This is the full Mueller Report, as released on April 18, 2019, by the U.S. Department of Justice. A reprint of the report exactly as it was issued by the government, it is without analysis or commentary from any other source and with nothing subtracted except for the material redacted by the Department of Justice. The mission of the Mueller investigation was to examine Russian

interference in the 2016 Presidential election, consisting of possible links, or "collusion," between the Donald Trump campaign and the Russian government of Vladimir Putin as well as any allegations of obstruction of justice in this regard. It was also intended to detect and prosecute, where warranted, any other crimes that surfaced during the course of the investigation. The report consists of a detailed summary of the various investigations and inquiries that the Special Counsel and colleagues carried out in these areas. The investigation was initiated in the aftermath of the firing of FBI Director James Comey by Donald Trump on May 9, 2017. The FBI, under Director Comey, had already been investigating links between Russia and the Trump campaign. Mueller submitted his report to Attorney General William Barr on March 22, 2019, and the Department of Justice released

the redacted report one month later.

Criminal Litigation offers a comprehensive and practical guide to the areas of criminal litigation covered on the Legal Practice Course. Making effective use of realistic case studies backed up by online documentation, the text combines theory with practical considerations and encourages students to focus on putting their knowledge into a practical context. Written in an informal and accessible style, it covers all procedural and evidential issues that arise in criminal cases. The more complex areas of criminal litigation are examined using numerous diagrams, flowcharts and examples, while potential changes in the law are highlighted by specially designed 'Looking Ahead' boxes. Chapters end with key points summaries and self-test questions, enabling students to quickly sum up what they have read and test their own knowledge. The

comprehensive Online Resource Centre offers vital support to students throughout their course. Updates are freely accessible to enable students to keep up to date with developments in the field, while links to other useful websites and legislation encourage students to explore the subject area fully. Additional online chapters exploring the practice and dynamics of police station practice, regulatory crime, and sentencing in road traffic accidents are included for students interested in pursuing specialist areas of accreditation. An interactive timeline distinguishing between the three classifications of offences (summary-only, either-way and indictable-only) helps students to see how the whole criminal litigation process fits together and the issues that they need to bear in mind at particular points. Lecturers are able to access video clips of fictional but realistic court proceedings that follow the case studies included in the text; documentation supporting these case studies is also provided via the site. Additional videos cover the procedure at the police station and sentencing in the Crown Court. Online Resource Centre Answers to self-test

Evidence: Cases, Commentary, and Problems offers comprehensive coverage of the topics and concepts central to evidence law, while remaining concise enough to cover in a four-unit course. Organized around the Federal Rules of Evidence, with carefully edited cases, thought-provoking problems, and a wide variety of secondary material, this casebook gives students a solid foundation in the principles and debates surrounding evidence law without the confusion of more encyclopedic approaches. The Third Edition includes new materials and cases reflecting developments in privilege and physical evidence, confrontation clause jurisprudence, and technical and jurisprudential developments in scientific proof. New problems and cases have been added throughout, with older ones still available on the website for quick reference. Features: Comprehensive coverage of all subjects traditionally covered in evidence courses, as well as areas of emerging debate. Well-selected, tightly edited cases illustrate the central concepts and controversies of the law rather than attempting encyclopedic coverage. Carefully selected

problems--some hypothetical and some based on actual cases allow students to test their understanding of particularly confusing rules. Compelling excerpts from treatises and law review articles; portions of the legislative history of the Rules, particularly the Advisory Committee Notes; and congressional reports and floor debates augment the cases. Thoughtful organization of the material is based on the Federal Rules of Evidence and leverages the Rules as a teaching tool. Chapter 1 provides the background knowledge assumed in most discussions of evidence law, including judicial opinions, the Federal Rules of Evidence, and the Legislative History of the Rules. Short enough to teach cover-to-cover in a four-unit course. Thoroughly updated, the revised Third Edition presents: New material reflecting developments in confrontation clause jurisprudence, especially as relates to *Melendez-Diaz v. Massachusetts* and *Michigan v. Bryant*. New material on privilege and physical evidence. Numerous new cases added, with older ones moved to the website. Revised material to reflect technical and jurisprudential developments in the field of scientific proof. More problems to challenge students.

Scores of talented and dedicated people serve
the forensic science community, performing
vitaly important work. However, they are

officials, enhancing homeland security, and
reducing the risk of wrongful conviction and

the United States** gives a full account of what is

disciplines, including upgrading of systems and
organizational structures, better training,
