Wound Care Coding FAQs (and Responses)

QUESTION: We recently opened a hospital-based outpatient wound care clinic and I need more information on CPT code 97602 (Nonselective wound care). I know it represents non-physician, non-selective debridement, but should we use it to report the services of staff who apply dressings that debride, such as enzymes, wet-to-moist, or wound cleaning with gauze?

Wound Care | CPT® Codes for debridement - Coding Intel

Full guidelines for the use of these codes can be found on pages 89-90 of the 2020

CPT Professional book.1
Wound repair is typically classified as simple, intermediate or complex. In the 2020 CPT code set, there are updates from the American Medical Association (AMA) CPT Editorial Panel to the definitions of intermediate and complex repair.

Billing and Coding Guidelines for Wound Care

same wound site, only one procedure would be reportable. Since you did not encounter an abscess in the wound, you are left with debride-ment coding and/or closure coding. CPT describes three levels of wound repair: simple, intermediate, and complex. In the scenario presented above, we are looking at either a simple repair or intermediate repair.
