## Fundamentals of Corporate Finance

McGraw-Hill Education Neoclassical Finance provides a concise and powerful account of the underlying principles of modern finance, drawing on a generation of theoretical and empirical advances in the field. Stephen Ross developed the no arbitrage principle, tying asset pricing to the simple proposition that there are no free lunches in financial markets, and jointly with John Cox he developed the related concept of risk-neutral pricing. In this book Ross

makes a strong case that these concepts are the fundamental pillars of modern finance and, in particular, of market efficiency. In an efficient market prices reflect the information possessed by the market and, as a consequence, trading schemes using commonly available information to beat the market are doomed to fail. By stark contrast, the currently popular stance offered by behavioral finance, fueled by a number of apparent anomalies in the financial markets, regards market prices as subject to the psychological whims of investors. But without any appeal to psychology, Ross shows that neoclassical theory provides a simple and rich explanation that resolves many of the anomalies on

which behavioral finance has been fixated. Based on the inaugural Princeton Lectures in Finance, sponsored by the Bendheim Center for Finance of Princeton University, this elegant book represents a major contribution to the ongoing debate on market efficiency, and serves as a useful primer on the fundamentals of finance for both scholars and practitioners.

*Fundamentals of Corporate Finance Alternate Edition* by Stephen A. Ross, ISBN 9780077479459 McGraw-Hill College

Fundamentals of

Investments was written to:

1. Focus on students as investment managers, giving them information they can act on instead of concentrating on theories and research without the proper context. 2. Offer strong, consistent pedagogy, including a balanced, unified treatment of the main types of financial investments as mirrored in the investment

world. 3. Organize topics in a way that makes them easy to apply--whether to a portfolio simulation or to real life--and support these topics with hands-on activities. The approach of this text reflects two central ideas. First, there is a consistent focus on the student as an individual investor or investments manager. Second, a consistent, unified treatment of the four basic types of financial instruments--stocks, bonds, options, and futures--focusing on their characteristics and features, their risks and returns, and the markets in which they trade.

Corporate Finance, by Ross, Westerfield, and Jaffe emphasizes the modern fundamentals of the theory of finance, while providing contemporary examples to make the theory come to life. The authors aim to present corporate finance as the working of a small number of integrated and powerful intuitions, rather than a collection of unrelated topics. They develop the central concepts of modern finance: arbitrage, net present value, efficient markets, agency theory, options, and the trade-off between risk and return, and use them to explain corporate finance with a balance of theory and application. The Tenth Edition includes many exciting new research findings as well as an enhanced Connect Finance, now with even more student learning resources. Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need, when they need it, and how they need it, so that your class time is more engaging and effective.

Ross, Essentials of Corporate Finance 10e focuses on what undergraduate students with widely varying backgrounds and interests need to take away from a core course in business or corporate finance. The goal is to convey the most important concepts and principles at a level that is approachable for the widest

possible audience. To achieve this goal, subjects are distilled down to the bare essentials, while retaining a decidedly modern approach to finance. In addition, understanding the "why" is just as important, if not more so, than understanding the "how" - especially in an introductory course. Readability and pedagogy are key throughout Essentials 10e. The text is written in a relaxed, conversational style that invites the students to join in the learning process rather than being a passive information absorber. The new edition downplays purely theoretical issues and minimises the use of extensive and elaborate calculations to illustrate points that are either intuitively obvious or of limited practical use. There are 3 basic themes visible throughout the book: emphasis on intuition/common sense, a unified valuation approach, and a managerial focus.

Fundamentals of Corporate Finance "The best-selling "Fundamentals of Corporate Finance" ("FCF") is written with one strongly held principle that corporate finance should be developed and taught in terms of a few integrated, powerful ideas. As such, there are three basic themes that are the central focus of the book: an emphasis on intuition-underlying ideas are discussed in general terms and then by way of examples that illustrate in more concrete terms how a financial manager might proceed in a given situation; a unified valuation approach-net present value (NPV) is treated as the basic concept underlying corporate finance. Every subject covered is

firmly rooted in valuation, and care is taken to explain how particular decisions have valuation effects; and a managerial focus - the authors emphasize the role of the financial manager as decision maker, and they stress the need for managerial input and judgment. The Eighth Edition continues the tradition of excellence that has earned "Fundamentals of Corporate Finance" its status as market leader. Every chapter has been updated to provide the most current examples that reflect corporate finance in today's world. The supplements package has also been updated and improved. From a new computerized test bank that is easier than ever to use, to new narrated PowerPoint for students, to new interactive learning modules, student and instructor support has never been stronger. There is also an optional, exciting new web-based program called "McGraw-Hill's Homework Manager" that will help your students learn corporate finance by duplicating problems from each chapter in the textbook and by providing automatic grading and feedback to both students and instructors."--Publisher's description.
