The COVID-19 pandemic has, with alarming speed, dealt a heavy blow to an already-weak global economy, which is expected to slide into its deepest recession since the second world war, despite unprecedented policy support. The global recession would be deeper if countries take longer to bring the pandemic under control, if financial stress triggers defaults, or if there are protracted effects on households and firms. Economic disruptions are likely to be more severe and protracted in emerging market and developing economies with larger domestic outbreaks and weaker medical care systems; greater exposure to international spillovers through trade, tourism, and commodity and financial markets; weaker macroeconomic frameworks; and more pervasive informality and poverty. Beyond the current steep economic contraction, the pandemic is likely to leave lasting scars on the global economy by undermining consumer and investor confidence, human capital, and global value chains. Being mostly a reflection of the recent plunge in global energy demand, low oil prices are unlikely to provide much of a boost to global growth in the near term. While policymakers' immediate priorities are to address the health crisis and moderate the short-term economic losses, the likely long-term consequences of the pandemic highlight the need to forcefully undertake comprehensive reform programs to improve the fundamental drivers of economic growth, once the crisis abates. Global Economic

Prospects is a World Bank Group Flagship Report that examines global economic developments and prospects, with a special focus on emerging market and developing economies, on a semiannual basis (in January and June). The January edition includes in-depth analyses of topical policy challenges faced by these economies, while the June edition contains shorter analytical pieces.

Alex Rogo is a harried plant manager working ever more desperately to try and improve performance. His factory is rapidly heading for disaster. So is his marriage. He has ninety days to save his plant - or it will be closed by corporate HQ, with hundreds of job losses. It takes a chance meeting with a

colleague from student days - Jonah - to help him break out of conventional ways of thinking to see what needs to be done. Described by Fortune as a 'guru to industry' and by Businessweek as a 'genius', Eliyahu M. Goldratt was an internationally recognized leader in the development of new business management concepts and systems. This 20th anniversary edition includes a series of detailed case study interviews by David Whitford, Editor at Large, Fortune Small Business, which explore how organizations around the world have been transformed by Eli Goldratt's ideas. The story of Alex's fight to save his plant contains a serious message for all managers in industry and explains the ideas which underline the Theory of Constraints (TOC) developed by Eli Goldratt. Written in a fast-paced thriller style, *The Goal* is the gripping novel which is transforming management thinking throughout the Western world. It is a book to recommend to your friends in industry - even to your bosses - but not to your competitors!

Advanced Cost Accounting (Theory, Problems And Solutions). Pearson Higher Ed

A direct, realistic, and efficient way to learn cost accounting. Fundamentals is short (approximately 700 pages) making it easy to cover in one semester. The authors have kept the text concise by focusing on the key concepts students need to master. Opening vignettes and In Action boxes show realistic applications of these concepts throughout. All chapters end with a "Debrief" that links the topics in the chapter to the decision problem faced by the manager in the opening vignette. Comprehensive end-of-chapter problems provide students with all the practice they need to fully learn each concept.

A literary page-turner about one man's macabre ambition to create life-and secure immortality The village of Wolfheim is a quiet little place until the geneticist Dr.

Victor Hoppe returns after an absence of nearly twenty years. The doctor brings with him his infant children-three identical boys all sharing a disturbing disfigurement. He keeps them hidden away until Charlotte, the woman who is hired to care for them, begins to suspect that the triplets-and the good doctor- aren't quite what they seem. As the villagers become increasingly suspicious, the story of Dr. Hoppe's past begins to unfold, and the shocking secrets that he has been keeping are revealed. A chilling story that explores the ethical limits of science and religion, *The Angel Maker* is a haunting tale in the tradition of *The Strange Case of Dr. Jekyll and Mr. Hyde* and *Frankenstein*. Brought to life by internationally bestselling author Stefan Brijis, this eerie tale promises to get under readers' skin.

This book explains how True Cost Accounting is an effective tool we can use to address the pervasive imbalance in our food system. Calls are coming from all quarters that the food system is broken and needs a radical transformation. A system that feeds many yet continues to create both extreme hunger and diet-related diseases, and one which has significant environmental impacts, is not serving the world adequately. This volume argues that True Cost Accounting in our food system can create a framework for a systemic shift. What sounds on the surface like a practice relegated to accountants is ultimately a call for a new lens on the valuation of food and a new relationship with the food we eat, starting with the reform of a system out of balance. From the true cost of corn, rice and water, to incentives for soil health, the chapters economically compare conventional and regenerative, more equitable farming

practices in and food system structures, including taking an unflinching look at the true cost of cheap labour. Overall, this volume points towards the potential for our food system to be more human-centred than profit-centred and one that has a more respectful relationship to the planet. It sets forth a path forward based on True Cost Accounting for food. This path seeks to fix our current food metrics, in policy and in practice, by applying a holistic lens that evaluates the actual costs and benefits of different food systems, and the impacts and dependencies between natural systems, human systems, agriculture and food systems. This volume is essential reading for professionals and policymakers involved in developing and reforming the food system, as well as students and scholars working on food policy, food systems and sustainability.

This book discusses the conflicting discourse around GM crops in India. It brings together concerns related to food production, farming, environment, health, ownership and policymaking on the use of genetically modified crops in India. The volume analyses apprehensions around GM technology from the perspective of the various stakeholders involved in the debate. Through field surveys and interviews with scientists, economists,

environmentalists, civil society activists as well as cotton growing farmers from the states of Telangana and Maharashtra, it highlights the vulnerabilities and questions related to the short-term and long term impacts of using GM technology on farmers, food production, health, the agricultural economy and the environment. The book proposes ways for the use of GM technology which takes stock of economic and farming limitations and accordingly brings in reforms and policies to reconcile the conflicting arguments of stakeholders. This volume will be of great interest to researchers and students of development studies, political science, sociology, agricultural studies and sciences and biotechnology. It will also be useful for policymakers, think tanks and NGOs working with farmers or agriculture collectives on policy issues.
