The Fisher Body

Craftsman's Guild was a national auto design competition sponsored by the Fisher Body Division of General Motors. This competition was for teenagers to compete for college scholarships by designing and building scale model "dream" cars. Held from the 1930s through the 1960s, it helped identify and nurture a whole generation of designers and design executives. Virgil M. Exner, Jr., Charles M. Jordan,

Robert W. Henderson, Robert A. Cadaret, Richard Arbib, Elia 'Russ' Russinoff, Galen Wickersham, Ronald C. Hill, Edward F. Taylor, George R. Chartier, Charles W. Pelly, Gary Graham, Charles A. Gibilterra, E. Arthur Russell, William A. Moore, Terry R. Henline, Paul Tatseos, Allen T. Weideman, Kenneth J. Dowd, Stuart Shuster, John M. Mellberg, Harry E. Schoepf, and Ronald J. Will, are among those designers and design executives who participated in the Guild. The book also describes many

aspects of the miniature model Napoleonic Coach and other scale model cars the students designed. Large Rotating Machine Winding for Engineering Craftsman Simon and Schuster The Autoharp Owner's Manual covers autoharp maintenance, conversions, tuning and string schedules (both diatonic and chromatic), building your own instrument, playing techniques, evaluating instruments, chord bar setups, amplification, history, and much more. The Chainsaw Operator's Manual is an essential safety tool for chainsaw operators. It is the ultimate guide to basic chainsaw operating techniques covering safety, maintenance and cross-cutting, but not tree felling. Detailed diagrams illustrate horizontal, vertical and boring cuts, as well as trimming and cross-cutting techniques. Safety considerations are

discussed, including workplace safety, occupational hazards, kick-back and identifying dangerous trees. An explanation of the 'tension' and 'compression' forces in timber is also provided to help you understand where to begin cutting to avoid jamming the saw. The book covers chainsaw maintenance in detail, explains all aspects of the equipment and helps you select the right chainsaw and personal protection equipment for your needs. Trouble-shooting charts are

included to help you solve operating problems. This manual has been updated to take into account the most recent changes in nationally accredited competency standards. It is a must-have for anyone operating a chainsaw.

One of Fuller's most popular works, *Operating Manual for Spaceship Earth*, is a brilliant synthesis of his world view. In this very accessible volume, Fuller investigates the great

challenges facing humanity. How will humanity survive? How does automation influence individualization? How can we utilize our resources more effectively to realize our potential to end poverty in this generation? He questions the concept of specialization, calls for a design revolution of innovation, and offers advice on how to guide “spaceship earth” toward a sustainable future. Why do people work hard, and take pride in what they do? This book, a philosophically-minded enquiry into practical activity of many different kinds past and present, is about what happens when people try to do a good job. It asks us to think about the true meaning of skill in the 'skills society' and argues that pure competition is a poor way to achieve quality work. Sennett suggests, instead, that there is a craftsman in every human being, which can sometimes be enormously motivating and inspiring - and can also in other circumstances make individuals obsessive and

frustrated. The Craftsman shows how history has drawn fault-lines between craftsman and artist, maker and user, technique and expression, practice and theory, and that individuals' pride in their work, as well as modern society in general, suffers from these historical divisions. But the past lives of crafts and craftsmen show us ways of working (using tools, acquiring skills, thinking about materials) which provide rewarding alternative ways for people to utilise their talents. We need to recognise this if motivations are to be understood and lives made as fulfilling as possible.
