Control engineering is the  
engineering discipline that  
focuses on the modeling of a  
diverse range of dynamic  
systems (e.g. mechanical  
systems) and the design of  
controllers that will cause  
these systems to behave in the  
desired manner. Although such  
controllers need not be  
electrical, many are and hence  
control engineering is often  
viewed as a subfield of  
electrical engineering.
