A wide-ranging discussion of factors that impede the cumulation of knowledge in the social sciences, including problems of transparency, replication, and reliability. Rather than focusing on individual studies or methods, this book examines how collective institutions and practices have (often unintended) impacts on the production of knowledge.

Track Plans for Toy Trains Translated Texts for Historian Mary was an ordinary schoolgirl who never thought about having crazy adventures. One day, she was captured by an

alien and sent to another planet for an experiment, but it was a failure. When the experiment failed, she was sent back to Earth by a UFO. Then she experienced another adventure, going back to her past life as a queen who was a fish. Will she be able to return to her present life? Age Range: 8-10 (Third/Fourth/Fifth grade)

Biological Contaminants in Indoor Environments David & Charles

This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

This is the origin story of technology super heroes: the creators and founders of ARM, the company that is

responsible for the processors found inside 95% of the world's mobile devices today. This is also the evolution story of how three companies - Apple, Samsung, and Qualcomm - put ARM technology in the hands of billions of people through smartphones, tablets, music players, and more. It was anything but a straight line from idea to success for ARM. The story starts with the triumph of BBC Micro engineers Steve Furber and Sophie Wilson, who make the audacious decision to design their own microprocessor - and it works the first time. The question becomes, how to sell it? Part I follows ARM as its founders launch their own company, select a new leader, a new strategy, and find themselves partnered with Apple, TI, Nokia, and other companies just as digital technology starts to unleash mobile devices. ARM grows rapidly, even as other semiconductor firms struggle in the dot com meltdown, and establishes itself as a standard for embedded RISC processors. Apple aficionados will find the opening of Part II of interest the moment Steve Jobs returns and changes the direction toward fulfilling consumer dreams. Samsung devotees will see how that firm evolved from its earliest days in consumer electronics and semiconductors through a philosophical shift to innovation. Qualcomm followers will learn much of their history as it plays out from satellite communications to development of a mobile phone standard and emergence as a leading fabless semiconductor company. If ARM could be summarized in one word, it would be "collaboration." Throughout this story, from

Foreword to Epilogue, efforts to develop an ecosystem are highlighted. Familiar names such as Google, Intel, Mediatek, Microsoft, Motorola, TSMC, and others are interwoven throughout. The evolution of ARM's first 25 years as a company wraps up with a shift to its next strategy: the Internet of Things, the ultimate connector for people and devices. Research for this story is extensive, simplifying a complex mobile industry timeline and uncovering critical points where ARM and other companies made fateful and sometimes surprising decisions. Rare photos, summary diagrams and tables, and unique perspectives from insiders add insight to this important telling of technology history.

****PART TWO** in the brand new series from Holly Hepburn, perfect for fans of Cathy Bramley and Katie Fforde** On paper, Merina Wilde has it all: a successful career writing the kind of romantic novels that make even the hardest hearts swoon, a perfect carousel of book launches and parties to keep her social life buzzing, and a childhood sweetheart who thinks she's a goddess. But Merry has a secret: the magic has stopped flowing from her fingers. Try as she might, she can't summon up the sparkle that makes her stories shine. And as her deadline whooshes by, her personal life falls apart too. Alex tells her he wants something other than the future she'd always imagined for them and Merry finds herself single for the first time since – well, ever. Desperate to get her life back on track, Merry leaves London and escapes to the windswept Orkney Islands, locking herself away in a secluded clifftop cottage to try to heal her heart and rediscover her passion for writing. But can the beauty of the islands and the kindness of strangers help Merry to fool herself into believing in love again, if only long enough to finish her book? Or is it time for her to give up the career she's always adored and find something new to set her soul

JACK LONDON (1876-1916), American novelist, born in San Francisco, the son of an itinerant astrologer and a spiritualist mother. He grew up in poverty, scratching a living in various legal and illegal ways -robbing the oyster beds, working in a canning factory and a jute mill, serving aged 17 as a common sailor, and taking part in the Klondike gold rush of 1897. This various experience provided the material for his works, and made him a socialist. "The son of the Wolf" (1900), the first of his collections of tales, is based upon life in the Far North, as is the book that brought him recognition, "The Call of the Wild" (1903), which tells the story of the dog Buck, who, after his master's death, is lured back to the primitive world to lead a wolf pack. Many other tales of struggle, travel, and adventure followed, including "The Sea-Wolf" (1904), "White Fang" (1906), "South Sea Tales" (1911), and "Jerry of the South Seas" (1917). One of London's most interesting novels is the semi-autobiographical "Martin Eden" (1909). He also wrote socialist treatises, autobiographical essays, and a good deal of journalism.

The Optimum Soul Environment is a book of short Life Moments that challenge the difficult concepts of every day life by attempting to simplify the true meaning of life! Though this is a noble and difficult enough concept it is the reader who will determine if it has been attained. What are the great moments of life called? How do you identify with the momentous ideas? Why do the great truths inspire us? How does the awareness between the conscious and higher conscious occur? Perhaps it's called a "Zen Moment." Several Zen Moments are provided. Any "Life Moment" that occurs to expand our awareness in a larger context within the Universe is a Zen Moment. It

is hoped that some will find the concept that "seeing clearly" is an inspirational moment. The titles of the three parts are Drip, Drip, Drip (The Well Placed Drip), Pick Me! Pick Me! and The Lights Upon the Horizon. Drip, Drip, Drip is about the simple event of a drip. It asks the reader to acknowledge that if there is meaning in the universe, that the smallest drip has purpose! If the smallest drip has meaning, think how important and meaningful every moment of your life becomes. This part prepares the reader for Pick Me! Pick Me! This is about kickball at a time of youthful exuberance, when the real purpose of that period of a kid's life was to play! The reader is then exposed to the meaning of "light" in the last story. The Lights Upon the Horizon is about what makes living a special event. It is about creating a philosophy of life as a way of living. It is hoped that the three short Life Moments provided herein will be enlightening. Readers may find them creative, historical and maybe even humorous, but hopefully inspirational. A major part of writing these stories was in the pleasure, moment by moment.

An "engrossing" history of the restaurant atop the World Trade Center "that ruled the New York City skyline from April 1976 until September 11, 2001" (Booklist, starred review). In the

1970s, New York City was plagued by crime, filth, and an ineffective government. The city was falling apart, and even the newly constructed World Trade Center threatened to be a fiasco. But in April 1976, a quarter-mile up on the 107th floor of the North Tower, a new restaurant called Windows on the World opened its doors—a glittering sign that New York wasn't done just yet. In *The Most Spectacular Restaurant in the World*, journalist Tom Roston tells the complete history of this incredible restaurant, from its stunning \$14-million opening to 9/11 and its tragic end. There are stories of the people behind it, such as Joe Baum, the celebrated restaurateur, who was said to be the only man who could outspend an unlimited budget; the well-tipped waiters; and the cavalcade of famous guests as well as everyday people celebrating the key moments in their lives. Roston also charts the changes in American food, from baroque and theatrical to locally sourced and organic. Built on nearly 150 original interviews, *The Most Spectacular Restaurant in the World* is the story of New York City's restaurant culture and the quintessential American drive to succeed. "Roston also digs deeply into the history of New York restaurants, and how Windows on the World was shaped by the politics and social conditions of its era." —The New York Times "The city's premier celebration venue, deeply woven into its social, culinary and business fabrics, deserved a proper history. Roston delivers it with power, detail, humor and heartbreak to spare." ?New York Post "A rich, complex account." ?Kirkus Reviews (starred review)
