
Corporations Are Not People Reclaiming Democracy From Big Money And Global Corporations

When somebody should go to the ebook stores, search introduction by shop, shelf by shelf, it is in reality problematic. This is why we give the ebook compilations in this website. It will no question ease you to see guide **Corporations Are Not People Reclaiming Democracy From Big Money And Global Corporations** as you such as.

By searching the title, publisher, or authors of guide you in point of fact want, you can discover them rapidly. In the house, workplace, or perhaps in your method can be all best place within net connections. If you wish to download and install the Corporations Are Not People Reclaiming Democracy From Big Money And Global Corporations, it is utterly easy then, back currently we extend the belong to to purchase and make bargains to download and install Corporations Are Not People Reclaiming Democracy From Big Money And Global Corporations fittingly simple!

A Pedagogy for Restoring Equity and Humanity in Our Classrooms
Berrett-Koehler Publishers
From the prophetic author of the now-classic What ' s the Matter with

Kansas? and Listen, Liberal, an eye-opening account of populism, the most important—and misunderstood—movement of our time. Rarely does a work of history contain startling implications for the present, but in The People, No Thomas Frank pulls off that explosive effect by showing us that everything we think we know about populism is wrong. Today “ populism ” is seen as a frightening thing, a term pundits use to describe the racist philosophy of Donald Trump and European extremists. But this is a mistake. The real story of populism is an account of enlightenment and liberation; it is the story of American democracy itself, of its ever-widening promise of a decent life for all. Taking us from the tumultuous 1890s, when the radical left-wing

Populist Party—the biggest mass movement in American history—fought Gilded Age plutocrats to the reformers’ great triumphs under Franklin Roosevelt and Harry Truman, Frank reminds us how much we owe to the populist ethos. Frank also shows that elitist groups have reliably detested populism, lashing out at working-class concerns. The anti-populist vituperations by the Washington centrists of today are only the latest expression. Frank pummels the elites, revisits the movement’s provocative politics, and declares true populism to be the language of promise and optimism. *The People, No* is a ringing affirmation of a movement that, Frank shows us, is not the problem of our times, but the solution for what ails us.

Will Big Business Destroy Our Planet? Penn State Press

WITH A NEW FOREWORD ABOUT THE 2020 ELECTION

“This urgent book offers not only a clear-eyed explanation of the forces that broke our politics, but a thoughtful and, yes, patriotic vision of how we create a government that’s truly by and for the people.”—DAVID DALEY, bestselling author of *Ratf**ked* and *Unrigged* In the vein of *On Tyranny* and *How Democracies Die*, the bestselling author of *Republic, Lost* argues with insight and urgency that our democracy no longer represents us and shows that reform is both necessary and possible. America’s democracy is in crisis. Along many dimensions, a single flaw—unrepresentativeness—has detached our government from the people. And as a people, our fractured partisanship and ignorance on critical issues drive our leaders to stake out ever more extreme positions. In *They Don’t Represent Us*, Harvard law professor Lawrence Lessig charts the way in which the fundamental institutions of our democracy, including our media, respond to narrow interests rather than to the needs and wishes of the

nation’s citizenry. But the blame does not only lie with “them”—Washington’s politicians and power brokers, Lessig argues. The problem is also “us.” “We the people” are increasingly uninformed about the issues, while ubiquitous political polling exacerbates the problem, reflecting and normalizing our ignorance and feeding it back into the system as representative of our will. What we need, Lessig contends, is a series of reforms, from governmental institutions to the public itself, including: A move immediately to public campaign funding, leading to more representative candidates A reformed Electoral College, that gives the President a reason to represent America as a whole A federal standard to end partisan gerrymandering in the states A radically reformed Senate A federal penalty on states that don’t secure to their people an equal freedom to vote Institutions that empower the people to speak in an informed and deliberative way A soul-searching and incisive examination of our failing political culture, this nonpartisan call to arms speaks to every citizen, offering a far-reaching platform for reform that could save our democracy and make it work for all of us.

Pro: Reclaiming Abortion Rights Penguin

“ *Be the People* is a courageous analysis of today’s most pressing issues, exposing the deceptions by the cultural elite and urging ‘ *We the People* ’ to restore America’s faith and values. ” —Sean Hannity “ There are many good books but only a few really important ones. Dr. Carol Swain’s *Be the People* is one of the latter. Brave, informed, candid, and thoughtful, she brings her fine academic mind to bear on the most pressing needs facing our country. ” —Tony Perkins “ A courageous, challenging, and

controversial call to Americans of all colors to return to their Creator and to come to their Judeo-Christian senses. ” —Dr. Peter A. Lillback “ In Be the People Professor Carol Swain thoughtfully examines the biblical roots and religious significance of today ’ s most pressing issues. Professor Swain shows how to make your voice heard and how to reclaim America ’ s faith and values. ” —Lou Dobbs An insightful analysis of the forces of deception rapidly reshaping America's morals, social policies, and culture, with a call to specific action, written by a thoughtful and courageous Christian social scientist on the front lines of today's issues. Cultural elites in the media, academia, and politics are daily deceiving millions of Americans into passively supporting policies that are detrimental to the nation and their own best interest. Although some Americans can see through the smokescreen, they feel powerless to redirect the forces inside and outside government that radically threaten cherished values and principles. Drawing on her training in political science and law, Dr. Swain thoughtfully examines the religious significance of the founding of our nation and the deceptions that have infiltrated our daily lives and now threaten traditional families, unborn children, and members of various racial and ethnic groups—as well as national sovereignty itself--and provides action points for the people of this country to make the political system more responsive. The book is divided into two sections: Forsaking what we once knew Re-embracing truth and justice in policy choices It also covers key topics such as: America's shift to moral relativism America's religious roots Abortion's fragile facade Historical and biblical views on families and children Erosion of rule of law, national security, and immigration Racial and ethnic challenges Reclaiming

the future

The Audacity of Hope Liveright Publishing
Amitai Etzioni has made his reputation by transcending unwieldy, and even dangerous, binaries such as left/right or globalism/nativism. In his new book, Etzioni calls for nothing less than a social transformation—led by a new social movement—to save our world’s democracies, currently under threat in today’s volatile and profoundly divided political environments. The United States, along with scores of other nations, has seen disturbing challenges to the norms and institutions of our democratic society, particularly in the rise of exclusive forms of nationalism and populism. Focusing on nations as the core elements of global communities, Etzioni envisions here a patriotic movement that rebuilds rather than splits communities and nations. Beginning with moral dialogues that seek to find common ground in our values and policies, Etzioni sets out a path toward cultivating a "good" form of nationalism based on this shared understanding of the common good. Working to broaden civic awareness and participation, this approach seeks to suppress neither identity politics nor special interests in its efforts to lead us to work productively with others. Reclaiming Patriotism offers a hopeful and pragmatic solution to our current crisis in democracy—a patriotic movement that could have a transformative, positive impact on our foreign policy, the world order, and the future of capitalism.

Reclaiming Your Community Macmillan

America Beyond Capitalism is a book whose time has come. Gar Alperovitz's expert diagnosis of the long-term structural crisis of the American economic and political system is accompanied by detailed, practical

answers to the problems we face as a society. Unlike many books that reserve a few pages of a concluding chapter to offer generalized, tentative solutions, Alperovitz marshals years of research into emerging "new economy" strategies to present a comprehensive picture of practical bottom-up efforts currently underway in thousands of communities across the United States. All democratize wealth and empower communities, not corporations: worker-ownership, cooperatives, community land trusts, social enterprises, along with many supporting municipal, state and longer term federal strategies as well. America Beyond Capitalism is a call to arms, an eminently practical roadmap for laying foundations to change a faltering system that increasingly fails to sustain the great American values of equality, liberty and meaningful democracy.

Reclaiming Democracy from Big Money and Global Corporations Minnesota Historical Society

The authors present a series of strategies designed to challenge corporate power and take back the world from the greediest one percent of the world's population, showing readers how to build effective coalitions.

Reflections and Insights from Australia, Canada, New Zealand, and the United States Lexington Books

The Supreme Court's Citizens United decision marked a culminating victory for the bizarre doctrine that corporations are people with free speech and other rights. Now, Americans cannot stop corporations from spending

billions of dollars to dominate elections and keep our elected representatives on a tight leash. Jeffrey Clements reveals the far-reaching effects of this strange and destructive idea, which flies in the face of not only all common sense but most of American legal history as well. Most importantly, he offers solutions—including a constitutional amendment to reverse Citizens United—and tools to help readers join a grassroots drive to implement them. Ending corporate control of our Constitution and government is not about a triumph of one political ideology over another—it's about restoring the republican principles of American democracy.

Privacy is Power Democracy Collaborative Press

Why bother with church? Can't I follow Jesus on my own? Christians young and old struggle to answer these questions, believing Scripture says little about church life. But the Bible is far from silent. The New Testament envisions a vibrant church of devoted brothers and sisters adopted into God's family. The biblical image of the church family has the power to reshape everything our local churches do—the ways pastors lead, how members engage one another, what worship leaders sing, and much more. Now is the time to reclaim a biblical vision of the church as a family and reject the prevailing corporate-church paradigm assumed by church growth gurus. The church that thinks of itself as a family will learn to build meaningful relationships and show the unbelieving world how good church life can be.

The People's Business AMACOM

Reclaiming Indigenous Governance examines the efforts of

Indigenous peoples in four important countries to reclaim their right to self-govern. Showcasing Native nations, this timely book presents diverse perspectives of both practitioners and researchers involved in Indigenous governance in Canada, Australia, New Zealand, and the United States (the CANZUS states). Indigenous governance is dynamic, an ongoing relationship between Indigenous peoples and settler-states. The relationship may be vigorously contested, but it is often fragile—one that ebbs and flows, where hard-won gains can be swiftly lost by the policy reversals of central governments. The legacy of colonial relationships continues to limit advances in self-government. Yet Indigenous peoples in the CANZUS countries are no strangers to setbacks, and their growing movement provides ample evidence of resilience, resourcefulness, and determination to take back control of their own destiny. Demonstrating the struggles and achievements of Indigenous peoples, the chapter authors draw on the wisdom of Indigenous leaders and others involved in rebuilding institutions for governance, strategic issues, and managing lands and resources. This volume brings together the experiences, reflections, and insights of practitioners confronting the challenges of governing, as well as researchers seeking to learn what Indigenous governing involves in these contexts. Three things emerge: the enormity of the Indigenous governance task, the creative agency of Indigenous peoples determined to pursue their own objectives, and the diverse paths they choose to reach their goal.

They Don't Represent Us ReadHowYouWant

In the 2020 CBC Massey Lectures, bestselling author and renowned technology and security expert Ronald J. Deibert exposes the disturbing influence and impact of the internet on politics, the economy, the environment, and humanity. Digital technologies have given rise to a new machine-based

civilization that is increasingly linked to a growing number of social and political maladies. Accountability is weak and insecurity is endemic, creating disturbing opportunities for exploitation. Drawing from the cutting-edge research of the Citizen Lab, the world-renowned digital security research group which he founded and directs, Ronald J. Deibert exposes the impacts of this communications ecosystem on civil society. He tracks a mostly unregulated surveillance industry, innovations in technologies of remote control, superpower policing practices, dark PR firms, and highly profitable hack-for-hire services feeding off rivers of poorly secured personal data. Deibert also unearths how dependence on social media and its expanding universe of consumer electronics creates immense pressure on the natural environment. In order to combat authoritarian practices, environmental degradation, and rampant electronic consumerism, he urges restraints on tech platforms and governments to reclaim the internet for civil society.

Reclaiming Our Wealth, Our Liberty, and Our Democracy Currency

This is a story of hope, but also of peril. It began when our nation's polarized political class started conscripting everyday citizens into their culture war. From their commanding heights in political parties, media, academia, and government, these partisans have attacked one another for years, but increasingly they've convinced everyday Americans to join the fray. Why should we feel such animosity toward our fellow citizens, our neighbors, even our own kin?

Because we've fallen for the false narrative, eagerly

promoted by pundits on the left and the right, that citizens who happen to vote Democrat or Republican are enthusiastic supporters of Team Blue or Team Red. Aside from a minority of party activists and partisans, however, most voters are simply trying to choose the lesser of two evils. The real threat to our union isn't Red vs Blue America, it's the quiet collusion within our nation's political class to take away that most American of freedoms: our right to self-governance. Even as partisans work overtime to divide Americans against one another, they've erected a system under which everyday citizens don't have a voice in the decisions that affect our lives. From foreign wars to how local libraries are run, authority no longer resides with We the People, but amongst unaccountable officials. The political class has stolen our birthright and set us at one another's throats. This is the story of how that happened and what we can do about it. America stands at a precipice, but there's still time to reclaim authority over our lives and communities.

How to Put Balance Back in Copyright, Second Edition

HarperCollins

An Economist Book of the Year Every minute of every day, our data is harvested and exploited... It is time to pull the plug on the surveillance economy. Governments and hundreds of corporations are spying on you, and everyone you know. They're not just selling your data. They're selling the power to influence you and decide for you. Even when you've explicitly

asked them not to. Reclaiming privacy is the only way we can regain control of our lives and our societies. These governments and corporations have too much power, and their power stems from us--from our data. Privacy is as collective as it is personal, and it's time to take back control. Privacy Is Power tells you how to do exactly that. It calls for the end of the data economy and proposes concrete measures to bring that end about, offering practical solutions, both for policymakers and ordinary citizens.

Thoughts on Reclaiming the American Dream John Wiley & Sons

Hartmann tells a startling story of the rise of corporate dominance and the theft of human rights as corporations use the Fourteenth Amendment to further their own agendas.

Supreme Myths Macmillan

A fresh argument for rioting and looting as our most powerful tools for dismantling white supremacy Looting--a crowd of people publicly, openly, and directly seizing goods--is one of the more extreme actions that can take place in the midst of social unrest. Even self-identified radicals distance themselves from looters, fearing that violent tactics reflect badly on the broader movement. But Vicky Osterweil argues that stealing goods and destroying property are direct, pragmatic strategies of wealth redistribution and improving life for the working class--not to mention the brazen messages these methods send to the police and the state. All our beliefs about the innate righteousness of property and ownership, Osterweil explains, are built on the history of anti-Black,

anti-Indigenous oppression. From slave revolts to labor strikes to the modern-day movements for climate change, Black lives, and police abolition, Osterweil makes a convincing case for rioting and looting as weapons that bludgeon the status quo while uplifting the poor and marginalized. In *Defense of Looting* is a history of violent protest sparking social change, a compelling reframing of revolutionary activism, and a practical vision for a dramatically restructured society.

Reclaiming Our Democracy from the Ruling Class
Berrett-Koehler Publishers

"Americans are using new strategies and tools to renew democracy and curb unbalanced corporate power. **STILL ESSENTIAL:** The Citizens United decision continues to distort the electoral process and expand the power of corporations; **UPDATED THROUGHOUT:** This second edition details both the ruling's expanding damage to democracy and, in an all-new chapter, how citizens can lead the battle against it. The Supreme Court's Citizens United ruling that corporations are people eliminated campaign finance restrictions and dramatically increased corporate power, but attorney Jeff Clements shows how you can fight back. Clements explains the strange history of how the Supreme Court came to embrace a concept that flies in the face of not only all common sense but most of American legal history as well. He shows how unfettered corporate rights will impact public health,

energy policy, the environment, and the justice system. In this new edition Clements details Citizens United's ongoing destructive effects—for example, Chevron was able to spend \$1.2 million to influence a single local election in a city of 100,000 people. But he also describes the growing movement to reverse the ruling—since the first edition 16 states, 160 members of Congress, and 500 cities and towns have called for a Constitutional amendment to overturn Citizens United. And in a new chapter, *Do Something!*, Clements shows how—state by state and community by community—Americans are using new strategies and tools to renew democracy and curb unbalanced corporate power. A plain-English guide to the disastrous practical consequences of the bizarre legal doctrine of corporate personhood enshrined most recently in the Supreme Court's Citizens United decision; Features a constitutional amendment designed to overturn Citizens United and restore the government to the people; Includes a tool kit to help citizens mount a grassroots campaign to pass the Peoples Rights amendment; The January 2010 Supreme Court Citizens United v. Federal Election Commission decision marked a culminating victory for the legal doctrine of corporate personhood. Corporations, as legal persons, are now entitled to exercise their alleged free-speech rights in the form of campaign spending, effectively enabling corporate

domination of the electoral process. Jeffrey Clements uncovers the roots, expansion, and far-reaching effects of the strange and destructive idea, which flies in the face of not only all common sense but, Clements shows, most of American legal history, from 1787 to the 1970s. He details its impact on the American political landscape, economy, job market, environment, and public health and how it permeates our daily lives, from the quality of air we breathe to the types of jobs we can get to the politicians we elect. Most importantly, he offers a solution: a constitutional amendment to reverse Citizens United and tools readers can use to mount a grassroots drive to get it passed. Overturning Citizens United is not about a triumph of one political ideology over another, it's about restoring the democratic principles on which America was built. Republican president Theodore Roosevelt and conservative Supreme Court Chief Justice William Rehnquist both vocally opposed the idea of corporate personhood. Community by community, state by state, we can cross party and ideological lines to form a united front against unchecked corporate power in America and reinstate a government that is truly of, by, and for the people."--
A Solution to the Corporate-Church Crisis Berrett-Koehler Publishers
Privacy, which digital citizens eagerly relinquish, is not so essential to the health and welfare of democracy after all.

Why the Supreme Court is Not a Court and Its Justices are Not Judges Cambridge University Press
Walmart. Coca-Cola. BP. Toyota. The world economy runs on the profits of transnational corporations. Politicians need their backing. Non-profit organizations rely on their philanthropy. People look to their brands for meaning. And their power continues to rise. Can these companies, as so many are now hoping, provide the solutions to end the mounting global environmental crisis? Absolutely, the CEOs of big business are telling us: the commitment to corporate social responsibility will ensure it happens voluntarily. Peter Dauvergne challenges this claim, arguing instead that corporations are still doing far more to destroy than protect our planet. Trusting big business to lead sustainability is, he cautions, unwise — perhaps even catastrophic. Planetary sustainability will require reining in the power of big business, starting now.
Life Inc University of Chicago Press
Majora Carter shows how brain drain cripples low-status communities and maps out a development strategy focused on talent retention to help them break out of economic stagnation. "My musical, In the Heights, explores issues of community, gentrification, identity and home, and the question: Are happy endings only ones that involve getting out of your neighborhood to achieve your dreams? In her refreshing new book, Majora Carter writes about these issues with great insight and clarity, asking us

to re-examine our notions of what community development is and how we invest in the futures of our hometowns. This is an exciting conversation worth joining.” —Lin-Manuel Miranda

How can we solve the problem of persistent poverty in low-status communities? Majora Carter argues that these areas need a talent-retention strategy, just like the ones companies have. Retaining homegrown talent is a critical part of creating a strong local economy that can resist gentrification. But too many people born in low-status communities measure their success by how far away from them they can get. Carter, who could have been one of them, returned to the South Bronx and devised a development strategy rooted in the conviction that these communities have the resources within themselves to succeed. She advocates measures such as

- Building mixed-income instead of exclusively low-income housing to create a diverse and robust economic ecosystem
- Showing homeowners how to maximize the long-term value of their property so they won't succumb to quick-cash offers from speculators
- Keeping people and dollars in the community by developing vibrant “third spaces”—restaurants, bookstores, and places like Carter's own Boogie Down Grind Cafe

This is a profoundly personal book. Carter writes about her brother's murder, how turning a local dumping ground into an award-winning park opened her eyes to the hidden potential in her community, her struggles as a woman of color confronting the “male and pale” real estate and nonprofit establishments, and much more. It is a powerful rethinking of poverty, economic development, and the

meaning of success.

Bill de Blasio and the Movement to End America's Tale of Two Cities House of Anansi

This book explores some of the most glaring misunderstandings about the U.S. Supreme Court—and makes a strong case for why our Supreme Court Justices should not be entrusted with decisions that affect every American citizen.

Global Trends and Issues Concerning Indigenous Peoples
The New Press

“In a time in which the ways we communicate and connect are constantly changing, and not always for the better, Sherry Turkle provides a much needed voice of caution and reason to help explain what the f*** is going on.”

—Aziz Ansari, author of *Modern Romance*

Renowned media scholar Sherry Turkle investigates how a flight from conversation undermines our relationships, creativity, and productivity—and why reclaiming face-to-face conversation can help us regain lost ground. We live in a technological universe in which we are always communicating. And yet we have sacrificed conversation for mere connection.

Preeminent author and researcher Sherry Turkle has been studying digital culture for over thirty years. Long an enthusiast for its possibilities, here she investigates a troubling consequence: at work, at home, in politics, and in love, we find ways around conversation, tempted by the possibilities of a text or an email in which we don't have to look, listen, or reveal ourselves. We develop a taste for what mere connection offers. The dinner table falls silent

as children compete with phones for their parents' attention. Friends learn strategies to keep conversations going when only a few people are looking up from their phones. At work, we retreat to our screens although it is conversation at the water cooler that increases not only productivity but commitment to work. Online, we only want to share opinions that our followers will agree with – a politics that shies away from the real conflicts and solutions of the public square. The case for conversation begins with the necessary conversations of solitude and self-reflection. They are endangered: these days, always connected, we see loneliness as a problem that technology should solve. Afraid of being alone, we rely on other people to give us a sense of ourselves, and our capacity for empathy and relationship suffers. We see the costs of the flight from conversation everywhere: conversation is the cornerstone for democracy and in business it is good for the bottom line. In the private sphere, it builds empathy, friendship, love, learning, and productivity. But there is good news: we are resilient. Conversation cures. Based on five years of research and interviews in homes, schools, and the workplace, Turkle argues that we have come to a better understanding of where our technology can and cannot take us and that the time is right to reclaim conversation. The most human—and humanizing—thing that we do. The virtues of person-to-person conversation are timeless, and our most basic technology, talk, responds to our modern challenges. We have everything we need to start, we have each other. Turkle's latest book, *The Empathy Diaries* (3/2/21) is available now.
