Airworthiness Directives - Continental Motors, Inc. Reciprocating Engines (US Federal Aviation Administration Regulation) (FAA) (2018 Edition) The Law Library presents the complete text of the Airworthiness Directives - Continental Motors, Inc. Reciprocating Engines (US Federal Aviation Administration Regulation) (FAA) (2018 Edition). Updated as of May 29, 2018 We are adopting a new airworthiness directive (AD) for certain Continental Motors, Inc., (CMI) San Antonio (formerly known as Airmotive Engineering Corp. (AEC)), replacement parts manufacturer approval

(PMA) cylinder assemblies marketed by Engine Components International Division (ECi). On July 17, 2015, AEC was purchased by CMI and is now operating as "Continental Motors-San Antonio." These cylinder assemblies are used on all CMI model -520 and -550 reciprocating engines, and on all other CMI engine models approved for the use of model -520 and -550 cylinder assemblies, such as the CMI model -470 when modified by supplemental type certificate (STC). This AD was prompted by reports of multiple cylinder head-tobarrel separations and cracked and leaking aluminum cylinder heads. This AD requires removal of the affected cylinder assemblies, including overhauled cylinder assemblies, according to a phased removal schedule. We are issuing this AD to prevent failure of the cylinder assemblies, which could lead to failure of the engine, in-flight shutdown, and loss of control of the airplane. This book contains: - The complete text of the Airworthiness Directives - Continental

Lincoln V12 engine, Excerpt: The Lincoln Continental if... was an automobile produced by the Lincoln division of Ford Motor Company from 1939 to 1948 and again ${\tt Instructions}$, W670, Series 6A & from 1956 to 2002. Despite often sharing underpinnings with less-expensive Fords in more recent years, the Lincoln Continental had usually been a distinctively platformed and styled, highly equipped luxury car in the course of its long history. The flagship Lincoln model during most of its run, the Continental name conveyed special cachet in the product line. During the 1980s, the Continental was downsized from a full-size to a mid-size Ford Taurus platform; this introduced the Continental to a wider range of competition from Europe and Japan. After the Continental was discontinued in 2002, it was largely replaced by the Lincoln LS V8. contemporaneous image of 1942 Lincoln Continental coupe 1948 Lincoln Continental convertible The first Lincoln Continental was developed as Edsel Ford's one-off personal vehicle, though it is believed he planned all along to put the model into production
