No other generation in history has received as much coverage as the Millennial generation. Books, Google searches, blogs, and news articles are everywhere about them. Yet, Generation Z is comprised of our youth and young adults today and has received very little attention comparatively. Those in Generation Z are among our youngest consumers, students, colleagues, constituents, voters, and neighbors. Being able to better understand who they are and how they see the world can be helpful in effectively working with, teaching, supervising, and leading them. *Generation Z: A Century in the Making* offers insight into nearly every aspect of the lives of those in Generation Z, including a focus on their career aspirations, religious beliefs and practices, entertainment and hobbies, social concerns, relationships with friends and family, health and wellness, money management, civic engagement, communication styles, political ideologies, technology use, and educational preferences. Drawing from an unprecedented number of studies with higher education research institutions, market research firms such as Pew and Census, other generational researchers and industry leaders, this is the authoritative defining work on Generation Z that market researchers, consumer behaviour specialists, and employers sorely need — and it is a fascinating read for anyone interested in the sociology of generations.

**Manual for Theory and Practice of Counseling and Psychotherapy, Second Edition** Amer Counseling Assn

This edited volume comprehensively examines the critical ethical challenges that arise in the practice of counseling and psychotherapy. It translates philosophical positions and professional ethical guidelines in a way that can be applied to practice. The various chapters focus on specific ethical issues that emerge in working with a range of different client groups; for example, children, couples and families. While some ethical imperatives are common across the board, others could be more closely associated with certain client groups. Practitioners might experience uncertainty in working with vulnerable client groups; for example, lesbian/gay/transgender/intersex (LGBT) clients, or persons who report intimate partner violence. Several chapters raise questions, provide information and additional resources to enhance ethically informed practice. Chapter contributions also highlight the ethical dilemmas that might be unique to certain contexts; for example, private practice, schools and consultation-liaison settings. This volume also addresses contemporary and relatively less understood playing fields like 'digital ethics' related to therapist-client interface in the internet space and the navigation of ethical

dilemmas in the newly emerging field of employee assistance programmes which address mental health needs in the corporate sector. Written by experienced practitioners of psychotherapy, and culturally contextualized, this is a valuable resource for academics and practitioners interested in psychotherapy and counselling.
