debate. Public outrage drove politicians from all sides of politics to embrace gun control. Non-violent ‘people power’ galvanised government resolve to outlaw semi-automatic weapons, register all guns, and tighten gun ownership laws. Simon Chapman’s book gives an insider’s view of the struggle for gun control, highlighting the public discourse between shooters determined to preserve the right for civilians to bear military-style weapons, and activists dedicated to getting Australia ‘off the American path’ of gun violence. Law reform is not inevitable. It requires the planned, strategic use of media and advocacy to convert anger into action. The story of the campaign for gun control is a practical guide to achieving humane social change for activists everywhere.

From TV 's CSI to bestsellers by Patricia Cornwell and Kathy
Reichs, interest in forensics is at an all-time high. Now one of our
most respected forensic pathologists gives a behind-the-scenes look
at eleven of his most notorious cases, cracked by scientific analysis
and Sherlock Holmesian deduction. As chief medical examiner of
Rockland County, New York, for almost thirty-five years, Dr.
Frederick Zugibe literally wrote the book on the subject—his widely
used textbook is considered the definitive text. Over the years he has
pioneered countless innovations, including the invention of a
formula to soften mummified fingers—enabling fingerprinting, and
thus identification, of a long-deceased victim. He has appeared as an
expert hundreds of times in the media and in the courtroom—and
not once has a jury failed to accept his testimony over opposing
expert witnesses. And now, in *Dissecting Death*, he has opened the
door to the world of forensic pathology in all its gruesome and
fascinating mystery. Dr. Zugibe takes us through the process all good
pathologists follow, using eleven of his most challenging cases. With
him, we visit the often grisly—though sometimes shockingly
banal—crime scene. We inspect the body, palpate the wounds,
search for clues in the hair and skin. We employ ultraviolet light,
strange measuring devices, optical instruments. We see how a
forensic pathologist determines the hour of death, the type of
weapon used, the killer 's escape route. And then we enter the lab,

the world of high-tech criminal detection: DNA testing,
fingerprinting, gunshot patterns, dental patterns, X-rays. But not
every case ends in a conviction, and in a closing chapter Dr. Zugibe
examines some recent high-profile cases in which blunders led to
killers going free, either because the wrong party was brought to trial
or because the evidence presented didn 't do the trick—including
Jon-Benet Ramsey 's murder and, of course, the O.J. Simpson trial.

won't be able to resist the temptation of
believing that one of those skeletons might
be her daughter's. But that is only the
beginning of the killer's sadistic game. He
wants Eve one on one, and he'll use his ace

in the hole to make sure she complies. And he doesn't know. And because we don't know how to won't stop playing until he claims the prize he wants most: Eve's life.

The Education of a Coroner Penguin

Malcolm Gladwell, host of the podcast Revisionist History and author of the #1 New York Times bestseller *Outliers*, offers a powerful examination of our interactions with strangers and why they often go wrong—now with a new afterword by the author. A Best Book of the Year: The Financial Times, Bloomberg, Chicago Tribune, and Detroit Free Press How did Fidel Castro fool the CIA for a generation? Why did Neville Chamberlain think he could trust Adolf Hitler? Why are campus sexual assaults on the rise? Do television sitcoms teach us something about the way we relate to one another that isn't true? *Talking to Strangers* is a classically Gladwellian intellectual excursion through history, psychology, and scandals taken straight from the news. He revisits the deceptions of Bernie Madoff, the trial of Amanda Knox, the suicide of Sylvia Plath, the Jerry Sandusky pedophilia scandal at Penn State University, and the death of Sandra Bland—throwing our understanding of these and other stories into doubt. Something is very wrong, Gladwell argues, with the tools and strategies we use to make sense of people we

talk to strangers, we are inviting conflict and misunderstanding in ways that have a profound effect on our lives and our world. In his first book since his #1 bestseller *David and Goliath*, Malcolm Gladwell has written a gripping guidebook for troubled times.

During Hurricane Katrina, Dr. Louis Cataldie remained in New Orleans in dangerous and often unbearable conditions to attend to the sick, the injured—and the dead. As chief coroner of Baton Rouge, tending to the dead is Cataldie's job. A little town with big-city problems, Baton Rouge means "Red Stick"—and lives up to its bloody name. Cataldie has faced unusual and disturbing cases, from tracking three serial killers on the loose simultaneously while working the scene of a Malvo/ Muhammad Beltway Sniper shooting, to helping apprehend Baton Rouge serial killer Derrick Todd Lee in a controversial case that was featured in an ABC Primetime Live special with Diane Sawyer and Patricia Cornwell. Cataldie's maverick ways have made him a favorite target of the media, but he offers no apologies, and speaks for those who cannot speak for themselves. Graphic and frank, this is his unique, up-close look at his life spent stalking death in the Deep South.

There is no scientist in the world like Dr. Bill Bass. A pioneer in forensic anthropology, Bass created the world's first laboratory dedicated to the study of human decomposition—three acres of land on a hillside in Tennessee where human bodies are left to the elements. His research at "the Body Farm" has revolutionized forensic

science, helping police crack cold cases and pinpoint time of death. But during a forensics career that spans half a century, Bass and his work have ranged far beyond the gates of the Body Farm. In this riveting book, the bone sleuth explores the rise of modern forensic science, using fascinating cases from his career to take readers into the real world of C.S.I. Some of Bill Bass's cases rely on the simplest of tools and techniques, such as reassembling—from battered torsos and a stack of severed limbs—eleven people hurled skyward by an explosion at an illegal fireworks factory. Other cases hinge on sophisticated techniques Bass could not have imagined when he began his career: harnessing scanning electron microscopy to detect trace elements in knife wounds; and extracting DNA from a long-buried corpse, only to find that the female murder victim may have been mistakenly identified a quarter-century before. In *Beyond the Body Farm*, readers will follow Bass as he explores the depths of an East Tennessee lake with a twenty-first-century sonar system, in a quest for an airplane that disappeared with two people on board thirty-five years ago; see Bass

exhume fifties pop star "the Big Bopper" to determine what injuries he suffered in the plane crash that killed three rock and roll legends on "the day the music died"; and join Bass as he works to decipher an ancient Persian death scene nearly three thousand years old. Witty and engaging, Bass dissects the methods used by homicide investigators every day, leading readers on an extraordinary journey into the high-tech science that it takes to crack a case.

On the little-known and darker side of shamanism there exists an ancient form of sorcery called kanaimà, a practice still observed among the Amerindians of the highlands of Guyana, Venezuela, and Brazil that involves the ritual stalking, mutilation, lingering death, and consumption of human victims. At once a memoir of

cultural encounter and an ethnographic and historical investigation, this book offers a sustained, intimate look at kanaimà, its practitioners, their victims, and the reasons they give for their actions. Neil L. Whitehead tells of his own involvement with kanaimà—including an attempt to kill him with poison—and relates the personal testimonies of kanaimà shamans, their potential victims, and the victims' families. He then goes on to discuss the historical emergence of kanaimà, describing how, in the face of successive modern colonizing forces—missionaries, rubber gatherers, miners, and development agencies—the practice has become an assertion of native autonomy. His analysis explores the ways in which kanaimà mediates both national and international impacts on native peoples in the region and considers the significance of kanaimà for current accounts of shamanism and religious belief and for theories of war and violence. Kanaimà appears here as part of the wider lexicon of rebellious terror and exotic horror—alongside the cannibal, vampire, and zombie—that haunts the western imagination. *Dark Shamans* broadens discussions of

violence and of the representation of primitive savagery by recasting both in the light of current debates on modernity and globalization.

A Boston Globe Best Book of 2014 Everyone in Painters Mill knows the abandoned Hochstetler farm is haunted. But only a handful of the residents remember the terrible secrets lost in the muted/hushed whispers of time—and now death is stalking them, seemingly from the grave. On a late-night shift, Chief of Police Kate Burkholder is called to the scene of an apparent suicide—an old man found hanging from the rafters in his dilapidated barn. But evidence quickly points to murder and Kate finds herself chasing a singularly difficult and elusive trail of evidence that somehow points back to the tragedy of that long ago

incident. Meanwhile, Kate has moved in with state agent John Tomasetti and for the first time in so long, they're both happy; a bliss quickly shattered when one of the men responsible for the murders of Tomasetti's family four years ago is found not guilty, and walks away a free man. Will Tomasetti be pulled back to his own haunted past? When a second man is found dead—also seemingly by his own hand—Kate discovers a link in the case that sends the investigation in a direction no one could imagine and revealing the horrifying truth of what really happened that terrible night thirty-five years ago, when an Amish father and his four children perished—and his young wife disappeared without a trace. And, as Kate knows—the past never truly dies . . . in *The Dead Will Tell* by Linda Castillo

“Fun...and full of smart science. Fans of CSI—the real kind—will want to read it” (The Washington Post): A young forensic pathologist’s “rookie season” as a NYC medical examiner, and the hair-raising cases that shaped her as a physician and human being. Just two months before the September 11 terrorist attacks, Dr. Judy Melinek began her training as a New York City forensic pathologist. While her husband and their

toddler held down the home front, Judy threw herself into the fascinating world of death investigation—performing autopsies, investigating death scenes, counseling grieving relatives. *Working Stiff* chronicles Judy’s two years of training, taking readers behind the police tape of some of the most harrowing deaths in the Big Apple, including a firsthand account of the events of September 11, the subsequent anthrax bio-terrorism attack, and the disastrous crash of American Airlines Flight 587. An unvarnished portrait of the daily life of medical examiners—complete with grisly anecdotes, chilling crime scenes, and a welcome dose of gallows humor—*Working Stiff* offers a glimpse into the daily life of one of America’s most arduous professions, and the unexpected challenges of shuttling between the domains of the living and the dead. The body never lies—and through the murders, accidents, and suicides that land on her table, Dr. Melinek lays bare the truth behind the glamorized depictions of autopsy work on television to reveal the secret story of the real morgue. “Haunting and illuminating...the stories from her average workdays...transfix the reader with

their demonstration that medical science can diagnose and console long after the heartbeat stops" (The New York Times).
