Thomas Dennis emigrated to America from England in 1663, settling in Ipswich, a Massachusetts village a long day's sail north of Boston. He had apprenticed in joinery, the most common method of making furniture in sixteenth- and seventeenth-century Britain, and he became Ipswich's second joiner, setting up shop in the heart of the village. During his lifetime, Dennis won wide renown as an artisan. Today, connoisseurs judge his elaborately

carved furniture as among the best produced in seventeenth-century America. Robert Tarule, historian and accomplished craftsman, brilliantly recreates Dennis's world in recounting how he created a single oak chest. Writing as a woodworker himself, Tarule vividly portrays Dennis walking through the woods looking for the right trees; sawing and splitting the wood on site; and working in his shop on the chest—planing, joining, and carving. Dennis inherited a knowledge of wood and woodworking that dated back centuries before he was born, and Tarule traces this tradition from Old World to New. He also depicts the natural and social landscape in which Dennis operated, from the sights, sounds, and smells of colonial Ipswich and its surrounding countryside to the laws that governed his use of trees and his network of personal and professional relationships. Thomas Dennis embodies a world that had begun to disappear even during his lifetime, one that today may seem unimaginably distant. Imaginatively conceived and elegantly executed, The Artisan of Ipswich gives readers a tangible understanding of that distant past.

Lynn Ford, Texas Artist and Craftsman University Press of Kentucky

This book, by a master craftsman who has devoted much of his life to teaching, is an exceptionally useful handbook in the techniques of sheet metalcraft. Presenting easy-to-follow and complete instructions on pages opposite to carefully executed drawings and diagrams, he makes it possible for anyone to learn the basics of this art form and to fashion objects which are at once beautiful and useful, and which display the individual expressiveness of the maker. Beginning with fundamentals, the author lists and pictures all of the necessary tools and carefully explains basic techniques for cutting stock, annealing and heating, pickling, shallow hollowing, raising, planishing, bending and shaping, leveling, soldering and welding, making molds, pattern making, and all of the steps and processes in the fine art of chasing. There follows a series of specific projects for making candlesticks, coasters, fluted platters and bowls, beakers, pitchers, serving trays, lamps, and a host of other articles in a wide variety of designs. A selection of thumbnail sketches for further exploration is included, and complete instructions are given for finishing and oxidation. The compact and graphic method of presentation makes this an extremely handy book, and the projects contained in it will engage the accomplished craftsman as well as the amateur. The approach is consistently from the craftworker's point of view, and the description of workshop methods are clear and direct and result from the author's lifelong experience in actual work and in instruction.
