The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better. Errett Lobban Voyageur Press

E.L. Cord was first and foremost a salesman, both of products and of himself. In 1924, after achieving great success as an automobile distributor, Cord became the man with enough talent and panache to lead the Auburn Automobile Company out of its slumber. By 1929, Auburn sales had increased 15-fold and Cord was the head of an empire. His Cord Corporation owned Lycoming Mfg. Co. (engines), Limousine Body Co. and Central Mfg. Co. (auto bodies), Century Airlines, and Duesenberg, among others. Cord's philosophy of automobile design (and salesmanship) might be summed up in two words: Novelty Sells. Though mechanically ordinary, his Auburn models, with outstanding styling and clever paint combinations, were hot sellers. Cord oversaw the introduction of the fabulous Model J Duesenberg, a car whose combination of size, cost, performance, and style was and is unmatched in American automotive history. His most novel car was the rakish Cord L-29, the first American production car to feature front-wheel drive. All this and more is told of America's true renaissance man, E.L. Cord, in the original and complete biography of the man behind the Auburn, Cord and Duesenberg lines. The luxurious presentation includes 280 over-sized pages containing more than 500 rare illustrations, photographs and documents.

For more than eight decades, Wichita, Kansas has been recognized as the world's Air Capital, and there doesn't seem to be any other city that can make that claim. More than half of all the

airplanes in the world were built in this prairie town of 360,000. Three elements drew early builders-weather, workers and wampum. Three hundred days of good flying weather can be guaranteed; a work force with experience learned on the farm on in the oil patch was on hand; and plenty of cash was available. Of the literally scores of airplane companies that called Wichita home over the years, today's survivors dominate the worldwide General Aviation market. The Planes of Wichita is a collection of thumbnail sketches that tell the stories that contributed to the legend.

DIVIf youâ€™re a tractor enthusiast with a passion for tractor photography, *Legendary Farm Tractors* is a dream-come-true pictorial produced with you in mind. Containing more color photographs of more types of farm tractors than any other book in print, *Legendary Farm Tractors* presents tractors from the United States, Canada, Europe, and Japanâ€™ models from the 1880s to todayâ€™ along with detailed captions, together offering a comprehensive photographic history of tractors. Organized alphabetically by make so that readers can find their favorites easily, the tractors covered here include everything from familiar manufacturers like John Deere, Ford, Farmall, Case, Caterpillar, and International Harvester to obscure tractors that have seldom been seen, such as the special streamlined Porsche coffee plantation tractor that looks more like a sports car than a piece of farm equipment. The extensive variety and distinguished photographs by noted photographer Andrew Morland make this an exceptional book for tractor buffs and the perfect gift book for any machine enthusiast./div

TM 9-1730A 6 Cylinder Continental Engine? 1952-07-08" This manual contains a description of and procedures for removal disassembly, inspection, repair, rebuild, and assembly of the stripped engine."

The American Exporter

This is the first full-scale history of one of the largest farm tractor manufacturers of all time, peppered with pictures of Massey-Harris, Ferguson, and Massey Ferguson's historic models, collectibles, sales memorabilia, and advertisements from old farm magazines. The Big Book of Massey Tractors tells the story of the mergers and machines that formed Massey Ferguson over several decades, and—because these machines dominated Canadian farms for almost a century—in many ways it also tells the story of Canadian agriculture. Robert Pripps, a longtime tractor aficionado, describes Massey Ferguson's battle with Ford over dominance of the farm tractor industry—a battle the company eventually won, remarkably enough, in view of its initial abject market failure with tractors. From the company's beginnings in 1891, to its 1953 merger with the Ferguson tractor company, to its current ownership by Allis-Gleaner Company (AGCO), Masseys have played a large role in our agricultural history. The Big Book of Massey Tractors celebrates that role and showcases the machines that have helped turn the earth for over a hundred years.
