Since its publication in 1977, The  
Unsettling of America has been  
recognized as a classic of American  
letters. In it, Wendell Berry argues that  
good farming is a cultural and spiritual  
discipline. Today ' s agribusiness,

however, takes farming out of its cultural  
context and away from families. As a  
result, we as a nation are more estranged  
from the land—from the intimate  
knowledge, love, and care of it. Sadly, his  
arguments and observations are more  
relevant than ever. Although “ this book  
has not had the happy fate of being  
proved wrong, ” Berry writes, there are  
people working “ to make something  
comely and enduring of our life on this  
earth. ” Wendell Berry is one of those  
people, writing and working, as ever, with  
passion, eloquence, and conviction.

Where do startup founders and  
product developers get radical, high-  
value ideas? This book presents  
innovation behind-the-scenes stories  
from companies such as Apple,  
Airbnb, Coca-Cola, Google, P&G,  
Uber, and more. It reveals where the  
ideas came from and provides  
guidance on how you, too, can  
combine unlikely ideas to create new  
offerings and startup ventures by  
integrating industries, fields,  
technologies, and people. Famous  
Fusions discusses how an idea from

one place, transported somewhere  
new, can lead to radically creative  
innovation. The book is replete with  
stories of lateral thinking or "fusion"  
that inspire you to think bigger,  
discover deeper insights, sense real  
opportunities and craft high-value  
fusion. This book is essential reading  
for those interested in new inventions,  
innovation and entrepreneurship;  
business leaders and consultants  
involved in innovation and new product  
or service development; and  
academics seeking material on  
business innovation and startups.

Available for the first time in over  
thirty years, John Krizanc ' s  
internationally acclaimed play  
redefined the limits of theatre with its  
haunting tale of art, sex, violence, and  
political intrigue in Fascist Italy. In the  
late twenties the poet, war hero, and  
Ippolito Gabriele d ' Annunzio waits in  
his opulent villa — a gift from Benito  
Mussolini in return for his political  
silence — for the arrival of the artist  
Tamara de Lempicka, who is to paint  
his portrait. What follows is a tale of

art, sex, violence and the meaning of complicity in an authoritarian state. The action is directed by the reader/audience member, who decides which characters to follow and which narratives to experience. John Krizanc ' s masterpiece redefined theatre and won six L.A. Drama Critics Circle Awards, six Dora Mavor Moore Awards, six Drama-Logue Awards, and six Mexican Association of Theatre Critics, and Journalists Awards for its original productions. Now available in a handsome new A List edition, Tamara is an astonishing piece of experimental art and a penetrating look into ethical choices in times of encroaching autocracy.

Nursing and Informatics for the 21st Century Series is a critical resource in chronicling the huge historical shift in nursing linked to the explosion of EHR national and international strategies and health policies around the globe. Each book in the series examines the revolution that has occurred in nursing and explores the role IT continues to play in this transformation, with a thoughtful examination of nursing

practice, science and research, and education. This book, Nursing Education and Digital Health Strategies explores the current state of health and healthcare education, as well as the current state of nursing informatics education. These topics include technologies-enabled education for all nurses and interprofessional collaborations from a worldwide perspective. The "New" learning for applied critical thinking will include technology, content, skills versus tools, and the use of "smart" systems for care delivery, the role of critical thinking and uniqueness of nursing care delivery. Further, how these changes are understood as a paradigm shift that needs to be incorporated along with nursing and healthcare education is emphasized. The effects of technology on human behavior are also explored, addressing human-factors interaction, interdependence of human computer interaction and other effects of technology on wellbeing. As part of nursing education, learning from clients/patients to better shape and advance nursing education and scholarship are discussed. Academic-clinical practice partnerships for a digital future, how teams are working together (clinician/teacher) for better healthcare delivery and applied knowledge, including joint appointments (exchange of academia

and applied expertise), academic-applied human resources, and interprofessional learning/development are discussed. The book closes by discussing and using case studies to showcase nursing competencies for the next decade, and implications for preparing the healthcare workforce for a digital world, faculty readiness and the interaction with gaming and simulations. Nursing informatics education, including continuing education beyond academia, i.e., informal education, worldwide is described as well as global challenges to support digital world capabilities. Hands-on Experiential Delivery (shifting from lecture-based delivery) - case studies learning-based exemplars are included.
