The fourth volume on Dutch silver deals with those embossed ecclesiastical and secular objects which are not described in Volume I. Since that volume is confined to plaquettes, tazze and dishes, together with the complete oeuvre of the three most famous artists Adam and Paul van Vianen, and Lutma, a large variety of objects remains to be dealt with. Amongst these are many very important and beautiful vessels. The principal pieces described in this volume are of ecclesiastical origin such as monstrances, ciboriums, chalices, pyxes, chrismatories, mass-cruets, incense-boats and burners, altar-thrones, lecterns, missal covers, canon-board frames, altar-bells, altar-vases, altar-candlesticks, sanctuary lamps and sconces. Further, secular silver such as plaquettes, tazze and dishes, that have come to our knowledge since the publication of the first volume, and also plaquette medals, boxes, book-covers, beakers, tankards, cups, bowls, basins, bottles, plate used for the toilet, for the table, candlesticks and plate used for the service of tea, coffee and chocolate. A general survey of a number of objects is given in the Introductions to the first and second volumes (Volume I, p. VI; Volume II, p. VI-XIV). Certain additional observations concerning the nature, technique of manufacture and decoration of the particular types of article illustrated in this volume are, however, necessary.

Current building costs for residential, commercial, and industrial construction. Estimated prices for every common building material, the labor cost to install the material and a total "installed" cost. For those jobs where you can't rely on your past experience to estimate, rely on the prices in this national standard of construction costs to get you safely in the ballpark. Provides manhours, recommended crew, and the labor cost for installation of every job and practically every type of material in construction. Provides clear descriptions on what is included in the job being estimated so you know exactly what the job and the prices for that job entail. Every cost is carefully described. It even provides suggested crew sizes, and equipment rates.

American Art Annual e-artnow

"The Phaenomena is a didactic epic poem modelled on Hesiod's Works and Days and cleverly updated to appeal to contemporary readers interested in new trends in Greek poetry, philosophy and science. Aratus invokes a beneficent Stoic Zeus who has created the constellations and their movements to help men follow the progress of the solar year, and also provides a great variety of signs in sky, air, earth and sea as warnings of weather changes." "This volume presents for the first time in English an edition of the poem with a full introduction, a facing translation and a line by line commentary. The introduction explains the literary and scientific background, the characteristic features of Aratus' language, style and metre, and the transmission of the text to the end of the Middle Ages. The commentary gives help with the content of the poem and aims to discuss and resolve the many problems of text and interpretation caused by Aratus' innovative use of language. The text is based on a new reading of the MSS, including one not used before."--BOOK JACKET.

Everyone knows James Dean died in a car crash. Does anyone know who was driving the other car? School children learn that Orville and Wilbur Wright made the first flight in Kitty Hawk, North Carolina. So which brother was flying? Most of us have had X-rays, but what does the "X" stand for? One-Up Trivia asks the questions that go beyond any other trivia game or quiz. It gives you not only the follow-up question to a "known" fact, but the answer and then some. You'll have trivia and true stories to share with and impress friends through many get-togethers! Get a leg up on the competition, and beat those so-called trivia buffs at their own game. Take trivia to the next level! Time: September 30, 1955, 5:59 p.m. Pacific Daylight Time. Place: California Route 466 near Cholane at the 'Y' intersection with Route 41. Action: A brand new, silver Porsche Spyder 550, traveling at 85 mph crashes into a five year old, black and white Ford Custom Tudor coupe. Driver #1: At the wheel of the Porsche was rebel-without-a-cause, James Dean. The one-up: Who was Driver #2 in the Ford? Donald Turnupseed, a college student. Unlike Dean, he survived the crash. The Ford was repairable, but Dean's Porsche was described as "crumpled up like an empty cigarette pack." No charges were laid. Was the Porsche a jinx car? Dean's friends had talked of it giving them a bad feeling, well before the accident and the strange things that followed it. When the ruined Porsche was stripped for parts, the engine went to professional racer, Troy McHenry. He totaled in his next event. Another racer, William Eschrid, installed the drive train: next race, same thing. A third collector bought the front tires; both blew out on the same trip. California Highway Patrol bought the shell to use as a drive-safely-or-else exhibit for teenagers. It fell off its pedestal...onto a Sacramento high school student.
