Nothing leaves Solana but the hangover. The party starts at "high" noon in the island tropics of Beruba until Sander and MarJean stumble on a smuggling cartel led by an Anglo-Caribbean banker and a shadowy arms trader hiding somewhere on exotic Albacore Caye... Chaos erupts when a thieving monkey makes off with Sander's priceless gold doubloon, the key to an ancient Spanish hoard... While in hot pursuit, Sander's odyssey begins as the banker struggles to evacuate his beloved Solana del Mar in a flimsy scheme to grab Solana for his nefarious enterprise, assuring affordable and convenient accommodations for smugglers everywhere... If only a platoon of spooks can infiltrate a beach-rave gone berserk and liberate Solana del Mar — on a remote island where deranged youth and Viagratic party hounds run on vapors in a wild, moonlit paradise... An offbeat, outrageous cast of supporting characters keeps this 'intoxicating' mystery thriller pulsing with new developments at every turn... Gripping, suspenseful, hilarious, sometimes reflecting a retro-chic bit of an Ian Fleming adventure, **Solana del Mar** is a magical Caribbean world with an exotic mix of international culture and ageless characters, offering a behind-scenes glimpse of Euro/American expats 'living their dreams' — turned rollicking nightmare — in a secluded corner of the tropics.

*Gudme* Québec Amérique

Gudme: The Iron Age Settlement and Central Halls presents, describes and interprets the many finds and structures that have been comprised during the extended excavations at the central parts of the Gudme locality on southeast Funen, Denmark. Head of excavation Palle Østergaard Sørensen extracts, combines, classifies, dates and temporalizes the many finds and houses from the excavations Gudmehallerne, Gudme III, Gudme IV. Since the 19th century the Gudme area has been known as one of the richest prehistoric localities in Scandinavia, and more than 1,000 roman coins, close to 600 fibulas as well as several small mask and animal figurines form part of the Gudme find assemblage. From AD 200 to AD 600 the site expanded rapidly and covered as much as one square kilometer comprising up to 50 farmsteads. At the individual farms, specialized craftsmanship can be found and the debris and tools of gold- and silversmiths as well as bronze casting is abundant – here, bronze fragments, often from statues, imported from the Roman Empire form a distinct category of finds – bearing witness to a

flourishing and innovative world of craftsmanship, as well as an extensive trade network. During this period the unique and monumental halls, with the largest being 47 m long and 10 m wide, dominated the hilltops east of Gudme lake. Just to the south a smaller building accompanied the large hall, and had been purposely demolished and rebuilt several times at the exact same spot. The unusually large entrances to the two adjoined buildings lead straight from one to the other, thus witnessing a duality of buildings that came to define the aristocratic localities throughout Scandinavia in the following 800 years. Hence, Gudme represents a starting point for a significant type of architectural ideal as well as a first generation of central places.
