Communication Peterson's

Civil engineers, mechanical engineers, structural engineers, marine engineers, chemical engineers, systems engineers, and engineering support personnel have a lot in common when they want to create a resume, and this book shows resumes and cover letters of individuals who want to work in the field. For those who seek federal employment, there's a special section showing how to create federal resumes and government applications. Since many technical types aren't writers, this comes as a special gift: select a winning format, plug in your background specs, and away you go. It's that easy--with REAL RESUMES in hand. - The Midwest Book Review 1-885288-42-5

Midnight in Issaquah Notion Press

Peterson's Graduate Programs in Engineering & Applied Sciences contains a wealth of information on colleges and universities that offer graduate degrees in the fields of Aerospace/Aeronautical Engineering; Agricultural Engineering & Bioengineering; Architectural Engineering, Biomedical Engineering & Biotechnology; Chemical Engineering; Civil & Environmental Engineering; Computer Science & Information Technology; Electrical & Computer Engineering; Energy & Power engineering; Engineering Design; Engineering Physics; Geological, Mineral/Mining, and Petroleum Engineering; Industrial Engineering; Management of Engineering & Technology; Materials Sciences & Engineering; Mechanical Engineering & Mechanics; Ocean Engineering; Paper & Textile Engineering; and Telecommunications. Up-to-date data, collected through Peterson's Annual Survey of Graduate and Professional Institutions, provides valuable information on degree offerings, professional accreditation, jointly offered degrees, part-time and evening/weekend programs, postbaccalaureate distance degrees, faculty, students, degree requirements, entrance requirements, expenses, financial support, faculty research, and unit head and application contact information. As an added bonus, readers will find a helpful "See Close-Up" link to in-depth program descriptions written by some of these institutions. These Close-Ups offer detailed information about the specific program or department, faculty members and their research, and links to the program Web site. In addition, there are valuable articles on financial assistance and support at the graduate level and the graduate admissions process, with special advice for international and minority students. Another article discusses important facts about accreditation and provides a current list of accrediting agencies.

Quantitative Marketing and Marketing Management Peterson's

Quantitative marketing has been gaining importance during the last decade. This is indicated by the growing number of model- and method-oriented studies published in leading journals as well as by the many successful applications of quantitative approaches in pricing, advertising, new product planning, and market segmentation decisions. In addition, market research has clearly benefitted from applying advanced quantitative models and methods in practice. Some 60 researchers - among them worldwide leading scholars - offer a broad overview of quantitative approaches in marketing. They not only highlight diverse mathematical and methodological perspectives, but also demonstrate the relevance and practical consequences of applying quantitative approaches to marketing problems. Gallery of Best Resumes Red Wheel/Weiser Title shows resumes and cover letters of people who wish to enter the manufacturing field, advance in it, or exit from it into new careers. Job hunting strategies are provided, as are strategies for transferring manufacturing skills and experience to other industries. The book contains more than 100 real resumes and cover letters which target this industry, and the purpose of the book is to give models or examples for people to use in creating their own resumes and cover letters tailored to the manufacturing industry. Readers will find resumes of machine operator, product design director, production foreman, quality engineer, shipping and receiving manager, tool and die maker, tire builder, welder, team leader, assembler, maintenance supervisor, and many other jobs. This book will be of enormous help to people seeking employment in the manufacturing sector and to people who desire to transfer knowledge gained in a manufacturing environment into new occupational areas.

?????? Springer Science & Business Media Adopting an interdisciplinary perspective, BUILDING GENRE KNOWLEDGE provides a unique look into the processes of building genre knowledge while offering a dynamic theory of those processes that is inclusive of both monolingual and multilingual writers—a necessary move in today's linguistically diverse classrooms. It will therefore be of great interest to researchers and practitioners in both first and second language writing studies.
