According to an old story, a woman concealed her sex and ruled as pope for a few years in the ninth century. Pope Joan was not betrayed by a lover or discovered by an enemy; her downfall came when she went into labor during a papal procession through the streets of Rome. From the myth of Joan to the experiences of saints, nuns, and ordinary women, *The Oldest Vocation* brings to life both the richness and the troubling contradictions of Christian motherhood in medieval Europe. After tracing the roots of medieval ideologies of motherhood in early Christianity, Clarissa W. Atkinson reconstructs the physiological assumptions underlying medieval notions about women's bodies and reproduction; inherited from Greek science and popularized through the practice of midwifery, these assumptions helped shape common beliefs about what mothers were. She then describes the development of "spiritual motherhood" both as a concept emerging out of monastic ideologies in the early Middle Ages and as a reality in the lives of certain remarkable women. Atkinson explores the theological dimensions of medieval motherhood by discussing the cult of the Virgin Mary in twelfth-century art, story, and religious expression. She also offers a fascinating new perspective on the women saints of the later Middle Ages, many of whom were mothers; their lives and cults forged new relationships between maternity and holiness. *The Oldest Vocation* concludes where most histories of motherhood begin—in early modern Europe, when the family was institutionalized as a center of religious and social organization. Anyone interested in the status of motherhood, or in women's history, the cultural history of the Middle Ages, or the history of religion will want to read this book.

Inclusive Design: What's in It for Me? presents a comprehensive review of current practice in inclusive design. With emphasis on new ideas for improvement and arguments for wider implementation in future, a unique combination of leading opinions on inclusive design from both industry and academia are offered. The theme throughout encourages a positive view of inclusive design as a good and profitable process and to produce a change to more effective approaches to "design for all". *Inclusive Design* is composed of two parts with a common chapter structure so that the business and design arguments in favour of inclusive design can be easily compared and assimilated: *The Business Case* presents the industrial and management benefits of inclusive design. It concentrates on demographic, legal and ethical reasons for all businesses being better off taking inclusivity into account in the design of their products or services. Case histories demonstrating the commercial success of inclusive design are

drawn from the experiences of companies such as Tesco, Fiat and The Royal Mail. *The Designers' Case* focuses on the factors a designer needs to take into account when dealing with inclusivity. "Who is going to use my design?" "What do they need from my design?" "How do I take any medical needs into account?" "Just how "inclusive" is my design?" are all questions answered in this section which presents the necessary tools for effective inclusive design. This part of the book aims to convince a designer that inclusive design is a realistic goal. *Inclusive Design* will appeal to designers, researchers and students and to managers making decisions about the research and design strategies of their companies.

Fed up with the high tolls charged by your ordinary telephone service? If you're itching to cut the copper cord with your costly, traditional phone service, you need *Talk is*

Cheap, the new, easy-to-understand guide to understanding and using Voice over Internet Protocol (VoIP) and other Internet telephone options. Technologies such as VoIP are gaining a great deal of attention these days as more people switch from standard telephone service to phone service via the Internet. But while the cost savings are outstanding, there are some issues with Internet telephony that you should know about. Are the connections reliable? Is the quality comparable? Will it include 911 services? James Gaskin's Talk is Cheap addresses these issues and many more by explaining how to make the switch and what the tradeoffs will be if you opt for Internet telephony over traditional phone services. Talk is Cheap focuses on the increasingly popular services from Vonage, which uses VoIP, and Skype--a free service that operates as a peer-to-peer (P2P) network with the ability to turn any PC, Mac, or Pocket PC into a telephone. The book explains your options; explores the background behind, the workings of, and differences between VoIP and P2P networks; and discusses the advantages and drawbacks of both technologies (including service offerings, quality, capabilities, completion rates, and more). Talk is Cheap then goes into detail on what you can expect in Internet service from traditional phone companies such as Verizon and AT&T. In addition, you will learn more advanced techniques, including how to turn your Palm or Pocket PC into an Internet phone and how to work with Wi-Fi phones and videophones. A straightforward, quick introduction to the ins and outs of using Internet telephone services, this book provides everything you need to make informed telephone decisions--whether you're thinking about the switch from traditional phone service or have already made it and want to get the most out of your new Internet telephone.

When Jake "Payday" Bechet hears that two men have been murdered a few miles from where he lives in the Hamptons---hanged from the Shinnecock Bridge, their hands severed---he knows that trouble is coming. Trouble for him, for everyone, because it means that someone has betrayed the Castello crime family. Whether it's someone trying to move in on their drug operation or the cops making their own statement, he doesn't know, but he wants to stay far away from it all. After all, years ago Bechet himself walked away from the Castelllos with enough inside information to hold over their heads and to keep himself safe, then went underground. He doesn't want to get anywhere near them now but soon discovers that he can't remain indifferent---first it seems one of his friends has gotten involved in the fringes of this battle, and then the larger picture becomes clear: Jorge Castello himself wants Bechet to find out who's behind the killings, claiming there's a traitor in the family. The last thing Bechet wants to do is work for the Castelllos again, but he knows he has to find a way to finish it somehow. Between Bechet and Tommy Miller, a retired P.I. whose ex-girlfriend has also gotten too close to the Castelllos and whose father was one of their casualties a few years back, all the loose ends will be tied up---one way or another---before the end of twenty-four hours. Once again Daniel Judson shines an unforgiving light on the darkest parts of the Hamptons and delivers a powerful, unforgettable read paced at breakneck speed.
