This journal attempts to fill a gap between the general-interest press and other academic economics journals. Its articles relate to active lines of economics research, economic analysis of public policy issues, state-of-the-art economic thinking, and directions for future research. It also aims to provide material for classroom use, and to address issues relating to the economics profession.

Economic aspects of regional welfare John Wiley & Sons  
The study of economics should not be highly abstract, but closely related to real-world events. Principles of Economics in Context addresses this challenge, laying out the principles of micro-and macroeconomics in a manner that is thorough, up to date and relevant to students, keeping theoretical exposition close to experience. Emphasizing writing that is compelling, clear, and attractive to students, it addresses such critical concerns as ecological sustainability, distributional equity, the quality of employment, and the adequacy of living standards. Key features include: Clear explanation of basic concepts and analytical tools, with Discussion Questions at the end of each section, encouraging immediate review of what has been read and relating the material to the students' own experience; Full complement of instructor and student support materials online, including test banks and grading through Canvas; Key terms highlighted in boldface throughout the text, and important ideas

and definitions set off from the main text; A glossary at the end of the book containing all key terms, their definitions, and the number of the chapter(s) in which each was first used and defined. Updates for the second edition include: Expanded coverage of topics including inequality, financialization and debt issues, the changing nature of jobs, and sustainable development; New material on wage discrimination by race and gender; an expanded section on labor markets and immigration; Updated discussion of fiscal policy to include more recent developments such as the Trump tax cuts; New material on behavioral economics, public goods, and climate change policy; a new section on "The Economics of Renewable Energy." This new, affordable edition combines the just-released new editions of Microeconomics in Context and Macroeconomics in Context to provide an integrated full-year text covering all aspects of both micro-and macro-analysis and application, with many up-to-date examples and extensive supporting Web resources for instructors and students.

Occupational Outlook Handbook Routledge  
The recent financial crisis has once again seen John Kenneth Galbraith return to the bestseller lists. Yet, despite the continued popular success of his works, Galbraith's contribution to economic theory is rarely recognized by today's economists. This book redresses the balance by providing an introductory and sympathetic discussion of Galbraith's theoretical contributions, introducing the reader to his economics and his broader vision of the economic process. The book highlights and explains key features of Galbraith's economic thought, including his penetrating critique of society, his distinctive methodology, his specific brand of Keynesianism and his original - but largely ignored - contribution

to the theory of the firm. It also presents, for the first time, a detailed examination of Galbraith's monetary economics and revisits his analysis of financial euphoria. This unique work seeks to rehabilitate Galbraith's contribution, setting out several directions for possible future research in the Galbraithian tradition.

This volume discusses the relationship between economics, geopolitics and regional institutional growth and development in the Asia-Pacific region. How do states (re)define their relationships amid the current global power transition? How do rival actors influence the rules and formation of new institutions for their own benefit? What role will institutions take as independent actors in influencing and constraining the behavior of states? Institutional development in Asia is characterized by idiosyncratic and diverse motivations (both material and non-material), a variety of policy strategies (strategic and norm-based), and the looming question of China's future depth of involvement as its economic position becomes more stable and its confidence in foreign affairs grows. The book reflects the broadening definition of Asia by examining multiple perspectives, including Japan, China, South Korea, the United States, Australia, India, Russia, and Taiwan. In addition to state actors, the contributors address several important regional institutions in development such as the ASEAN (+3, +6, and the East Asian Summit), the Asian Infrastructure Investment Bank (AIIB), the Asian Development Bank (ADB), existing security alliances, and other bilateral institutions. Ultimately, this volume

describes the unique, slow, and diverse growth of a multitude of regional institutions, the complexities of generating cooperation, membership concerns, and competition between states and with existing institutions in the context of China's increasing confidence and strength. This book will be of much interest to students of Asian politics, regional security, international organizations, and foreign policy. Finance Essentials Bloomsbury Publishing Asia and the Pacific have become the growth engine of the world economy with the contribution of two-third of the global growth. The book discusses current issues in economics, business, and accounting in which economic agents, as individuals, entrepreneurs and professionals, as well as countries in the Asia and Pacific regions compete and collaborate with each other and with the rest of the globe. Areas covered in the book include economic development and sustainability, labor market competition, Islamic economic and business, marketing, finance, accounting standard compliances, and taxation. It will help shed light on what business and economic scholars in regions have done in terms of research and knowledge development, as well as the new frontiers of research that have been explored and opening up. *Gender and Aging* Walter de Gruyter

In the century after the Civil War, an economic revolution improved the American standard of living in ways previously unimaginable. Electric lighting, indoor plumbing, motor vehicles, air travel, and television transformed households and workplaces. But has that era of unprecedented growth come to an end? Weaving together a vivid narrative, historical anecdotes, and economic analysis, *The Rise and Fall of American Growth* challenges the view that economic growth will continue unabated, and demonstrates that the life-

altering scale of innovations between 1870 and 1970 cannot be repeated. Robert Gordon contends that the nation's productivity growth will be further held back by the headwinds of rising inequality, stagnating education, an aging population, and the rising debt of college students and the federal government, and that we must find new solutions. A critical voice in the most pressing debates of our time, *The Rise and Fall of American Growth* is at once a tribute to a century of radical change and a harbinger of tougher times to come.

Public discussion of population aging usually focuses on the financial burden that increasingly elderly populations will impose on younger generations. Scholars give much less attention to who does the actual work of day-to-day care for those no longer able to care for themselves; and although women are the majority among the elderly, little is heard about gender differences in economic resources or the need for care. This volume is dedicated to giving gender - and a full range of social

and cultural differences - their rightful place in these discussions. The authors address, amongst other issues: the worldwide dilemmas of eldercare the structure of income and care provisions for older populations the role of family, marital status, and class in these provisions the impact of policies affecting retirement age the role of social insurance in preventing poverty among elderly women. The essays included address these topics in a myriad of geographical contexts, including South Africa, the US, Palestine, Australia, South Korea, Spain, Germany, and Sweden. The concerns highlighted here also remind us that whether through individual families or social insurance, through family caregivers or paid help, the oldest generation will continue to depend on adults of working age for its well-being. This book was previously published as a special issue of Feminist Economics.

This book is the product of research which I undertook for my doctoral thesis. The project was started whilst I was at the Free University of Amsterdam, and the State University of Groningen gave me ample opportunity to complete the work. At both universities I was lucky enough to find kind colleagues who were willing to perform my teaching tasks, enabling me to spend much of my time some of on my research. I should like to thank Wietze Boomsma, Kees van den Hoeven and Jan Oosterhaven for their kind help. I was also most encouraged to discover several students at both institutions who were interested in the research topic. This meant that some research could be performed with their co-operation, which proved most stimulating. Harry ter Braak and Henk van Metelen were especially enthusiastic helpers. During the initial stage of research, Fons Bertens did a great deal of meticulous work, with never a complaint. In the final stages, Arend Stemerding helped me greatly. The completed manuscript was read by Nol Merkies and Peter Nijkamp, who had some helpful comments on the contents. Professor Nijkamp succeeded in stimulating me during the research by his interest in the project and subsequent edifying discussions. Several persons helped to type the

manuscript, but Yvonne van Tuyl took the lion's share, typing a perfect final copy in record time.

Strengthening Governance Globally is the fifth volume in the series 'Patterns of Potential Human Progress'. Each volume considers one key aspect of how development unfolds globally and how better to move it in desired directions.

This volume identifies the provision of security, the building of government capacity, and the broadening of inclusion of governance on which high-income countries have traditionally made long historical transitions. In contrast, many developing countries today struggle with all three governance transition dimensions simultaneously. Strengthening Governance Globally uses the growing empirical database on governance variables to understand historical change.
