Co-Winner of the 2005 Hagley Business History Book Prize given by the Business History Conference. In 1926, the Carriage Builders' National Association met for the last time, signaling the automobile's final triumph over the horse-drawn carriage. Only a decade earlier, carriages and wagons were still a common sight on

every Main Street in America. In the previous century, carriage-building had been one of the largest and most dynamic industries in the country. In this sweeping study of a forgotten trade, Thomas A. Kinney extends our understanding of nineteenth-century American industrialization far beyond the steel mill and railroad. The legendary Studebaker Brothers Manufacturing Company in 1880 produced a hundred wagons a day—one every six minutes. Across the country, smaller factories fashioned vast quantities of buggies, farm wagons, and luxury carriages. Today, if we think of carriage and wagon at all, we assume it merely foreshadowed the automobile industry. Yet., the carriage industry epitomized a

batch-work approach to production that flourished for decades. Contradicting the model of industrial development in which hand tools, small firms, and individual craftsmanship simply gave way to mechanized factories, the carriage industry successfully employed small-scale business and manufacturing practices throughout its history. The Carriage Trade traces the rise and fall of this heterogeneous industry, from the pre-industrial shop system to the coming of the automobile, using as case studies Studebaker, the New York-based luxury carriage-maker Brewsters, and dozens of smaller firms from around the country. Kinney also explores the experiences of the carriage and wagon worker over the life

---

of the industry. Deeply researched and strikingly original, this study contributes a vivid chapter to the story of America's industrial revolution.

Reclamation Manual Ten Speed Press  
Did Plato abandon, or sharply modify, the Theory of Forms in later life? In the *Phaedo*, *Symposium*, and *Republic* it is generally agreed that Plato held that universals exist. But in *Parmenides*, he subjected that theory to criticism. If the criticism were valid, and Plato knew so, then the *Parmenides* marks a turning point in his thought. If, however, Plato became aware that there are radical differences in the logical behaviour of concepts, and the later dialogues are a record of his attempt to analyse those differences, then Plato's thought can be said to have moved in a new and vitally important direction after the *Parmenides*. *Studies in Plato's Metaphysics* brings together twenty essays by leading philosophers from the UK and the USA reflecting upon this important issue and upon the questions arising from it.

You've seen the hot rods and custom rides, even looked into the hot rodding lifestyle, but what about where it all starts—in the garages humble or grand where countless hours of machining and wrenching, welding and shaping, elbow grease and inspiration bring a hot rodder's vision to life. In this book, acclaimed hot rod photographer Peter Vincent takes readers into the shops and garages of more than two dozen rod and custom builders across the U.S. From individuals crafting the cars of their dreams to prominent shops turning out cool rides for top dollar, these are the builders in their element. For the hot rod builder, a working environment takes on a whole new meaning; and here, in fascinating pictures and words, readers learn how shops and garages inform and reflect each custom creation. The book offers an intimate look into the garages of legends like Pete Eastwood and shop such as Rolling Bones; celebrated builders-for-hire like Vern Tardel, and Cole Foster; and top-of-the-line shops such as Brizio Street Rods and Steve Moal's operation. The result is the next best thing to being there—a book that vividly summons the nature of these spaces and the cars they produce.

### The 1945 Sears Christmas Book

A book for makers, for seekers of all kinds, an exhilarating look into the heart and soul of artisans—and how their collective

wisdom can inspire us all. "Despite our technological advances, we're busier than ever, our lives more frazzled. That's why the handmade object, created with care and detail, embodying a history and a tradition, is enormously powerful. It can cut through so much and speak in ways that we don't often hear, or that we've forgotten." —Eric Gorges, from A Craftsman's Legacy In this joyful celebration of skilled craftsmen, Eric Gorges, a corporate-refugee-turned-metal-shaper, taps into a growing hunger to get back to what's real. Through visits with fellow artisans—calligraphers, potters, stone carvers, glassblowers, engravers, woodworkers, and more—many of whom he's profiled for his popular television program, Gorges identifies values that are useful for all of us: taking time to slow down and enjoy the process, embracing failure, knowing when to stop and when to push through, and accepting that perfection is an illusion. Most of all, A Craftsman's Legacy shows how all of us can embrace a more creative and authentic life and learn to focus on doing what we love.
