### Master Craftsman Wentworth Press

This book, by a master craftsman who has devoted much of his life to teaching, is an exceptionally useful handbook in the techniques of sheet metalcraft. Presenting easy-to-follow and complete instructions on pages opposite to carefully executed drawings and diagrams, he makes it possible for anyone to learn the basics of this art form and to fashion objects which are at once beautiful and useful, and which display the individual expressiveness of the maker. Beginning with fundamentals, the author lists and pictures all of the necessary tools and carefully explains basic techniques for cutting stock, annealing and heating, pickling, shallow hollowing, raising, planishing, bending and shaping, leveling, soldering and welding, making molds, pattern making, and all of the steps and processes in the fine art of chasing. There follows a series of specific projects for making candlesticks, coasters, fluted platters and bowls, beakers, pitchers, serving trays, lamps, and a host of other articles in a wide variety of designs. A selection of thumbnail sketches for further exploration is included, and complete instructions are given for finishing and oxidation. The compact and graphic method of presentation makes this an extremely handy book, and the projects contained in it will engage the accomplished craftsman as well as the amateur. The approach is consistently from the craftworker's point of view, and the description of workshop methods are clear and direct and result from the author's lifelong experience in actual work and in instruction.

### Tradition and Change Franklin Classics

Portraits of the American Craftsman is a collection of gorgeous portraits of the people and products made in small workshops all over the country, with lyrical and powerful descriptions of what they make, who they are, and the tradition embedded in their trade. The book is a celebration of the handmade at a time when it's being embraced by a new generation of DIY and local-focused consumers who are averse to the mass-produced.

### The Master Craftsman's Illustrated Woodworking Manual--with Projects TAB/Electronics

Why do people consider aesthetic qualities as well as utilitarian ones in the making of everyday objects? Why do they maintain traditions? What is the nature of their creative process? These are some of the larger questions addressed by Michael Owen Jones in his book on craftsmen in the Cumberland Mountains of eastern Kentucky. Concentrating on the work of one man, woodworker and chairmaker Chester Cornett, Jones not only describes the tools and techniques employed by Cornett but also his aspirations and values. Cornett possessed a deep knowledge of his materials and a mastery of construction methods. Some of his chairs represent not objects of utility but aesthetic developments of the chair form. Cornett sought to cope with the problems of his life, Jones maintains; their massiveness provided a sense of security, the virtuosity of their design and construction, a feeling of self-esteem. Jones also compares other area craftsmen and their views about their work.

### A Craftsman's Legacy University Press of Kentucky

The host of Public Television's A Craftsman 's Legacy makes the case that the craftsman 's way--the philosophy, the skills, and the mindset--can provide a blueprint for all of us in our increasingly hurried, disposable world. These days, in the name of technological progress, we have devalued and minimized the personal, the imperfect, and the handmade. We 've become distant from the process of creating and shaping real things, which can even diminish our power to shape our own destinies. As a metal shaper, Eric Gorges has visited and learned from the fellow craftsmen he has profiled for his popular public television program. In this book he tells the stories and shares the collective wisdom of these modern-day makers while also celebrating the culture of all craftsmen. A Craftsman 's Legacy is filled with insights--about the physical, psychological, and spiritual aspects of craftsmanship--from calligraphers, bit and spur makers, potters, stone carvers, glassblowers, engravers, wood workers, and others. Gorges identifies shared values: take time to slow down and enjoy the process; embrace failure; know when to stop and when to push through; accept that perfection is an illusion. He extols the benefits of getting out of our comfort zone, the pleasure of making something lasting, and the importance of being in touch with the traditions of the past in order to carry those values into the future. Along the way, Gorges tells his own story about leaving the corporate world to focus on what he loves. This is a book for makers, for seekers of all kinds, an exhilarating look into the heart and soul of craftsmen--and how they can inspire us all.

### The American Craftsman Sagwan Press

"This collection of profiles about great American craftsmen is itself the handiwork of a great American craftsman." --David Grogan, "This Old House Magazine" For "Acts of Creation," award-winning journalist Walt Harrington travels America searching for the magical nexus of craft, talent, and mastery that gives birth to a functional work of art-and leaves its maker with a sense of satisfaction and achievement known well to fine craftsmen across the ages. A builder of monumental fireplaces in Maine. A cabinet maker in Maryland. A millwright in Virginia. A locksmith and a house framer in Ohio. A hardwood floor man in Indiana. A blacksmith in Illinois. A stone carver in California. Not one of the fourteen craftsmen and woman profiled believes he or she is working only to build a house, to renovate a watermill, to cast a plaster medallion. Each imbues their work with grander purpose--Michael Seward wants the people who buy his furniture to experience an emotional connection; Chuck Crispin wants his clients' lives to be evoked in his floor designs; Charles Keller wants the highly educated world to appreciate the complicated genius of not only fine blacksmithing but all fine craftsmen. The profiles in "Acts of Creation" help to reclaim the place of craftsmanship in a consumerist era that places higher value on profit and branding than it does on dedicated excellence. These craftsmen offer not only lessons about craftsmanship, but also about life. "Acts of Creation is a lovely collection of literary journalism, written by a master of the form. Walt Harrington's gracefully nuanced prose, full of feeling and finely observed detail, wonderfully conveys the world of craftsmen in all its artful integrity. In the grand tradition of Tracy Kidder, John McPhee and Joseph Mitchell, Harrington offers us a fascinating and enduring homage to men at work." --Barry Siegel; Pulitzer Prize winner; director of the Literary Journalism Program, University of California, Irvine "Acts of Creation is an example of what happens when a top-

---

notch writer, laboring in solitude with purity of purpose, puts the right words in the right order." --Madeleine Blais, Pulitzer Prize winner, author of Uphill Walkers: Portrait of a Family "A compelling tribute to Americans who work with their hands and hearts." --Pete Earley, author, "Crazy: A Father's Search Through America's Mental Health Madness."

The Kelmscott Press and William Morris Master-Craftsman Dutton Adult

Thomas Dennis emigrated to America from England in 1663, settling in Ipswich, a Massachusetts village a long day's sail north of Boston. He had apprenticed in joinery, the most common method of making furniture in sixteenth- and seventeenth-century Britain, and he became Ipswich's second joiner, setting up shop in the heart of the village. During his lifetime, Dennis won wide renown as an artisan. Today, connoisseurs judge his elaborately carved furniture as among the best produced in seventeenth-century America. Robert Tarule, historian and accomplished craftsman, brilliantly recreates Dennis's world in recounting how he created a single oak chest.

Writing as a woodworker himself, Tarule vividly portrays Dennis walking through the woods looking for the right trees; sawing and splitting the wood on site; and working in his shop on the chest—planing, joining, and carving. Dennis inherited a knowledge of wood and woodworking that dated back centuries before he was born, and Tarule traces this tradition from Old World to New. He also depicts the natural and social landscape in which Dennis operated, from the sights, sounds, and smells of colonial Ipswich and its surrounding countryside to the laws that governed his use of trees and his network of personal and professional relationships. Thomas Dennis embodies a world that had begun to disappear even during his lifetime, one that today may seem unimaginably distant. Imaginatively conceived and elegantly executed, *The Artisan of Ipswich* gives readers a tangible understanding of that distant past.
