Over the concluding decades of the twentieth century, the historic preservation community increasingly turned its attention to modern buildings, including bungalows from the 1930s, gas stations and diners from the 1940s, and office buildings and architectural homes from the 1950s. Conservation efforts, however, were often hampered by a lack of technical information about the products used in these structures, and to fill this gap Twentieth-Century Building Materials was developed by the U.S. Department of the Interior's National Park Service and first published in 1995. Now, this invaluable guide is being reissued—with a new preface by the book's original editor. With more than 250 illustrations, including a full-color photographic essay, the volume remains an indispensable reference on the history and conservation of modern building materials. Thirty-seven essays written by leading experts offer insights into the history, manufacturing processes, and uses of a wide range of materials, including glass block, aluminum, plywood, linoleum, and gypsum board. Readers will also learn about how these materials perform over time and discover valuable conservation and repair techniques. Bibliographies and sources for further research complete the volume. The book is intended for a wide range of conservation

professionals including architects, engineers, conservators, and material scientists engaged in the conservation of modern buildings, as well as scholars in related disciplines.

The New Global Marketing: Local Adaptation for Sustainability and Profit discusses the ways that marketing managers can assess the potential for global expansion and help their firms capitalize on opportunities. The book explores which companies and products should expand internationally, what countries offer the best opportunities, and which marketing plan will lead each product or company to success. The material adapts well-established frameworks to demonstrate how the global marketer can assess company strengths

and weaknesses and analyze opportunities and risks in foreign markets. It discusses the proper balance between standardization and localization, and addresses the importance of the "triple" bottom line - environmental sustainability, social fairness, and financial performance. Students also learn about bottom-of-the-pyramid markets, the role of digital global marketing, and the importance of adapting to international political, social, and environmental pressures. Featuring more than twenty original case studies, *The New Global Marketing* is an excellent introduction to what it really takes to succeed as a global marketer. Written for students with some marketing education and exposure to international business, the book is ideally suited to upper-level business courses and M.B.A. programs.
