Using alignment

guides. You can align objects interactively on the drawing page by using alignment guides. Alignment guides are temporary guidelines that appear when you create, resize, or move objects in

relation to other nearby objects. Setting up and using guidelines - CorelDRAW X3 - CorelDRAW ...
If I change the page layout to 'facing pages',

the guidelines I have created do not move with the page background, unlike the preset guidelines. Is there an option that allows custom guidelines to behave in a similar way to the presets and move automatically with the page layout?

CorelDRAW: Graphic Design, Illustration and Technical Software

There are 2 options when working with images in CorelDRAW, embedding and using live trace. In

both cases images need to be at least 300 dpi and in grayscale. We recommend you carry out any image editing in photoshop or Gimp or any other image editing software. Select *File*>*Import* from the top menu [Guidelines and differently oriented pages - CorelDRAW X6](#)

There are two types of preset guidelines: Corel presets and user-defined presets. Examples of Corel presets include guidelines that appear at 1-inch margins and guidelines that appear at

newsletter column borders. User-defined presets are guidelines whose location you specify.

This could sound as stupid question... as I am a long time user... but in CorelDraw x7 I can't create a shortcut for "snap to object" and "snap to guidelines" command. In all previous versions I could find the "snap to object" command in Tools> Customization> Commands and just attach any combination of keys as shortcut to it.

(1) X3 is setup (by me) to have the lines I draw snap to the guidelines. Sometimes the lines I draw are close together and when I try to put the guidelines close together they try and snap together. This never happened on Corel 11 so I don't know how to fix it. (2) When setting the horizontal guidelines, I have noticed that they move ever so ... [Corel Draw Guidelines](#)

1. Click View Guidelines setup.
2. In the Guidelines list of categories, click Guides.
3. From the Specify list box, choose one of the following:
• 2 points — lets you specify two points to be joined to create a guideline
• Angle and 1 point — lets you specify one point and an angle. The guideline crosses through the point

at the angle specified.
