You may not realize it but simple, irrelevant factors can have profound consequences on your decisions and behavior, often diverting you from your original plans and desires. *Sidetracked* will help you identify and avoid these influences so the decisions you make do stick—and you finally reach your intended goals. Psychologist and Harvard Business School professor Francesca Gino has long studied the factors at play when judgment and decision making collide with the results of our choices in real life. In this book she explores inconsistent decisions played out in a wide range of circumstances—from our roles as consumers and employees (what we buy, how we manage others) to the choices that we make more broadly as human beings (who we date, how we deal with friendships). From Gino's research, we see when a mismatch is most likely to occur between what we want and what we end up doing. What factors are likely to sway our decisions in directions we did not initially consider? And what can we do to correct for the subtle influences that derail our decisions? The answers to these and similar questions will help you negotiate similar factors when faced with them in the real world. For fans of Dan Ariely and Daniel Kahneman, this book will help you better understand the nuances of your decisions and how they get derailed—so you have more control over keeping them on track.

Springer Nature

This comprehensive book focuses on how the COVID-19 pandemic is transforming travel and tourism, globally. Despite the devastation caused by COVID-19, authors argue that within the ongoing crisis, there is also an opportunity to positively transform the tourism sector in ways that contribute to a more hopeful future for tourism practitioners, tourists and host communities. As the world emerges from the shadow of COVID-19 there will not be a return to the "normal". Rather, the volume shares a vision of global transformation that is driven at least in part by the changing ways people in the post-COVID-19 era may travel and encounter each other and their environments. Individual chapters explore topics such

as: regenerative economies, transformational travel, critical perspectives on pandemics and tourism, sustainable development and resilience post-COVID-19, re-discovering and re-localising tourism, global (im)mobilities, transforming tourism management, as well as new value systems for travel and tourism including the chance to strengthen social equity and social justice as tourism returns after COVID-19. In this edited volume, a series of senior and emerging scholars engage with debates on how to best contribute to more substantial, meaningful, and positive planetary shifts within the tourism industry. The chapters in this book were originally published as a special issue of the journal *Tourism Geographies*.

Sidetracked PublicAffairs

Any organization worth its salt would have a thriving story to tell. The COVID-19 pandemic has brought incredibly disruptive challenges to organizations worldwide. Lest be labeled as wanting because of the magnitude of the problems that beset, business and educational organizations must take it upon themselves to discover and present to the world the novel management practices that arose out of the problems that these organizations have experienced. This book provides management cases that deal with the organization's implicit challenges and, at the same time, the best practices that have positively affected the growth of the business or organizational enterprise. Educators and trainers of today will benefit from this book in their teaching of management cases. The book integrates global issues with a local flair to provide practical experiences in various business and educational settings during the pandemic. The cases include scope within change management, organizational development, human resource management, organizational behavior, corporate social responsibility, innovation, sustainability, educational management, supply chain management, business ethics, and strategic management.

Harvard Business Press

Lead your business through the crisis. As the pandemic is exacting its toll on our lives and wreaking havoc in the global economy, HBR is helping companies and managers make sense of this unprecedented situation and lead employees through it. What should you and your company be doing right now to counter these challenges? *Coronavirus and Business: The Insights You Need from Harvard Business Review* is a compilation of sixteen recent articles from HBR.org. It provides you with essential thinking about keeping your company running remotely, managing your business through disaster and recovery, and finding it within yourself to lead with resilience through the crisis. Business is changing. Will you adapt or be left behind? Get up to speed and deepen your

understanding of the topics that are shaping your company's future with the Insights You Need from Harvard Business Review series. Featuring HBR's smartest thinking on fast-moving issues--blockchain, cybersecurity, AI, and more--each book provides the foundational introduction and practical case studies your organization needs to compete today and collects the best research, interviews, and analysis to get it ready for tomorrow. You can't afford to ignore how these issues will transform the landscape of business and society. The Insights You Need series will help you grasp these critical ideas--and prepare you and your company for the future.

Financial Transformations Beyond The Covid-19 Health Crisis IGI Global
The European Foundation for Management Development (EFMD) is the largest international accreditation body for business schools, with more than 950 members across 92 countries, including the world's highest-ranked schools. A not-for-profit, mission-led institution, the EFMD plays a central role in shaping a global approach to management education, emphasizing the development of socially responsible leaders. As part of EFMD's fiftieth anniversary celebrations, its President, Professor Eric Cornuel, has edited this volume, featuring contributions from leaders in management education, including the presidents and deans of the top business schools from across the world. Each contribution will address the challenges and dilemmas facing business schools today, with respect to four key themes: the 'higher purpose' of business schools; the social impact of business schools; the internationalization of business schools; and crisis management within business schools, with a special focus on the impact of COVID-19. This volume is also available via Open Access.

Sweet Spot Legare Street Press

A healthy building does more than conserve resources: it improves the health and productivity of the people inside. Joseph Allen and John Macomber look at everything from the air we breathe to the water we drink to how light, sound, and materials impact our performance and wellbeing and drive business profit.

Can Latin American Firms Compete? Notion Press

This open access edited volume is a comparative effort to discern the short-term educational impact of the covid-19 pandemic on students, teachers and systems in Brazil, Chile, Finland, Japan, Mexico, Norway, Portugal, Russia, Singapore, Spain, South Africa, the United Kingdom and the United States. One of the first academic comparative studies of the educational impact of the pandemic, the book explains how the interruption of in person instruction and the variable efficacy of alternative forms of education caused learning loss and disengagement with learning, especially for disadvantaged students. Other direct and indirect impacts of the pandemic diminished the ability of families to support children and youth in their education. For students, as well as for teachers and school staff, these included the economic shocks experienced by families, in some cases leading

to food insecurity and in many more causing stress and anxiety and impacting mental health. Opportunity to learn was also diminished by the shocks and trauma experienced by those with a close relative infected by the virus, and by the constraints on learning resulting from students having to learn at home, where the demands of schoolwork had to be negotiated with other family necessities, often sharing limited space. Furthermore, the prolonged stress caused by the uncertainty over the resolution of the pandemic and resulting from the knowledge that anyone could be infected and potentially lose their lives, created a traumatic context for many that undermined the necessary focus and dedication to schoolwork. These individual effects were reinforced by community effects, particularly for students and teachers living in communities where the multifaceted negative impacts resulting from the pandemic were pervasive. This is an open access book.

Engaging the private health service delivery sector through governance in mixed health systems Routledge

Coronavirus: Leadership and Recovery: The Insights You Need from Harvard Business Review Harvard Business Press

Corona Beer (A) World Scientific

Since the outbreak of SARS-CoV-2, a number of attempts have been made by experts, researchers and the political elite to explain away its origin, transmission, intent and impact. There is also the explosion of conspiracy theories of which states, researchers, international and corporate entities, the UN, the World Bank, philanthropists and even the Papacy have not been spared. The viral outbreak is even perceived as an attempt by the powerful not only to reduce global population but to expand their control of the world. The book has been written to expand the understanding of the reader on these critical issues about SARS-CoV-2 which have become very concerning.

Innovation Management IGI Global

The COVID-19 pandemic has permanently changed lives around the world and no dimension of life and leadership seems to have been spared from its wrath. It has also stirred us into thinking about novel approaches to lead organizations and societies toward a shared, sustainable future. This book offers novel perspectives on leadership and change management after the COVID-19 pandemic that take us beyond striving for thriving--perspectives that are grounded in emergent theory, research and practice. It highlights sustainable leadership and change management strategies to effectively deal with unpredictable and rapidly changing situations--particularly in a world that is increasingly volatile, uncertain, complex, and ambiguous (VUCA). This book also highlights engaging perspectives by specialists from different disciplines such as business, psychology, education, and health care. It serves as a practical guide in identifying and responding to leadership challenges and opportunities in each of the four VUCA categories of volatility, uncertainty, complexity, and ambiguity--and how they affect businesses, organizations, and societies as a whole.

We the Possibility Springer Nature

A ground-breaking exploration of the changing nature of trust and how to bridge the gap from where you are to where you need to be. Trust is the most powerful force underlying the success of every business. Yet it can be shattered in an instant, with a devastating impact on a company's market cap and reputation. How to build and sustain trust requires fresh insight into why customers, employees, community members, and investors decide whether an organization can be trusted. Based on two decades of research and illustrated through vivid storytelling, Sandra J. Sucher and Shalene Gupta examine the economic impact of trust and the science behind it, and conclusively prove that trust is built from the inside out. Trust emerges from a company being the "real deal": creating products and services that work, having good intentions, treating people fairly, and taking responsibility for all the impacts an organization creates, whether intended or not. When trust is in the room, great things can happen. Sucher and Gupta's innovative foundation for executing the elements of trust—competence, motives, means, impact—explains how trust can be woven into the day-to-day and the long term. Most importantly, even when lost, trust can be regained, as illustrated through their accounts of companies across the globe that pull themselves out of scandal and corruption by rebuilding the vital elements of trust.

Coronavirus and Business: The Insights You Need from Harvard Business Review Harvard Business Press

"Iconic brands" (ie: Coca-Cola, Volkswagon, Corona) have social lives and cultural significance that go well beyond product benefits and features. This book distills the strategies used to create the world's most enduring brands into a new approach called "cultural branding". Brand identity is more critical than ever today, as more and more products compete for attention across an ever-increasing array of channels. This book offers marketers and managers an alternative to conventional branding strategies, which often backfire when companies attempt to create identity brands.

How Brands Become Icons Hachette UK

Best-selling author Cass R. Sunstein examines how to avoid worst-case scenarios. The world is increasingly confronted with new challenges related to climate change, globalization, disease, and technology. Governments are faced with having to decide how much risk is worth taking, how much destruction and death can be tolerated, and how much money should be invested in the hopes of avoiding catastrophe. Lacking full information, should decision-makers focus on avoiding the most catastrophic outcomes? When should extreme measures be taken to prevent as much destruction as possible? *Averting Catastrophe* explores how governments ought to make decisions in times of imminent disaster. Cass R. Sunstein argues that using the "maximin rule," which calls for choosing the approach that eliminates the worst of the worst-case scenarios, may be necessary when public

officials lack important information, and when the worst-case scenario is too disastrous to contemplate. He underscores this argument by emphasizing the reality of "Knightian uncertainty," found in circumstances in which it is not possible to assign probabilities to various outcomes. Sunstein brings foundational issues in decision theory in close contact with real problems in regulation, law, and daily life, and considers other potential future risks. At once an approachable introduction to decision-theory and a provocative argument for how governments ought to handle risk, *Averting Catastrophe* offers a definitive path forward in a world rife with uncertainty.

Disruption Amplified Springer Nature

Can we solve big public problems anymore? Yes, we can. This provocative and inspiring book points the way. The huge challenges we face are daunting indeed: climate change, crumbling infrastructure, declining public education and social services. At the same time, we've come to accept the sad notion that government can't do new things or solve tough problems—it's too big, too slow, and mired in bureaucracy. Not so, says former public official, now Harvard Business School professor, Mitchell Weiss. The truth is, entrepreneurial spirit and savvy in government are growing, transforming the public sector's response to big problems at all levels. The key, Weiss argues, is a shift from a mindset of Probability Government—overly focused on safe solutions and mimicking so-called best practices—to Possibility Government. This means public leadership and management that's willing to boldly imagine new possibilities and to experiment. Weiss shares the three basic tenets of this new way of governing: Government that can imagine: Seeing problems as opportunities and involving citizens in designing solutions. Government that can try new things: Testing and experimentation as a regular part of solving public problems. Government that can scale: Harnessing platform techniques for innovation and growth. The lessons unfold in the timely episodes Weiss has seen and studied: the US Special Operations Command prototyping of a hoverboard for chasing pirates; a heroin hackathon in opioid-ravaged Cincinnati; a series of experiments in Singapore to rein in Covid-19; among many others. At a crucial moment in the evolution of government's role in our society, *We the Possibility* provides inspiration and a positive model, along with crucial guardrails, to help shape progress for generations to come.

Manufacturing Government Communication on Covid-19 Harvard Business Press

Over a decade ago, renowned innovation expert Rosabeth Moss Kanter co-founded and then directed Harvard's Advanced Leadership Initiative. Her breakthrough work with hundreds of successful professionals and executives, as well as aspiring young entrepreneurs, identifies the leadership paradigm of the future: the ability to "think outside the building" to overcome establishment paralysis and produce significant innovation for a better world. Kanter provides extraordinary accounts of the successes and near-stumbles of purpose-driven men and women from diverse backgrounds united in their conviction that positive

change is possible. A former Trader Joe's executive, for example, navigated across business, government, and community sectors to deal with poor nutrition in inner cities while reducing food waste. A concerned European banker used the power of persuasion, not position, to find novel financing for improving the health of the oceans. A Washington couple enticed global partners to join an Uber-like platform to match skilled refugees with talent-hungry companies. A visionary journalist-turned-entrepreneur closed social divides by giving fifty million social media users access to free local education and culture. When traditional approaches are inadequate or resisted, advanced leadership skills are essential. In this book, Kanter shows how people everywhere can unleash their creativity and entrepreneurial adroitness to mobilize partners across challenging cultural, social, and political situations and innovate for a brighter future.

Management Cases Psychology Press

Topics include work-integrated learning (internships), student well-being, and students with disabilities. Also, it explores the impact on assessments and academic integrity and what analysis of online systems tells us. Preface

ix Section I: Introduction

The Future of Service Post-COVID-19 Pandemic, Volume 2 OUP Oxford
This work has been selected by scholars as being culturally important and
is part of the knowledge base of civilization as we know it. This work is
in the public domain in the United States of America, and possibly other
nations. Within the United States, you may freely copy and distribute this
work, as no entity (individual or corporate) has a copyright on the body of
the work. Scholars believe, and we concur, that this work is important
enough to be preserved, reproduced, and made generally available to the
public. To ensure a quality reading experience, this work has been

proofread and republished using a format that seamlessly blends the original
graphical elements with text in an easy-to-read typeface. We appreciate your
support of the preservation process, and thank you for being an important
part of keeping this knowledge alive and relevant.

Edge Springer Nature

In many discussions of globalization and growth, attention
focuses on Asia, notably China, South Korea, and India. In
contrast, 'Can Latin American Firms Compete?' looks at business
developments in another key emerging market region, Latin
America. It examines the success and failure that Latin American
firms have met with, in their own markets and elsewhere in the
world, the reasons behind these outcomes, and these firms' future
prospects. Including contributions from leading international
experts on business in Latin America, the book draws on concepts
from organization theory, industrial organization, economics,
marketing, sociology, and political science. It includes sections
on broad themes of competitiveness in Latin America, micro-level
strategies of firms in specific sectors, the competitiveness of
firms in specific countries, and competing in emerging markets.
Cases examined range in size and sector, and include some of the
largest firms in Latin America, such as as Embraer in Brazil,
Quiñenco (Luksic) in Chile, Techint in Argentina, Grupo Carso in
Mexico, Cisneros in Venezuela, and Grupo Empresarial Antioqueño
in Colombia. This well-informed book will be essential reading
for academics, policy-makers, and those with a serious interest
in business development in Latin America.

The Power of Trust Harvard Business Press

This book explores the innovations, disruptions and changes that are
required to adapt in a fast-evolving landscape due to the
extraordinary circumstances triggered by the COVID-19 pandemic.
Recognized experts from around the world share their research and
professional experience on how the working environment, as well as the
world around them, have changed due to the pandemic. Chapters consider
how different fields across technology and business have been affected
by this new, dramatic scenario and the drastic consequences that the
pandemic had on them. With diverse contributions stemming from public
health, technology strategies, urban planning and sociology to
sustainable management, this volume is articulated into four distinct
but complementary sections of People, Process, Planet, and Prosperity
influencing the post-COVID world. This book will be of great interest
to those in the fields of computer science and information technology,
as well as those studying the impact and effects that COVID-19 is
having on society.

Handbook of Research on Using Global Collective Intelligence and

Creativity to Solve Wicked Problems Informing Science

This book consolidates international, contemporary and topical case study based research in tourism, travel, hospitality and events. Case studies can make learning more attractive and interesting as well as enable students to understand the theory better and develop their analytical and problem-solving skills. Using industry as an open living lab, case study based research infuses scholars into real-world industry challenges and inspires them to theorise and advance our knowledge frontiers. The book includes international case studies that can help tourism scholars build and advance (new) theories and enrich their educational practices. Case studies are accompanied with a teaching note guiding scholars to integrate case studies into instruction. Dr Kirsten Holmes, Chair, Council for Australasian Tourism and Hospitality Education (CAUTHE) There is a vital need for contemporary and well-structured case studies for use in tourism teaching. By including case studies from Australasia and key destination regions in Asia, Europe, and the Caribbean, the book is helpful for tertiary teachers globally. Professor Xander Lub, President, EuroCHRIE The book inspires educators and students. The cases provide context to students learning and demonstrate the richness and variation of the industry. The book also clearly demonstrates how research can inform our teaching. Professor Brian King, Chair, THE-ICE Assessment Panel The book includes cases under five themes: experiences, operations, technologies, strategy and marketing, and destinations. The book provides subject lecturers with a structure to guide students of applying theory into practice. Dr Paul Whitelaw, Academic Director, Southern Cross University This book marks a significant contribution to hospitality, tourism and events pedagogy at undergraduate and postgraduate level. At a time when the industry is demanding that our graduates have a strong grasp of "real world issues", the case study approach provides an accessible, meaningful and relatable means by which students can engage in real world issues.
