The US Department of Justice's National Institute of Justice (NIJ) asked the Institute of Medicine (IOM) of The National Academies to conduct a workshop that would examine the interface of the medicolegal death investigation system and the criminal justice system. NIJ was particularly interested in a workshop in which speakers would highlight not only the status and needs of the medicolegal death investigation system as currently administered by medical examiners and coroners but also its potential to meet emerging issues facing contemporary society in America. Additionally, the workshop was to highlight priority areas for a potential IOM study on this topic. To achieve those goals, IOM constituted the Committee for the Workshop on the Medicolegal Death Investigation System, which developed a workshop that focused on the role of the medical examiner and coroner death investigation system and its promise for improving both the criminal justice system and the public health and health care systems, and their ability to respond to terrorist threats and events. Six panels were formed to highlight different aspects of the medicolegal

death investigation system, including ways to improve it and expand it beyond its traditional response and meet growing demands and challenges. This report summarizes the Workshop presentations and discussions that followed them.

**BESTSELLER** • In April 1992 a young man from a well-to-do family hitchhiked to Alaska and walked alone into the wilderness north of Mt. McKinley. Four months later, his decomposed body was found by a moose hunter. This is the unforgettable story of how Christopher Johnson McCandless came to die. "It may be nonfiction, but *Into the Wild* is a mystery of the highest order."

—Entertainment Weekly  
McCandless had given \$25,000 in savings to charity, abandoned his car and most of his possessions, burned all the cash in his wallet, and invented a new life for himself. Not long after, he was dead. *Into the Wild* is the mesmerizing, heartbreaking tale of an enigmatic young man who goes missing in the wild and whose story captured the world's attention. Immediately after graduating from college in

1991, McCandless had roamed through the West and Southwest on a vision quest like those made by his heroes Jack London and John Muir. In the Mojave Desert he abandoned his car, stripped it of its license plates, and burned all of his cash. He would give himself a new name, Alexander Supertramp, and, unencumbered by money and belongings, he would be free to wallow in the raw, unfiltered experiences that nature presented. Craving a blank spot on the map, McCandless simply threw the maps away. Leaving behind his desperate parents and sister, he vanished into the wild. Jon Krakauer constructs a clarifying prism through which he reassembles the disquieting facts of McCandless's short life. Admitting an interest that borders on obsession, he searches for the clues to the drives and desires that propelled McCandless. When McCandless's innocent mistakes turn out to be irreversible and fatal, he becomes the stuff of tabloid headlines and is dismissed for his naiveté, pretensions, and hubris. He is said to have had a death wish but wanting to die is a very different thing from being compelled to look

over the edge. Krakauer brings McCandless's uncompromising pilgrimage out of the shadows, and the peril, adversity, and renunciation sought by this enigmatic young man are illuminated with a rare understanding—and not an ounce of sentimentality. Into the Wild is a tour de force. The power and luminosity of Jon Krakauer's stoytelling blaze through every page.

"An inventive plot and incisive character studies elevate MWA Grand Master Grafton's twenty-fourth Kinsey Millhone novel...This superior outing will remind readers why this much-loved series will be missed as the end of the alphabet approaches."—Publishers Weekly (starred review) X: The number ten. An unknown quantity. A mistake. A cross. A kiss... Perhaps Sue Grafton's darkest and most chilling novel, X features a remorseless serial killer who leaves

no trace of his crimes. Once again breaking the rules and establishing new paths, Grafton wastes little time identifying this deadly sociopath. The test is whether private investigator Kinsey Millhone can prove her case against him—before she becomes his next victim.

Everyone in Painters Mill knows the abandoned Hochstetler farm is haunted. But only a handful of the residents remember the terrible secrets lost in the muted/hushed whispers of time—and now death is stalking them, seemingly from the grave. On a late-night shift, Chief of Police Kate Burkholder is called to the scene of an apparent suicide—an old man found hanging from the rafters in his dilapidated barn. But evidence quickly points to murder and Kate finds herself chasing a singularly difficult and elusive trail of evidence that somehow points back to the tragedy of that long ago incident. Meanwhile, Kate has moved in with state agent John Tomasetti and for the first time in so long, they're both happy; a bliss quickly shattered when one of the men responsible for the

murders of Tomasetti's family four years ago is found not guilty, and walks away a free man. Will Tomasetti be pulled back to his own haunted past? When a second man is found dead—also seemingly by his own hand—Kate discovers a link in the case that sends the investigation in a direction no one could imagine and revealing the horrifying truth of what really happened that terrible night thirty-five years ago, when an Amish father and his four children perished—and his young wife disappeared without a trace. And, as Kate knows—the past never truly dies . . . in *The Dead Will Tell* by Linda Castillo

Now updated with new material that brings the killer's picture into clearer focus. In the fall of 1888, all

of London was held in the grip of unspeakable terror. An elusive madman calling himself Jack the Ripper was brutally butchering women in the slums of London's East End. Police seemed powerless to stop the killer, who delighted in taunting them and whose crimes were clearly escalating in violence from victim to victim. And then the Ripper's violent spree seemingly ended as abruptly as it had begun. He had struck out of nowhere and then vanished from the scene. Decades passed, then fifty years, then a hundred, and the Ripper's bloody sexual crimes became anemic and impotent fodder for puzzles, mystery weekends, crime conventions, and so-called "Ripper Walks" that end with pints of ale in the pubs of Whitechapel. But to number-one New York Times bestselling novelist Patricia Cornwell, the Ripper murders are not cute little mysteries to be transformed into parlor games or movies but rather a series of terrible crimes that no one should get away with, even after death. Now Cornwell applies her trademark skills for meticulous research and scientific expertise to dig deeper into the Ripper case than any detective before her—and reveal the true identity of this fabled Victorian killer. In *Portrait of a Killer: Jack the Ripper, Case Closed*, Cornwell combines the rigorous discipline of twenty-first century police investigation with forensic techniques undreamed of during the late Victorian era to solve one of the most infamous and difficult serial murder cases in history. Drawing on unparalleled access to original Ripper evidence, documents, and records, as well as archival, academic, and law-

enforcement resources, FBI profilers, and top forensic scientists, Cornwell reveals that Jack the Ripper was none other than a respected painter of his day, an artist now collected by some of the world's finest museums: Walter Richard Sickert. It has been said of Cornwell that no one depicts the human capability for evil better than she. Adding layer after layer of circumstantial evidence to the physical evidence discovered by modern forensic science and expert minds, Cornwell shows that Sickert, who died peacefully in his bed in 1942, at the age of 81, was not only one of Great Britain's greatest painters but also a serial killer, a damaged diabolical man driven by megalomania and hate. She exposes Sickert as the author of the infamous Ripper letters that were written to the Metropolitan Police and the press. Her detailed analysis of his paintings shows that his art continually depicted his horrific mutilation of his victims, and her examination of this man's birth defects, the consequent genital surgical interventions, and their effects on his upbringing present a casebook example of how a psychopathic killer is created. New information and startling revelations detailed in *Portrait of a Killer* include: - How a year-long battery of more than 100 DNA tests—on samples drawn by Cornwell's forensics team in September 2001 from original Ripper letters and Sickert documents—yielded the first shadows of the 75- to 114 year-old genetic evid...

Four crime-solving friends face off against a killer in San Francisco in the Women's

Murder Club novel that started James Patterson's thrilling series. Each one holds a piece of the puzzle: Lindsay Boxer is a homicide inspector in the San Francisco Police Department, Claire Washburn is a medical examiner, Jill Bernhardt is an assistant D.A., and Cindy Thomas just started working the crime desk of the San Francisco Chronicle. But the usual procedures aren't bringing them any closer to stopping the killings. So these women form a Women's Murder Club to collaborate outside the box and pursue the case by sidestepping their bosses and giving each other a hand. The four women develop intense bonds as they pursue a killer whose crimes have stunned an entire city. Working together, they track down the most terrifying and unexpected killer they have ever encountered--before a shocking conclusion in which everything they knew turns out to be devastatingly wrong. Full of the breathtaking drama and unforgettable emotions for which James Patterson is famous, *1st to Die* is the start of the #1 New York Times bestselling series of crime thrillers.

The Lane Fleming collection of early pistols and revolvers was one of the best in the country. When Fleming was found dead on the floor of his locked gunroom, a Confederate-made Colt-type percussion .36 revolver in his hand, the coroner's verdict was "death by accident." But Gladys Fleming had her doubts. Enough at any rate to engage Colonel Jefferson Davis Rand—better known just as Jeff—private detective and a pistol-collector himself, to catalogue, appraise, and negotiate the sale of her late husband's collection.

For almost a century, New York City's Office of the Chief Medical Examiner has presided over the dead. Over the years, the OCME has endured everything-political upheavals, ghastly murders, bloody gang wars, the 9/11 terrorist attacks, and non-stop battles for power and influence-and remains the final authority in cases of sudden, unexplained, or violent death. Founded in 1918, the OCME has evolved over decades of technological triumphs and all-too human failure to its modern-day incarnation as the foremost forensics lab in the world, investigating an average caseload of over 15,000 suspicious deaths a year. This is the behind-the-scenes chronicle of public service and private vendettas, of blood in the streets and back-room bloodbaths, and of the criminal cases that made history and headlines.

There is no scientist in the world like Dr. Bill Bass. A pioneer in forensic anthropology, Bass created the world's first laboratory dedicated to the study of human decomposition—three acres of land on a hillside in Tennessee where human bodies are left to the elements. His research at "the Body Farm" has revolutionized forensic science, helping police crack cold cases and pinpoint time of death. But during a forensics career that spans half a century, Bass and his work have ranged far beyond the gates of the Body Farm. In this riveting book, the bone sleuth explores the rise of modern forensic science, using fascinating cases from his career to take readers into the real world of C.S.I. Some of Bill Bass's cases rely on the simplest of tools and techniques, such as reassembling—from battered torsos and a stack of severed limbs—eleven people hurled skyward by an explosion at an illegal fireworks factory. Other cases hinge on sophisticated techniques Bass could not have imagined when he began his career: harnessing scanning electron microscopy to detect trace elements in knife wounds; and extracting DNA from a long-buried corpse, only to find that the female

murder victim may have been mistakenly identified a quarter-century before. In *Beyond the Body Farm*, readers will follow Bass as he explores the depths of an East Tennessee lake with a twenty-first-century sonar system, in a quest for an airplane that disappeared with two people on board thirty-five years ago; see Bass exhume fifties pop star "the Big Bopper" to determine what injuries he suffered in the plane crash that killed three rock and roll legends on "the day the music died"; and join Bass as he works to decipher an ancient Persian death scene nearly three thousand years old. Witty and engaging, Bass dissects the methods used by homicide investigators every day, leading readers on an extraordinary journey into the high-tech science that it takes to crack a case.

*Coroner's Journal* Penguin From TV's CSI to bestsellers by Patricia Cornwell and Kathy Reichs, interest in forensics is at an all-time high. Now one of our most respected forensic pathologists gives a behind-the-scenes look at eleven of his most notorious cases, cracked by scientific analysis and Sherlock Holmesian deduction. As chief medical examiner of Rockland County, New York, for almost thirty-five years, Dr. Frederick Zugibe literally wrote the book on the subject—his widely used textbook is considered the definitive text. Over the years he has pioneered countless

innovations, including the invention of a formula to soften mummified fingers—enabling fingerprinting, and thus identification, of a long-deceased victim. He has appeared as an expert hundreds of times in the media and in the courtroom—and not once has a jury failed to accept his testimony over opposing expert witnesses. And now, in *Dissecting Death*, he has opened the door to the world of forensic pathology in all its gruesome and fascinating mystery. Dr. Zugibe takes us through the process all good pathologists follow, using eleven of his most challenging cases. With him, we visit the often grisly—though sometimes shockingly banal—crime scene. We inspect the body, palpate the wounds, search for clues in the hair and skin. We employ ultraviolet light, strange measuring devices, optical instruments. We see how a forensic pathologist determines the hour of death, the type of weapon used, the killer's escape route. And then we enter the lab, the world of high-tech criminal detection: DNA testing, fingerprinting, gunshot patterns, dental patterns, X-rays. But not every case ends in a conviction, and in a closing chapter Dr. Zugibe examines some recent high-profile cases in which blunders led to killers going free, either because the wrong party was brought to trial or because the evidence presented didn't do the trick—including Jon-Benet Ramsey's murder and, of course, the O.J. Simpson trial. Into the Wild Simon and Schuster Malcolm Gladwell, host of the podcast *Revisionist History* and author of the #1 New York Times bestseller *Outliers*, offers a

powerful examination of our interactions with strangers and why they often go wrong—now with a new afterword by the author. A Best Book of the Year: The Financial Times, Bloomberg, Chicago Tribune, and Detroit Free Press How did Fidel Castro fool the CIA for a generation? Why did Neville Chamberlain think he could trust Adolf Hitler? Why are campus sexual assaults on the rise? Do television sitcoms teach us something about the way we relate to one another that isn't true? Talking to Strangers is a classically Gladwellian intellectual adventure, a challenging and controversial excursion through history, psychology, and scandals taken straight from the news. He revisits the deceptions of Bernie Madoff, the trial of Amanda Knox, the suicide of Sylvia Plath, the Jerry Sandusky pedophilia scandal at Penn State University, and the death of Sandra Bland—throwing our understanding of these and other stories into doubt. Something is very wrong, Gladwell argues, with the tools and strategies we use to make sense of people we don't know. And because we don't know how to talk to strangers, we are inviting conflict and misunderstanding in ways that have a profound effect on our lives and our world. In his first book since his #1 bestseller *David and Goliath*, Malcolm Gladwell has written a gripping guidebook for troubled times.

*Gangbusters* Simon and Schuster

During Hurricane Katrina, Dr. Louis Cataldie remained in New Orleans in dangerous and often unbearable conditions to attend to the sick, the injured-and the dead. As chief coroner of Baton Rouge, tending to the dead is Cataldie's job. A little town with big-city problems, Baton Rouge means "Red Stick"-and lives up to its bloody name. Cataldie has faced unusual and disturbing cases, from tracking three serial killers on the loose simultaneously while working the scene of a Malvo/Muhammad Beltway Sniper shooting, to helping apprehend Baton Rouge serial killer Derrick Todd Lee in a controversial case that was featured in an ABC Primetime Live special with Diane Sawyer and Patricia Cornwell. Cataldie's maverick ways have made him a favorite target of the media, but he offers no apologies, and speaks for

those who cannot speak for themselves. Graphic and frank, this is his unique, up-close look at his life spent stalking death in the Deep South.
