The 2009 International Workshop on Agents and Data Mining

Interaction (ADMI 2009) was a joint event with AAMAS 2009. In recent years, agents and data mining interaction (ADMI), or agent mining for short, has emerged as a very promising research field. Following the success of ADMI 2006 in Hong Kong, ADMI 2007 in San Jose, and ADMI 2008 in Sydney, the ADMI 2009 workshop in Budapest provided a premier forum for sharing research and engineering results, as well as potential challenges and

---

prospects encountered in the synergy between agents and data mining. As usual, the ADMI workshop encouraged and promoted theoretical and applied research and development, which aims at: – Exploiting agent-driven data mining and demonstrating how intelligent agent technology can contribute to critical data mining problems in theory and practice – Improving data mining-driven agents and showing how data mining can strengthen agent

intelligence in research and practical applications – Exploring the integration of agents and data mining toward a super-intelligent information processing and systems – Identifying challenges and directions for future research on the synergy between agents and data mining ADMI 2009 featured two invited talks and twelve selected papers. The first invited talk was on “Agents and Data Mining in Bioinformatics,” with the second focusing on

“Knowledge-Based Reinforcement Learning.” The ten accepted papers are from seven countries. A majority of submissions came from European countries, indicating the boom of ADMI research in Europe. In addition the two invited papers, addressed fundamental issues related to agent-driven data mining, data mining-driven agents, and agent mining applications. The proceedings of the ADMI workshops will be published as part of the

This book closely examines what is involved in driving. It identifies the aspects of perception, attention, learning, memory, decision making and action control which are drawn upon in order to enable us to drive, and the brain systems involved. It attempts to show how studying tasks such as driving can help to

---

understand how these fundamental aspects of cognition combine to facilitate performance in complex everyday tasks. In doing so it shows how a very broad range of laboratory based findings can be applied, and that through our attempts to apply this knowledge to complex everyday tasks, we gain, in return, a greater understanding of fundamental aspects of human cognition. Lean TPM CRC Press A joint production by six international organizations, this manual explores the conceptual and theoretical issues that national statistical offices should consider in the daily compilation of export and import price indices. Intended for use by both developed and developing countries, it replaces guidance from the

United Nations that is now more than a quarter-century old and thus badly outdated. The chapters cover many topics; they elaborate on the different practices currently in use, propose alternatives whenever possible, and discuss the advantages and disadvantages of each alternative. Given its comprehensive nature, the manual is expected to satisfy the needs of many users in addition to national statistical offices and international organizations, particularly businesses, policymakers, and researchers.

Estimating Building Costs  
Few aspects of a construction project are more fundamental than the cost estimate, which can mean the difference between a professionally executed project and a financial and legal disaster. Properly handled, a construction cost estimate can protect both the contractor and the client from losing money on a project. The estimate is the

first step toward a successful project. For contractors, therefore, the knowledge required to construct an accurate price estimate is critical. Estimating Building Costs for the Residential and Light Commercial Construction Professional provides this knowledge in a thorough and comprehensive guide. It takes readers step-by-step through the process of constructing a cost estimate, and provides guidance for incorporating cost estimates into budgeting, scheduling, project management, and
