The eight essays in *Campus Conversations* provide some of the best scholarly work emerging from individual faculty learning communities in a statewide program called the Chancellor's Learning Scholar (CLS) program. The CLS program began in 2018 as an initiative designed to include large numbers of the University System of Georgia's (USG) about 12,000 fulltime teaching faculty in the USG's statewide student success efforts. The approximately 2,000 faculty who have participated in the first two years of the CLS program learned about the eight pedagogies of student success which can help engage students more deeply, thereby retaining them and deepening their learning. These pedagogies include small teaching (based on the Jim Lang book), inclusive pedagogy, Transparency in Learning and Teaching (TiLT), course design, high impact practices (HIPs), brain-based learning, academic mindset, and the Scholarship of Teaching and Learning (SoTL). As teaching and learning scholarship, each essay has its origin in the topic for which the learning community was formed. The collection demonstrates the range of topics and many of the ways in which USG faculty have explored and applied these pedagogies to their own institutional contexts and courses. The essays selected for inclusion in this volume also embody different responses to the outcomes of the program as set out at the inception of the program.

The basic premise of neurodiversity is that there is no "normal" baseline for brain processes, but that all individual brains vary and therefore are diverse. The CAST organization estimates that 11% of college students enrolling in post-secondary campuses having a learning disability or learning difference. As neurodiverse students enroll in post-secondary education, the environments within which these students learn, can either support or impede their ability to succeed. Simply put, a neurodiverse campus population means that educators recognize that all students process and learn differently and must adapt our approaches and services in order to reach and support all students enrolled on our campuses. Neurodiverse students are a growing population on today's college campus.

Their growing presence prompts new approaches to support their success and change traditional student services and collegiate experiences. This practical guide: Assists readers in better understanding neurodiverse students and the way campus services can create welcoming environments Explores the role Universal Design for Learning (UDL) and Executive Functioning (EF) plays in student success, and Focuses on specific collegiate offices and services that effectively address the needs of neurodiverse learners. Chapters cover tutoring, learning supports, academic coaching, academic advising, career services, residential living, and classroom experiences that impact and assist neurodiverse college students.

In this galvanizing book for all educators, Kristin Souers and Pete Hall explore an urgent and growing issue--childhood trauma--and its profound effect on learning and teaching. Grounded in research and the authors' experience working with trauma-affected students and their teachers, *Fostering Resilient Learners* will help you cultivate a trauma-sensitive learning environment for students across all content areas, grade levels, and educational settings. The authors--a mental health therapist and a veteran principal--provide proven, reliable strategies to help you * Understand what trauma is and how it hinders the learning, motivation, and success of all students in the classroom. * Build strong relationships and create a safe space to enable students to learn at high levels. * Adopt a strengths-based approach that leads you to recalibrate how you view destructive student behaviors and to perceive what students need to break negative cycles. * Head off frustration and burnout with essential self-care techniques that will help you and your students flourish. Each chapter also includes questions and exercises to encourage reflection and extension of the ideas in this book. As an educator, you face the impact of trauma in the classroom every day. Let this book be your guide to seeking solutions rather than dwelling on problems, to building relationships that allow students to grow, thrive, and--most assuredly--learn at high levels.

Many students struggle with the transition from high school to university life. This is especially true of first-generation college students, who are often unfamiliar with the norms and expectations of academia. College professors usually want to help, but many feel overwhelmed by the prospect of making extra time in their already hectic schedules to meet with these struggling students. 33 Simple Strategies for Faculty is a guidebook filled with practical solutions to this problem. It gives college faculty concrete exercises and tools they can use both inside and outside of the classroom to effectively bolster the academic success and wellbeing of their students. To devise these strategies, educational sociologist Lisa M. Nunn talked with a variety of first-year college students, learning what they find baffling and frustrating about their classes, as well as what they love about their professors' teaching. Combining student perspectives with the latest research on bridging the academic achievement gap, she shows how professors can make a difference by spending as little as fifteen minutes a week helping their students acculturate to college life. Whether you are a new faculty member or a tenured professor, you are sure to find 33 Simple Strategies for Faculty to be an invaluable resource.
