Common rail engines have been used in marine and locomotive applications for some time. The Cooper-Bessemer GN-8 (circa 1942) is an example of a hydraulically operated common rail diesel engine, also known as a modified common rail. Vickers pioneered the use of common rail injection in submarine engines.

I have a 2008 Verna CRDI which has clocked 1.4 lakh kms and going without a hitch. Last year it developed a problem with stalling at lower revs. Got a full engine scan done. It was revealed that the stalling was due to one clogged injector with poor quality fuel, a problem 3 tanks of additives quickly rectified.
