Coolant is drawn from the radiator outlet and into the water pump inlet by the water pump. Some coolant will then be pumped from the water pump, to the heater core, then back to the water pump. This provides the passenger compartment with heat and defrost. Coolant is also pumped through the water pump outlet and into the engine block.

LS3 steam vent routing - Pro-Touring.com

So while the engine was at 212\* I got out and tested for hot spots with my inferred temp gun. I noticed that the upper and lower hoses were cool at around 175\*. Radiator was even cool to the touch. This showed me that I have a flow issue and water isn't flowing through the radiator to cool the engine. (YES, I know the coolant system well.

Replacing C6 Corvette Coolant GM recommends the coolant be replaced after 5 years or 150,000 miles whichever occurs first. In a C6 it straight forward so there is no reason not to do it on or before that time. With only 18,000 miles on the 2008 Vette but 4 1/2 years it was time. The cooling system has never been a problem and the
