Corporate Security Management Routledge As the U.S. Army shrinks, a private army steps into the breach. A Bloody Business offers an unprecedented look behind the scenes and into the ranks of this mercenary force (numbering as many as 15,000 today) who guard supply convoys, train foreign soldiers, provide security for foreign leaders and

In the context of gun proliferation and persistent gun violence in the United States, a controversial security strategy has gained public attention: bulletproof fashion. This book examines concerns about security focusing on armored

clothing and accessories for civilians. Available for children and adults, such ballistic products include colorful backpacks, elegant suits, sports jackets, feminine dresses, trendy vests, and medical lab coats. These products are paradigmatic of a "fashion of fear"—the practice of outfitting the body with apparel aimed at maximizing personal security. This

fashion encourages the emergence of both a fortress body and an armored society. Sutton also explores the wider social factors influencing the bulletproof fashion phenomenon, including the inequalities associated with neoliberalism and the militarization of civilian life. The book sheds light on the role of emotions in relation to discourses and perceptions of

security, and encourages feminist and sociological studies to pay attention to the linkages between security, bodies, and dress. It is ideal for students and scholars interested in security and gun violence, culture and politics, neoliberalism and consumption, and bodies and emotions.
