Core Bank Processing | CSI

Core banking solutions (CBS) are the bank's centralised systems that are responsible for

ensuring seamless workflow by automating the frontend and backend processes within a bank. CBS enables single-view of customer data across all branches in a bank and thus facilitate information across the delivery channels.

Top 25 core banking software companies and systems

An ideal Core banking solution is a solution where products, processes, channels, customer information and

management tools are integrated and administered through a central database of the bank with branches and channels as delivery points. This helps in achieving economies of scale by data integration for various purposes such as cross selling, CRM, Regulatory Reporting and internal MIS.

Best Banking Systems Software 2020 | Reviews of the Most ...

Gartner defines a core banking system (CBS) as a back-end system that processes daily banking transactions and posts updates to accounts and

other financial records. CBSs typically include deposit, loan and credit processing capabilities, with interfaces to general ledger systems and reporting tools.
