The purpose of this handbook is to provide aviation enthusiasts with a simple checklist on where to find the surviving retired military aircraft that are preserved in the state of Florida. The museum staffs and volunteer organizations in Florida have done a particularly good job of preserving the great variety of American combat veteran aircraft, illustrated here. Hopefully, as more aircraft are recovered from their crash sites in the bush and restored, traded or brought back from private owners, that they too will be added to the record. The book lists the aircraft alphabetically by manufacturer, number and type. This list is also appended with a brief summary of the aircraft presently on display within the state and a bit of its history in the US military.
