subcommittee of the Committee on Appropriations, House of Representatives, One Hundred Third Congress, Second Session

Detroit : Gale Research  
In 1957, America turned its back on its earlier self and jumped headlong into the nation it has become today. From Sputnik and the beginning of the space race to Little Richard and the underappreciated influence of rock n' roll in bringing blacks and whites closer together, to President Eisenhower's Interstate Highway Act, which forever changed the landscape, 1957 represents the year when all of the energy and anxiety that had followed the end of World War II exploded. In compelling stories from politics, pop culture, business, and the media, Eric Burns captures the excitement of a headspinning year and the lingering fallout that continues to resonate seven decades later. For baby boomers seeking to relive their formative years or readers seeking a window into midcentury America, 1957 provides a highly readable tour through one of the most fascinating years in American history.

Consumer Sourcebook provides a comprehensive digest of accessible resources and advisory information for the American consumer. This new edition identifies and describes some 23,000 programs and services available to the general public at little or no cost. These services are provided by federal, state, county, and local governments and their agencies as well as by organizations and associations.

Consumer affairs and customer services departments for corporations are also listed as well as related publications, multimedia products, general tips and recommendations for consumers. The master index is arranged alphabetically by name and by subject term.

*A Consumer Guide from the Federal Trade Commission* Springer

Information for medicines used to treat cancer or the symptoms of cancer, including side effects of the drugs, how the drug works, which drugs are FDA approved, how to take the drugs, and the meaning of cancer treatment terms.

### A Do-it-Yourself Guide to Placemaking DIANE Publishing

From one of the most prestigious nonprofit organizations devoted to environmental issues comes a clear, practical, and rational overview of the relationship between consumers and the environment. Paper or plastic? Bus or car? Old house or new? Cloth diapers or disposables? Some choices have a huge impact on the environment; others are of negligible importance. To those

of us who care about our quality of life and what is happening to the earth, this is a vastly important issue. In these pages, the Union of Concerned Scientists help inform consumers about everyday decisions that significantly affect the environment. For example, a few major decisions--such as the choice of a house or vehicle--have such a disproportionately large affect on the environment that minor environmental infractions shrink by comparison. This book identifies the 4 Most Significant Consumer-Related Environmental Problems, the 7 Most Damaging Spending Categories, 11 Priority Actions, and 7 Rules for Responsible Consumption. Learn what you can do to have a truly significant impact on our world from the people who are at the forefront of scientific research.
