Language in Action Routledge
This book offers a history of Continuing Professional Development (CPD) in the Australian context. It presents an approach that links the development of CPD to a series of 'missed opportunities' and the identification of three key themes (mandatory CPD, competencies and regulation/registration) as well as with national regulation for select health professions. It not only relates the evolution of CPD in Australia but also serves as a guide to examining the situation in other countries and the emergence of CPD in individual professions. CPD has been provided for many decades, but it has not been rated as a 'high priority' or a key area of provision and has not been the focus of discussions or disputes in the higher education sector or in vocational education circles. Nevertheless in describing CPD's development, evidence is presented that CPD has made a significant contribution to the broad field of vocational education.

This book will examine how universities in China and the US are responding to markets and increasing global competition. For both countries, a university education is seen as key to economic development. While China and the US have two very different political systems, they represent the two largest economies in the world and share beliefs that higher education plays an integral role to economic development. The book will bring together scholars with multiple perspectives on the topic to create dialogue around similarities and differences. This book will appeal to students, scholars, and higher educational administrators in both countries and other countries as well who are seeking to understand the strategic change in higher education in both China and the US. ?

A History of Cambridge English Examinations, 1913-2012 Walter de Gruyter
This volume establishes how English language constructs were measured in Cambridge English examinations over the period 1913 to 2012. An addition to the Studies in Language Testing series, this volume provides an overview of English language testing over the last century, with coverage of key theoretical and practical aspects of the assessment of reading, listening, writing and speaking skills. It includes examples of the Cambridge English exams, old and new, and is the first volume to describe in a systematic way the different theoretical influences which have shaped the development of the constructs underlying Cambridge English exams in the last 100 years.

Cambridge Key English Test for Schools 1 Student's Book with answers The SAGE Handbook of Inclusion and Diversity in Education

Test developers need to provide a clear explication of the language ability constructs that underpin the tests they offer in the public domain; such an explication is essential for supporting claims about the validity --- or usefulness --- of tests and test scores. This edited volume develops a theoretical framework for validating tests of second language speaking ability. The framework is then applied through an examination of the tasks in Cambridge ESOL speaking tests from a number of different validity perspectives that reflect the socio-cognitive nature of any assessment event. The chapter authors show how an understanding and analysis of the framework and its components can assist test developers to operationalise their tests more effectively, especially in relation to the key criteria that differentiate one proficiency level from another. The volume is a rich source of information on all aspects of examining speaking ability. As such, it will be of considerable interest to examination boards who wish to validate their own speaking tests in a systematic and coherent manner, as well as to academic researchers and graduate students in the field of language assessment more generally. This is a companion volume to the previously published titles Examining Writing and Examining Reading.

This volume brings together a large group of researchers from across the world to provide in-depth coverage of a number of perennial and important issues in assessing Chinese learners of English. The empirical studies included here highlight the constant challenges and conundrums in understanding the language constructs of assessment, the various assessment methods, innovations and policies, Chinese learners' preparation for and performance on English language tests, as well as the consequences of assessing Chinese learners of English at different educational levels and institutions and for varying purposes. This volume will appeal to language testing professionals and policy makers as well as researchers in the areas of language testing, applied linguistics, second language acquisition, and international/comparative education.

Handbook of Polymers Pen and Sword

2011 was a tumultuous year in terms of social protest movements. The Occupy movement spread across the globe with unprecedented support of an enormity not seen since 1968, while revolutions in Egypt, Tunisia, Morocco, Syria and Libya caught the attention of the global media and brought the word "revolution" back into public discussions on social justice and governance. For many people worldwide, it appears that it is time for social, political and economic change. And it is precisely time, in all its forms, which cannot be ignored in this context. As something that surrounds us and affects every aspect of our lives, time is at once a tool for control, for order, for emancipation, for understanding the future and the past, and measuring degrees of freedom and quality of life in the present. This book brings together essays from fields such as politics, cultural studies and philosophy in order to reinterpret and reorient current thinking on the possibilities for new understandings of concepts of time to bring about social change. History as the passing of time, clock time, the exchange value of time, qualitative time, and alternative or marginal notions of temporality are analysed through the lens of various theoretical thinkers and applied to a multitude of political and social case studies. Breaking away from traditional notions of time as linear, and against common socially-constructed understandings of time, these essays suggest that new conceptions of time can have a major influence on creating a more just, tolerant world.

In the three volumes of Major Trends in Theoretical and Applied Linguistics, the editors guide the reader through a well-selected compendium of works, presenting a fresh look at contemporary linguistics. Specialists will find chapters that contribute to their fields of interest, and the three-volume collection will provide useful reading for anyone interested in linguistics. The first volume explores theoretical issues dealing with phonetics-phonology and syntax-semantics-morphology. Volume two is organized into three main sections that examine interdisciplinary linguistics: discourse analysis, gender and lexicography, language acquisition, and language disorders. Finally, volume three focuses on applied linguistics - both language teaching/learning and education.

Cambridge Certificate of Proficiency in English 2 Audio CD Set (2 CDs) SAGE This book introduces the theoretical and empirical bases for the definition of language learning level in functional 'Can Do' terms for the English Profile Programme, setting out the ambitions of the Programme and presenting emerging findings. The English Profile Programme is an elaboration of the performance level descriptions of the Common European Framework of Reference for Languages (CEFR) that is concerned specifically with the English language. The CEFR has become influential in building a shared understanding of performance levels for foreign language learners. However, there is a considerable gap between the broad descriptions of levels provided, which covers a range of languages and learning contexts, and the level of detail required for applications such as syllabus or test design, which this volume addresses. With its combination of theoretical insights and practical advice, this is a useful work for academics, policy-makers, curriculum designers, textbook writers, postgraduate students and examination board staff.

Routledge Introductions to Applied Linguistics is a series of introductory level textbooks covering the core topics in Applied Linguistics, primarily designed for those beginning postgraduate studies, or taking an introductory MA course as well as advanced undergraduates. Titles in the series are also ideal for language professionals returning to academic study. The books take an innovative 'practice to theory' approach, with a 'back-to-front' structure. This leads the reader from real-world problems and issues, through a discussion of intervention and how to engage with these concerns, before finally relating these practical issues to theoretical foundations. Additional features include tasks with commentaries, a glossary of key terms, and an annotated further reading section. Exploring Language Assessment and Testing is a straightforward introduction to the field that provides an inclusive and impartial survey of both classroom based assessment by teachers and larger scale testing, using concrete examples to guide students to the relevant literature. Ranging from theory to classroom based scenarios, the author provides practical guidance on designing, developing and using assessments, with flexible, step by step processes for improving the quality of tests and assessment systems to make them fairer and more accurate. This book is an indispensable introduction to the areas of language assessment and testing, and will be of interest to language teachers as well as postgraduate and advanced undergraduate students studying Language Education, Applied Linguistics and Language Assessment.

This book will highlight a broad range of topics in communication infrastructures for cloud computing that will benefit researchers, academics, and practitioners in the active fields of engineering, computer science, and software.

Research in Reading and Listening Assessment CRC Press
This book constitutes the thoroughly refereed joint post proceedings of two international workshops, the 7th International Workshop on Data Privacy Management, DPM 2012, and the 5th International Workshop on Autonomous and Spontaneous Security, SETOP 2012, held in Pisa, Italy, in September 2012. The volume contains 13 full papers selected out of 31 submissions and 3 keynote lectures from the DPM workshop and 10 papers selected among numerous submissions from the SETOP workshop. The contributions from DPM cover topics from location privacy, citizens' privacy, privacy, authentication with anonymity, privacy in distributed systems, privacy policies, and automated privacy enforcement. The SETOP contributions provide a unique view of ongoing security research work in a number of emerging environments that are becoming part of the global ICT infrastructure, from content-centric to mobile and wireless networks. Also, some of them cover the key role of run-time enforcement in process and service security. The topics of SETOP papers include: security policy deployment; distributed intrusion detection; autonomous and spontaneous response; privacy policies; secure localization; context aware and ubiquitous computing; identity management.

English Language Proficiency Testing in Asia Cambridge Scholars Publishing
As the demand for English language education grows in Asia, there has been a parallel growth in the development and implementation of standardized tests at the local level. Offering much-needed context on locally produced tests in Asia, contributors examine emerging models for English language assessment and the impact these large-scale tests have on the teaching and learning of English. Chapters address the following well-known and developing high-stakes tests in different regions across Asia: the GEPT, the TEPS, the VSTEP, the CET, the EIKEN and TEAP, and the ELPA. Brought together by world-renowned testing assessment scholar Cyril Weir and the Language Training and Testing Center (LTTC), one of Asia's leading testing institutions based in Taiwan, this volume is a useful reference for evaluating, developing, and validating local tests of English and their societal impact. Comprehensive and research-based, chapters cover historic backgrounds, sociocultural contexts, test quality, international standing, and future considerations. Ideal for graduate students, researchers, and scholars in language assessment, TESOL/TEFL, and applied linguistics, this book will also be of interest to language teaching professionals, language test developers, and graduate students in Asian studies and international education, intercultural communication, and intercultural studies.
