The Tricontinental Revolution provides a major reassessment of the global rise and impact of Tricontinentalism, the militant strand of Third World solidarity that defined the 1960s and 1970s as decades of rebellion. Cold War interventions highlighted the limits of decolonization, prompting a generation of global South radicals to adopt expansive visions of self-determination. Long associated with Cuba, this anti-imperial worldview stretched far beyond the Caribbean to unite international revolutions around programs of socialism, armed revolt, economic sovereignty, and confrontational diplomacy. Linking independent nations with non-state movements from North Vietnam through South Africa to New York City, Tricontinentalism encouraged marginalized groups to mount radical challenges to the United States and the inequitable Euro-centric international system. Through eleven expert essays, this volume recenters global political debates on the priorities and ideologies of the Global South, providing a new framework, chronology, and tentative vocabulary for understanding the evolution of anti-imperial and decolonial politics. The Tartine Way — Not all bread is created equal The Bread Book "...the most beautiful bread book yet published..." -- The New York Times, December 7, 2010 Tartine — A bread bible for the home or professional bread-maker, this is the book! It comes from Chad Robertson, a man many consider to be the best bread baker in the United States, and co-owner of San Francisco 's Tartine Bakery. At 5 P.M., Chad Robertson 's rugged, magnificent Tartine loaves are drawn from the oven. The bread at San Francisco's legendary Tartine Bakery sells out within an hour almost every day. Only a handful of bakers have learned the techniques Chad Robertson has developed: To Chad Robertson, bread is the foundation of a meal, the center of daily life, and each loaf tells the story of the baker who shaped it. Chad Robertson developed his unique bread over two decades of apprenticeship with the finest artisan bakers in France and the United States, as well as experimentation in his own ovens. Readers will be astonished at how elemental it is. Bread making the Tartine Way: Now it's your turn to make this bread with your own hands. Clear instructions and hundreds of step-by-step photos put you by Chad's side as he shows you how to make exceptional and elemental bread using just flour, water, and salt. If you liked Tartine All Day by Elisabeth Prueitt and Flour Water Salt Yeast by Ken Forkish, you'll love Tartine Bread! *Rise of the Drow* Yale University Press

Book 18 of the Iliad is an outstanding example of the range and power of Homeric epic. It describes the reaction of the hero Achilles to the death of his closest friend, and his decision to re-enter the conflict even though it means he will lose his own life. The book also includes the forging of the marvellous shield for the hero by the smith-god Hephaestus: the images on the shield are described by the poet in detail, and this description forms the archetypal ecphrasis, influential on many later writers. In an extensive introduction, R. B. Rutherford discusses the themes, style and legacy of the book. The commentary provides line-by-line guidance for readers at all levels, addressing linguistic detail and larger questions of interpretation. A substantial appendix considers the relation between Iliad 18 and the Babylonian Epic of Gilgamesh, which has been prominent in much recent discussion.

A Little History of the World Good Press

"This splendid work of scholarship . . . sums up with economy and power all that the written record so far deciphered has to tell about the ancient and complementary civilizations of Babylon and Assyria."—Edward B. Garside, *New York Times Book Review* Ancient Mesopotamia—the area now called Iraq—has received less attention than ancient Egypt and other long-extinct and more spectacular civilizations. But numerous small clay tablets buried in the desert soil for thousands of years make it possible for us to know more about the people of ancient Mesopotamia than any other land in the early Near East. Professor Oppenheim, who studied these tablets for more than thirty years, used his intimate knowledge of long-dead languages to put together a distinctively personal picture of the Mesopotamians of some three thousand years ago. Following Oppenheim's death, Erica Reiner used the author's outline to complete the revisions he had begun. "To any serious student of Mesopotamian civilization, this is one of the most valuable books ever written."—Leonard Cottrell, *Book Week* "Leo Oppenheim has made a bold, brave, pioneering attempt to present a synthesis of the vast mass of philological and archaeological data that have accumulated over the past hundred years in the field of Assyriological research."—Samuel Noah Kramer, *Archaeology* A. Leo Oppenheim, one of the most distinguished Assyriologists of our time, was editor in charge of the *Assyrian Dictionary of the Oriental Institute* and John A. Wilson Professor of Oriental Studies at the University of Chicago.

To ascertain, however, anything reliable about it is one of the most difficult of undertakings. Such an enquiry being Common to many topics—I mean, an enquiry into the essence, and what each thing is—it might seem to some that one definite procedure were available for all things of which we wished to know the essence; as there is demonstration for the

accidental properties of things. So we should have to discover what is this one method. But if there is no one method for determining what an essence is, our enquiry becomes decidedly more difficult, and we shall have to find a procedure for each case in particular. If, on the other hand, it is clear that either demonstration, or division, or some such process is to be employed, there are still many queries and uncertainties to which answers must be found. For the principles in different subject matters are different, for instance in the case of numbers and surfaces.

Cuneiform records made some three thousand years ago are the basis for this essay on the ideas of death and the afterlife and the story of the flood which were current among the ancient peoples of the Tigro-Euphrates Valley. With the same careful scholarship shown in his previous volume, *The Babylonian Genesis*, Heidel interprets the famous *Gilgamesh Epic* and other related Babylonian and Assyrian documents. He compares them with corresponding portions of the Old Testament in order to determine the inherent historical relationship of Hebrew and Mesopotamian ideas.

More than a decade after Jack Gilbert's *The Great Fires*, this highly anticipated new collection shows the continued development of a poet who has remained fierce in his avoidance of the beaten path. In *Refusing Heaven*, Gilbert writes compellingly about the commingled passion, loneliness, and sometimes surprising happiness of a life spent in luminous understanding of his own blessings and shortcomings: "The days and nights wasted . . . Long hot afternoons / watching ants while the cicadas railed / in the Chinese elm about the brevity of life." Time slows down in these poems, as Gilbert creates an aura of curiosity and wonder at the fact of existence itself. Despite powerful intermittent griefs—over the women he has parted from or the one lost to cancer (an experience he captures with intimate precision)—Gilbert's choice in this volume is to "refuse heaven." He prefers this life, with its struggle and alienation and delight, to any paradise. His work is both a rebellious assertion of the call to clarity and a profound affirmation of the world in all its aspects. It braces the reader in its humanity and heart.
