Cost Accounting  
Macmillan College  
The Arab World  
Edition of this

---

popular text from world famous author Charles T. Horngren has been especially created to motivate and engage students of cost accounting from across the Arab World. While there are many cost accounting textbooks available on the market, none have been developed with such a strong focus on preparing students for an accounting career in both the Arab World and

globally. This new text sets out to provide cost accounting students with the practical skills and theoretical knowledge students need to thrive in both their academic study and future careers. Drawing on many locally sourced examples and case studies, this text gives students an essential global perspective on cost accounting, all the

while making core concepts relevant to students' own experiences.

Cost Accounting, [ECH Master] "This book focuses on how cost accounting helps managers make better decisions, as cost accountants increasingly are becoming integral members of their company's decision-making teams. In order to emphasize this prominence in decision making, we use the "different costs for different purposes" theme throughout this book. By focusing on basic concepts, analyses, uses, and procedures instead of procedures alone, we recognize cost accounting as a managerial tool for business strategy and implementation. We also prepare students for the rewards and challenges they face in the professional cost accounting

---

world of today and tomorrow. For example, we emphasize both the development of technical skills such as Excel and big-data analytics to leverage available information technology and the values and behaviors that make cost accountants effective in the workplace"--
