This aviation handbook is  
designed to be used as a quick  
reference to the classic military  
heritage aircraft that have been  
restored and preserved in the  
state of Florida. The aircraft  
include those fl own by  
members of the United States  
Air Force, the United States  
Navy, the United States Army,  
the United States Marine  
Corps, the United States Coast  
Guard, the Air and Army  
National Guard, and by various

NATO and allied nations as  
well as a number previously  
operated by opposition forces  
in peace and war. The  
interested reader will find  
useful information and a few  
technical details on most of the  
military aircraft that have been  
in service with active flying  
squadrons both at home and  
overseas. 160 selected  
photographs have been  
included to illustrate a few of  
the major examples in addition  
to the serial numbers assigned  
to American military aircraft.  
For those who like to actually  
see the aircraft concerned,  
aviation museum locations,  
addresses and contact phone  
numbers have been included,  
along with a list of aircraft held  
in each museums current  
inventory or on display as gate  
guardians throughout the State  
of Florida. The aircraft  
presented in this edition are  
listed alphabetically by

Jane's Fighting Aircraft of World War II Fonthill

Media

A fascinating, entertaining, and amusing plane-by-plane journey through aviation history. Aviation has come a long way since the Wright Brothers built their glider in Kitty Hawk, North Carolina, in 1903. From among the

thousands of different types of military and commercial aircraft constructed over the past 100 years, aviation expert Robert F. Dorr profiles the most important, fascinating, and famous aircraft ever made. Your opinions might differ, but you wouldn't want to miss out on the planes Dorr identifies as flights of a lifetime. The book covers 365 of the most iconic aircraft in world history that enthusiasts, serious-minded hobbyists, and casual fans would love to fly if given the chance. Clear photography, historical context, and specs get you as close as possible to these planes without setting foot in a hangar. While covering every era of aviation history, many of the planes in 365 Aircraft You Must Fly were flown during World War II, a time unmatched in aviation for its technological advances, romance, and clarity of purpose. During this golden age of flying, propellers gave way to jet engines, and the "Greatest Generation" fought gallantly in them. Explore the history, thrills, and joy of flying the world's most amazing 365 aircraft.

Airlife's General Aviation Speaking Volumes

This is a completely new and revised edition of the General

---

Aviation Handbook, long overdue since it has been over 10 years since the last edition was published. This edition is fully revised and updated and contains 10 years worth of updated material, including the addition of a number of manufacturers and aircraft which were omitted from earlier editions for various reasons. Aircraft new to this edition include the so-called "heavy microlights", which are now an important part of the worldwide light aircraft scene. About 90 percent of the photos are new, and larger page size provides greater space for large data tables and photos. Previous editions have been strong sellers; this is the main reference book on this important sector of the aviation world, and this new edition will be welcomed by both aviation enthusiasts and those involved in the aviation industry.

365 Aircraft You Must Fly

Turner Publishing Company

This book is a detailed look at how the Artillery Air Section of a

US Army Headquarters functioned during the Second World War in Europe. It relates how its Air Observation Post aircraft were procured, crewed and operated, as recorded by the officer responsible for such matters. In this instance the HQ was that of Ninth US Army, and the officer concerned was the late Lt Col Robert M Leich. As Artillery Air Officer, Leich maintained a Daily Journal, and this is the principal source on which this book is based. The result is a book of a different kind, covering both operational and administrative matters. Also revealed is the close co-operation that existed between Ninth Army and the two USAAF 'air' units attached to it, namely the 125th Liaison Squadron and the 50th Mobile Reclamation and Repair Squadron.
