Description. A practical yet thorough treatment of compiler construction. Crafting a Compiler is an undergraduate-level text that presents a practical approach to compiler construction with thorough coverage of the material and examples that clearly illustrate the concepts in the book. Unlike other texts on the market, Fischer/Cytron/LeBlanc uses object-oriented design patterns and incorporates an algorithmic exposition with modern software practices.

ECS 142: Compiler Design - University of California, Davis
The 1988 Pascal-based "Crafting a Compiler" left out some stuff. This 1991 2" thick (in paperback) expansion implements its examples in 'C', making the details MUCH more accessible, making detailed what most compiler books gloss over. It's a little dated now, but on the other hand, the science of Compiler Design hasn't evolved much since the ...
