This book is a detailed look at how the Artillery Air Section of a US Army Headquarters functioned during the Second World War in Europe. It relates how its Air Observation Post aircraft were procured, crewed and operated, as recorded by the officer responsible for such matters. In this instance the HQ was that of Ninth US Army, and the officer concerned was the late Lt Col Robert M Leich. As Artillery Air Officer, Leich maintained a Daily Journal, and this is the principal source on which this book is based. The result is a book of a different kind, covering both operational and administrative matters. Also revealed is the close co-operation that existed between Ninth Army and the two USAAF 'air' units attached to it, namely the 125th Liaison Squadron and the 50th Mobile Reclamation and Repair Squadron.

This edition is fully revised and updated and contains 10 years worth of updated material, including the addition of a number of manufacturers and aircraft which were omitted from earlier editions for various reasons. Aircraft new to this edition include the so-called "heavy microlights", which are now an important part of the worldwide light aircraft scene. About 90 percent of the photos are new, and larger page size provides greater space for large data tables and photos.
