Image archivist and transportation historian Jim Harter follows his work, Early Farm Tractors, with an even larger collection of images from advertising line art from 1880 to 1930, this time focused on Early Automobiles. Nearly 250 entrancing illustrations -- many suitable for framing -- are gems of the art of commercial engraving. Harter provides a very substantial, detailed history of the development of the "horseless carriage" into the brands famous from the early 20th century -- racers like Stutz, Dusenbergh, Stanley, as well as those that became household names like Oldsmobile, Ford, Chrysler and others. Of special interest are the dozens of successful electric automobiles that flourished for 25 years. The history includes many colorful anecdotes about early long-distance races as well as interesting details of engineering breakthroughs. Full bibliography and index.

Launched in 1958, as the successor to the ubiquitous Ferguson TE20, the Masey-Ferguson 35 was a product of the merger of Massey-Harris and Ferguson. It incorporated numerous improvements and new features and became massively popular worldwide. Its companion, the 65 model, was introduced shortly afterwards and was a larger tractor, offered with the revolutionary Multi Power system that gave 12 forward and four reverse gears. Durable and versatile, these tractors are still a practical proposition today, and even unrestored examples command high prices. Michael Thorne, author of Ferguson TE20 in Detail, continues the story as he describes the development of these models, the production versions and their capabilities, options and extras, conversions, implements and their use today. Outstanding surviving examples are featured in some 80 photographs specially taken for this book, and there are approximately 120 accompanying archive illustrations.

While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. The jeep was the most famous military vehicle of World War II, and its name has become synonymous with a whole class of military and civilian all-terrain vehicles. The jeep originated in a prewar US Army requirement for a simple, inexpensive, and robust vehicle for basic utility chores. Its simple design proved to be adaptable to a host of military tasks including use as a scout vehicle, battlefield ambulance, communications vehicle, and staff car. This book, covering “ the savior of World War II ” , focuses on the design and development of this versatile vehicle used on nearly every front of World War II.

One Hundred Years of Kibbutz Life shows that the kibbutz thrives and describes changes that have occurred within Israel's kibbutz community. The kibbutz population has increased in terms of demography and capital, a point frequently overlooked in debates regarding viability. Like the kibbutz founders who established a society grounded in certain principles and meeting certain goals, kibbutz newcomers seek to build an idealistic society with specific social and economic arrangements. The years 1909-2009 marked a century of kibbutz life--one hundred years of achievements, challenges, and creative changes. The impact of kibbutzim on Israeli society has been substantial but is now waning. While kibbutzim have become less relevant in Israeli policy and politics, they are increasingly engaged in questions of environmentalism, education, and profitable industries. Contributors discuss the hopes, goals, frustrations, and disappointments of the kibbutz movement. They also examine reform efforts intended to revitalize the institution and reinforce fading kibbutz ideals. Such solutions are not always popular among kibbutz members, but they demonstrate that the kibbutz is an adaptive and flexible social organization. The various studies presented in this book clarify the dynamism of the kibbutz institution and raises questions about the ways in which

residential arrangements throughout the world manage change.
