In 1901, Gustav Stickley began to create the first uniquely American style of furniture and home design—known as Craftsman.

Stickley's principles of home design include construction that is in harmony with its landscape, open floor plans, built-in storage, and natural lighting. He was a major

influence on Frank Lloyd Wright, and he remains one of the great names in American architecture. *Craftsman Homes and Bungalows* showcases his work in an affordable, attractive new edition. Featuring hundreds of black-and-white photographs, line drawings, and sketches of cabins, cottages, and bungalows from concept to finished product, it presents easy-to-understand directions on both home construction and improvement. This resource, a combination of three of Stickley's

works, is a comprehensive introduction to the design and building of beautiful Craftsman homes. **NAVDOCKS.** A classic guide to designing and constructing your own fantasy kitchen. Full of helpful tips for the amateur carpenter. *Popular Mechanics Stickley's Craftsman Homes* presents valuable information that historic homeowners and buyers, architects and historians need in order to identify and preserve the surviving Stickley homes. originally published in *The Craftsman* magazine almost 100 years ago, along with exterior illustrations, floor plans and historical photos.
