Boatbuilding Manual is one of the most widely read texts on the subject, and it has been used for years as a standard reference at both boatbuilding and design schools. the absolute minimum necessary for a complete understanding of the subject. This fourth edition, like its predecessors, emphasizes traditional wooden construction but also surveys plywood, wood-epoxy, fiberglass, steel, aluminum, and other boatbuilding methods. The chapters on interpreting plans, lofting, and moldmaking are common to all methods. It's the book I always recommend for boatbuilding classes, and we've used it to fine advantage at the local high school."--Sonny Hodgdon, Hodgdon Yachts, Inc., East Boothbay,

Maine This is a book at home in the workshop, not the library. Pulled from beneath a pile of shavings, it is the thing to help make a tough decision or to quiet an unwelcome adviser."--SAIL
