Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are

needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic

science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better

training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

China's People's

Liberation Army (PLA) has

embarked on its most

wide-ranging and

ambitious restructuring since 1949, including major changes to most of its key organizations. The restructuring reflects the desire to strengthen PLA joint operation capabilities-on land, sea, in the air, and in the space and cyber domains. The reforms could result in a more adept joint warfighting force, though the PLA will continue to face a number of key hurdles to effective joint operations. Several potential actions would indicate that the PLA is overcoming obstacles to a stronger joint operations capability. The reforms are also intended to increase Chairman Xi Jinping's control over the PLA and to reinvigorate Chinese Communist Party (CCP) organs within the military. Xi Jinping's ability to push through reforms indicates that he has more authority over the PLA than his recent predecessors. The restructuring could create new opportunities for U.S.-China military contacts.

Paul Kennedy's classic naval history, now updated with a new introduction by the author. This acclaimed book traces Britain's rise and fall as a sea power from the Tudors to the present day. Challenging the traditional view that the British are natural 'sons of the waves', he suggests instead that the country's fortunes as a significant

maritime force have always been bound up with its economic growth. In doing so, he contributes significantly to the centuries-long debate between 'continental' and 'maritime' schools of strategy over Britain's policy in times of war. Setting British naval history within a framework of national, international, economic, political and strategic considerations, he offers a fresh approach to one of the central questions in British history. A new introduction extends his analysis into the twenty-first century and reflects on current American and Chinese ambitions for naval mastery. 'Excellent and stimulating' Correlli Barnett 'The first scholar to have set the sweep of British Naval history against the background of economic history' Michael Howard, Sunday Times 'By far the best study that has ever been done on the subject ... a sparkling and apt quotation on practically every page' Daniel A. Mansur Abdulin fought in the front ranks of the Soviet infantry against the German invaders at Stalingrad, Kursk and on the banks of the Dnieper. This is his extraordinary story. His vivid inside view of a ruthless war on the Eastern Front gives a rare insight into the reality of the fighting and into the tactics and mentality of the Soviet army. In his own words, and with a remarkable clarity of recall, he describes what combat was like on the ground, face to face with a skilled, deadly and increasingly desperate enemy.

Cross-connection Control Manual World Bank Publications
Winner of the 2012 Pulitzer Prize in Biography Widely and enthusiastically acclaimed, this is the authorized, definitive biography of one of the most fascinating but troubled figures of the twentieth century by the nation's leading Cold War historian. In the late 1940s, George F. Kennan—then a bright but, relatively obscure American diplomat—wrote the "long telegram" and the "X" article. These two documents laid out United States' strategy for "containing" the Soviet Union—a strategy which Kennan himself questioned in later years. Based on exclusive access to Kennan and his archives, this landmark history illuminates a life that both mirrored and shaped the century it spanned.

Paste Donald Trump's presidency has raised a question that many of us never thought we'd be asking: Is our democracy in danger? Harvard professors Steven Levitsky and Daniel Ziblatt have spent more than twenty years studying the breakdown of democracies in Europe and Latin America, and they believe the answer is yes. Democracy no longer ends with a bang—in a revolution or military coup—but with a whimper: the slow, steady weakening of critical institutions, such as the judiciary and the press, and the gradual erosion of long-standing political norms. The

good news is that there are several exit ramps on the road to authoritarianism. The bad news is that, by electing Trump, we have already passed the first one. Drawing on decades of research and a wide range of historical and global examples, from 1930s Europe to contemporary Hungary, Turkey, and Venezuela, to the American South during Jim Crow, Levitsky and Ziblatt show how democracies die—and how ours can be saved. Praise for *How Democracies Die* “What we desperately need is a sober, dispassionate look at the current state of affairs. Steven Levitsky and Daniel Ziblatt, two of the most respected scholars in the field of democracy studies, offer just that.”—The Washington Post “Where Levitsky and Ziblatt make their mark is in weaving together political science and historical analysis of both domestic and international democratic crises; in doing so, they expand the conversation beyond Trump and before him, to other countries and to the deep structure of American democracy and politics.”—Ezra Klein, Vox “If you only read one book for the rest of the year, read *How Democracies Die*. . . . This is not a book for just Democrats or Republicans. It is a book for all Americans. It is nonpartisan. It is fact based. It is deeply rooted in history. . . . The best commentary on our politics, no contest.”—Michael Morrell, former Acting Director of the Central Intelligence Agency (via Twitter) “A smart

and deeply informed book about the ways in which democracy is being undermined in dozens of countries around the world, and in ways that are perfectly legal.”—Fareed Zakaria, CNN

Guide for the Care and Use of Laboratory Animals National Academies Press April 2018 Full COLOR 8 1/2 by 11 inches The Public Assistance Program and Policy Guide provides an overview of the Presidential declaration process, the purpose of the Public Assistance (PA) Program, and the authorities authorizing the assistance that the Federal Emergency Management Agency provides under the PA Program. It provides PA policy language to guide eligibility determinations. Overarching eligibility requirements are presented first and are not reiterated for each topic. It provides a synopsis of the PA Program implementation process beginning with pre-declaration activities and continuing through closeout of the PA Program award. When a State, Territorial, or Indian Tribal Government

determines that an incident may exceed State, Territorial, Indian Tribal, and local government capabilities to respond, it requests a joint Preliminary Damage Assessment (PDA) with the Federal Emergency Management Agency (FEMA). Federal, State, Territorial, Indian Tribal, local government, and certain private nonprofit (PNP) organization officials work together to estimate and document the impact and magnitude of the incident. The introductory chapters (1-3) in this volume

take as their starting point the elements of the Essential Packages presented in the overview chapters of each volume. First, the chapter on intersectoral policy priorities for health includes fiscal and intersectoral policies and assembles a subset of the population policies and applies strict criteria for a low-income setting in order to propose a "highest-priority" essential package. Second, the chapter on packages of care and delivery platforms for universal health coverage (UHC) includes health sector interventions, primarily clinical and public health services, and uses the same approach to propose a highest priority package of interventions and policies that meet similar criteria, provides cost estimates, and describes a pathway to UHC.
